ELSA MILLS

Dictionary Of Modern American Philosophers Princeton University Press

How can we “know”? What does “knowledge” mean? These were the fundamental questions of epistemology in the 17th century. In response to continental rationalism, the British empiricist John Locke proposed that the only knowledge humans can have is acquired a posteriori. In a discussion of the human mind, he argued, the source of knowledge is sensual experience – mostly vision. Since vision and picture-making are the realm of art, art theory picked up on questions such as: are pictures able to represent knowledge about the world? How does the production of images itself generate knowledge? How does pictorial logic differ from linguistic logic? How can artists contribute to a collective search for truth? Questions concerning the epistemic potential of art can be found throughout the centuries up until the present day. However, these are not questions of art alone, but of the representational value of images in general. Thus, the history of art theory can contribute much to recent discussions in Visual Studies and Bildwissenschaften by showing the historic dimension of arguments about what images are or should be. “What is knowledge?” is as much a philosophic question as “What is an image?” Visual epistemology is a new and promising research field that is best investigated using an interdisciplinary approach that addresses a range of interconnected areas, such as internal and external images and the interplay of producer and perceiver of images. This publication outlines this territory by gathering together several approaches to visual epistemology by many distinguished authors.

Enlightenment Volume 2 Springer

Nonnus of Panopolis (fifth century CE) composed two poems once thought to be incompatible: the *Dionysiaca*, a mythological long epic with a marked interest in astrology, the occult, the paradox and not least the beauty of the female body, and a pious and sublime Paraphrase of the Gospel of St John. Little is known about the man, to whom sundry identities have been attached. The

longer work has been misrepresented as a degenerate poem or as a mythological handbook. The Christian poem has been neglected or undervalued. Yet, Nonnus accomplished an ambitious plan, in two parts, aiming at representing world-history. This volume consists mainly of the Proceedings of the First International Conference on Nonnus held in Rethymno, Crete in May 2011. With twentyfour essays, an international team of specialists place Nonnus firmly in his time's context. After an authoritative Introduction by Pierre Chuvin, chapters on Nonnus and the literary past, the visual arts, Late Antique paideia, Christianity and his immediate and long-range afterlife (to modern times) offer a wide-ranging and innovative insight into the man and his world. The volume moves on beyond stereotypes to inaugurate a new era of research for Nonnus and Late Antique poetics on the whole.

The Critical Historians of Art Cambridge Scholars Publishing
Now available in paperback A major art historian reflects on a great tradition of European painting. "The Vexations of Art is an engrossing, passionate attempt to re-engage with painting as a mode of thought at a time when 'it is not clear in what form the resource of painting?for surely painting has been a singular resource of the greater European culture?will continue.'"?Jackie Wullschlager, Financial Times "[A] fascinating book that will surely generate discussion for some time to come."?Mindy Nancarrow, Renaissance Quarterly

An Unprecedented Deformation Cambridge University Press
Reviews the work of nineteenth-century German art critics and connects their writings with the basic philosophical problems of aesthetics considered by Kant, Schiller, and Hegel

Enlightenment Volume 1 Routledge

Flying and the pilot were significant metaphors of fascism's mythical modernity. Fernando Esposito traces the changing meanings of these highly charged symbols from the air show in Brescia, to the sky above the trenches of the First World War to

the violent ideological clashes of the interwar period.

Figural Philology NYU Press

The eighteenth century Enlightenment marks the beginning of the modern age when the scientific method and belief in reason and progress came to hold sway over the Western world. In the twentieth century, however, the Enlightenment has often been judged harshly for its apparently simplistic optimism. Here a master historian goes back to the sources to give us both a more sophisticated and intriguing view of the philosophes, their world and their ideas.

Articulating British Classicism BRILL

Was there a continuity between the "vigorous art and the seminal science" of the seventeenth century? How did they affect one another? Which, if either, was dominant? Four distinguished scholars explore the relation between seventeenth century science and the creative arts in a series of four essays: Introduction, by Stephen E. Toulmin of Columbia; Science and Literature, by Douglas Bush of Harvard; Science and Visual Art, by James S. Ackerman of Harvard; and Scientific Empiricism in Musical Thought, by Claude V. Palisca of Yale. Originally published in 1961. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Origins of Baroque Art in Rome BRILL

This book discusses the effects of Neo-Liberal policies on the transformations of architectural and urban practices and education in the transition from the era of “professionalism” to “post-professionalism.” Building on previous literature in the field of contemporary theory of architecture, it provides the necessary resources for the study of contemporary architecture and urban politics, urban sociology, local administration and urban geography. Further, it develops a political and critical perspective on contemporary practices of architecture and urbanism, their

implementation, legal background, political effects and social results. The book will interest readers from a wide range of academic disciplines, from political science to architecture, and from urban studies to sociology.

