Orchestration: An Anthology of Writings is designed to be a

primary or ancillary text for college-level music majors. Although there are several 'how to' textbooks aimed at this market, there is little available that traces the history of orchestration through the writings of composers themselves. By collecting writings from the nineteenth century to today, Mathews illuminates how orchestration has grown and developed, as well as presenting a wide variety of theories that have been embraced by the leading practitioners in the field. The collection then traces the history of orchestration, beginning with Beethoven's Orchestra (with writings by Berlioz, Wagner, Gounod, Mahler, and others), the 19th century (Mahler, Gevaert, Strauss) the fin de siècle (on the edge of musical modernism; writings by Berlioz, Jadassohn, Delius, and Rimsky Korsakov), early modern (Busoni, Schoenberg, Stravinsky, Grainger, and others), and high modern (Carter, Feldman, Reich, Brant). Many of these pieces have never been translated into English before; some only appeared in small journals or the popular press and have never appeared in a book; and none have ever been collected in one place. The study of orchestration is a key part of all students of music theory and composition. Orchestration provides a much needed resource for these students, filling a gap in the literature.

Scoring the Score is the first scholarly examination of the orchestrator's role in the contemporary film industry.

Orchestrators are crucial to the production of a film's score, yet they have not received significant consideration in film-music research. This book sheds light on this often-overlooked yet vital profession. It considers the key processes of orchestrating and arranging and how they relate, musical and filmic training, the

wide-ranging responsibilities of the orchestrator on a film-scoring project, issues related to working practices, the impact of technology, and the differences between the UK and US production processes as they affect orchestrators. Drawing on interviews with American and British orchestrators and composers, *Scoring the Score* aims to expose this often hidden profession through a rigorous examination of the creative process and working practices, and analysis of the skills, training and background common to orchestrators. It will appeal to scholars, students, and practitioners of film music. "

A Practical Guide to MIDI in the Project Studio Taylor & Francis

What does a one hour contemporary orchestral piece by Georg Friedrich Haas have in common with a series of glitch-noise electronic tracks by Pan Sonic? This book proposes that, despite their differences, they share a particular understanding of sound that is found across several quite distinct genres of contemporary art music: the ecstatic-materialist perspective. Sound in the ecstatic-materialist perspective is considered as a material mass or element, unfolding in time, encountered by a listener, for whom the experience of that sound exceeds the purely sonic without becoming entirely divorced from its materiality. It is "material" by virtue of the focus on the texture, consistency, and density of sound; it is "ecstatic" in the etymological sense, that is to say that the experience of this sound involves an instability; an inclination to depart from material appearance, an ephemeral and transitory impulse in the very perception of sound to something beyond – but still related to – it. By examining musical pieces from spectralism to electroacoustic domains, from minimalism to glitch electronica and dubstep, this book identifies the key intrinsic characteristics of this musical perspective. To fully account for this perspective on sonic experience, listener feedback and interviews with composers and performers are also incorporated. Sound in the ecstatic-materialist perspective is the common territory where composers, sound artists, performers, and listeners converge.