Beyond Digital Bloomsbury Publishing

According to Didi-Huberman, visual representation has an "underside" in which intelligible forms lose clarity and defy rational understanding. Art historians, he contends, fail to engage this underside, and he suggests that art historians look to Freud's concept of the "dreamwork", a mobile process that often involves substitution and contradiction.

Philosophical interpretation of Proust based on the work of Merleau-Ponty and Deleuze.

Idea Routledge

The mid-twentieth century saw a change in paradigms of art history: iconology. The main claim of this novel trend in art history was that renowned Renaissance artists (such as Botticelli, Leonardo, or Michelangelo) created imaginative syntheses between their art and contemporary cosmology, philosophy, theology, and magic. The Neoplatonism in the books by Marsilio Ficino and Giovanni Pico della Mirandola became widely acknowledged for its lasting influence on art. It thus became common knowledge that Renaissance artists were not exclusively concerned with problems intrinsic to their work but that their artifacts encompassed a much larger intellectual and cultural horizon. This volume brings together historians concerned with the history of their own discipline – and also those whose research is on the art and culture of the Italian Renaissance itself – with historians from a wide variety of specialist fields, in order to engage with the contested field of iconology. The book will be of interest to scholars working in art history, Renaissance history, Renaissance studies, historiography, philosophy, theology, gender studies, and literature.

The Vexations of Art Routledge

This volume explores how reproduction and reproducibility impact artistic and literary creation while also examining the ways in which reproducibility impacts our practices and disciplines. Ce volume explore l'impact de la reproduction et de la reproductibilité sur la création artistique et littéraire, mais aussi

l'impact de la reproductibilité sur nos pratiques et sur nos disciplines.

Reproducing Images and Texts / La reproduction des images et des textes Yale University Press

Whereas the past decades have seen a profound reconsideration of eighteenth-century visual culture, the architecture of that century has undergone little evaluation. Its study, unlike that of the early modern period or the twentieth century, has continued to use essentially the same methods and ideas over the last fifty years. *Articulating British Classicism* reconsiders the traditional historiography of British eighteenth-century architecture as it was shaped after World War II, and brings together for the first time a variety of new perspectives on British classicism in the period. Drawing on current thinking about the eighteenth century from a range of disciplines, the book examines such topics as social and gender identities, colonialization and commercialization, notions of the rural, urban and suburban, as well as issues of theory and historiography. Canonical constructions of Georgian architecture are explored, including current evaluations of the continental intellectual background, the relationship with mid seventeenth-century Stuart court classicism and the development of the subject in the twentieth century.

Early Modern Art Theory. Visual Culture and Ideology, 1400-1700 Routledge

A vivid portrait of two remarkable twentieth-century thinkers and their landmark collaboration on the use and abuse of caricature and propaganda in the modern world In 1934, Viennese art historian and psychoanalyst Ernst Kris invited his mentee E. H. Gombrich to collaborate on a project that had implications for psychology and neuroscience, and foreshadowed their contributions to the Allied war effort. Their subject: caricature and its use and abuse in propaganda. Their collaboration was a seminal early effort to integrate science, the humanities, and political awareness. In this fascinating biographical and intellectual study, Louis Rose explores the content of Kris and Gombrich's project and its legacy.

Leonardo da Vinci - Alberti - Michelangelo - Vasari - Social position of the artist - Religious art - Minor writers of the High Renaissance - Later mannerists.

Encyclopedia of the History of Classical Archaeology Routledge
Pygmalion's sculpture, which the gods endowed with life, marks, according to this book, perhaps the first instance in Western art of an image that exists on its own terms, rather than simply imitating something else. Stoichita delivers this image and its avatars from the shadow cast by art that merely replicates reality.
Confronting Images Yale University Press

The Science of Freedom completes Peter Gay's brilliant reinterpretation begun in *The Enlightenment: The Rise of Modern Paganism*. In the present book, he describes the philosophes' program and their views of society. His masterful appraisal opens a new range of insights into the Enlightenment's critical method and its humane and libertarian vision.

The Emergence of Modern Architecture Walter de Gruyter

This acclaimed translation of Michel Delon's *Dictionnaire Européen des Lumières* contains more than 350 signed entries covering the art, economics, science, history, philosophy, and religion of the Enlightenment. Delon's team of more than 200 experts from around the world offers a unique perspective on the period, providing offering not only factual information but also critical opinions that give the reader a deeper level of understanding. An international team of translators, editors, and advisers, under the auspices of the French Ministry of Culture, has brought this collection of scholarship to the English-speaking world for the first time.

Encyclopedia of the Enlightenment Princeton University Press

The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers, and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields, before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first

scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.
