Es indudable que las familias biológicas y las familias adoptivas compartimos aspectos esenciales en cuanto a la crianza de los hijos. Sin embargo, las familias adoptivas, a las dificultades propias de toda crianza, debemos anadir el hecho de que las vidas de nuestros hijos no comenzaron cuando nosotros entramos a formar parte de ellas. ¿Que traen nuestros hijos en su "mochila"? ¿Como afecta la calidad y duracion del periodo de institucionalizacion en el establecimiento de un vinculo seguro? ¿Que influencia tienen factores pre y postnatales, como la malnutricion, el alcoholismo, los toxicos ambientales, etc., en el rendimiento escolar? ¿Existe la depresion postadopcion? ¿Somos una familia con un miembro de otra etnia o una familia multietnica? ¿Cuales son los retos y los logros de la monoparentalidad adoptiva? ¿Que piensan nuestros hijos de la adopcion? ¿Como perciben las actitudes, prejuicios y estereotipos racistas de nuestra sociedad? ¿Hay diferencias entre como se perciben a si mismos y como los perciben los demas? Cuando los ninos no vienen de Paris trata de ofrecer, tanto a familias como a profesionales, un espacio de reflexion y orientacion sobre estas y otras cuestiones que afectan a la parentalidad adoptiva.

According to the Convention on the Rights of the Child, the goal of a social justice approach for children is to ensure that children “are better served and protected by justice systems, including the security and social welfare sectors.” Despite this worthy goal, the UN documents how children are rarely viewed as stakeholders in justice rules of law; child justice issues are often dealt with separate from larger justice and security issues; and when justice issues for children are addressed, it is often through a siloed, rather than a comprehensive approach. This volume actively challenges the current youth social justice paradigm through terminology and new approaches that place children and young people front and center in the social justice conversation. Through international consideration, children and young people worldwide are incorporated into the social justice conversation.

El libro de M. J. Abadie, Astrología infantil, explica el rico mundo de las influencias astrológicas a todas las personas interesadas en lograr una educación y maduración exitosa de los niños. No es necesario que los padres sepan de astrología para que entiendan como son sus hijos usando técnicas y métodos practicados durante siglos. Astrología infantil, abarca un amplio panorama sobre la influencia de los planetas en el desarrollo emocional, intelectual, físico y espiritual de los niños. Cuenta con unas tablas planetarias muy fáciles de usar y da instrucciones claras sobre cómo

anotar e interpretar la colocación de los planetas al momento de nacer. La autora ofrece sugerencias concretas para que las influencias negativas sean mínimas y las positivas sean usadas en su máximo potencial; sugerencias que previenen y orientan a los padres sobre los cambios principales que ocurren en las diferentes etapas de desarrollo de los niños. Mientras se convierten en los líderes del mañana, los niños de hoy necesitan toda la ayuda que podamos ofrecerles. Astrología infantil da a los padres la oportunidad de mejorar el desarrollo de sus hijos gracias a una dedicación amorosa conformada expresamente para los dones individuales que sus hijos poseen.

These two volumes represent the cutting edge of contemporary theory and research in psychological science. Based on the keynote and state-of-the-art lectures from the 27th International Congress of Psychology, the volumes feature a collection of chapters written by international leaders in psychological scholarship. The chapters reflect the diversity of current research topics in psychology, where old boundaries have become obsolete and subdivisions from the past merge to form new objects of study. Volume 1 addresses cognitive, biological, and health perspectives. It includes sections on the neural mechanisms underlying psychological processes; the core areas in experimental psychology, perception, attention, learning, and memory; the multiple aspects of psychological health; the interaction between cognitive and emotional processes; and higher cognitive processes with special focus on decision-making and language. Volume 2 deals with social, developmental, and clinical perspectives. The sections highlight human development across the life span; basic and applied issues in personality, emotion, and clinical psychology; social psychology, ranging from experimental work through social constructivism; and gender.

Psychology at the Turn of the Millennium, Volume 2 Edelvives

Since the 1980s, neoliberals have openly contested the idea that the state should protect the socio-economic well-being of its citizens, making 'privatization' their mantra. Yet, as historians and social scientists have shown, welfare has always been a 'mixed economy', wherein private and public actors dynamically interacted, collaborating or competing with each other in the provision of welfare services. This book will be of interest to students, scholars and practitioners of welfare by developing three innovative approaches. Firstly, it illuminates the productive nature of public/private entanglements. Far from amounting to a zero-sum game, the interactions between the two sectors have changed over time what welfare encompasses, its contents and targets, often engendering the creation of new fields of intervention. Secondly, this book departs from a well-established tradition of comparison between Western nation-states by using and mixing various scales of analysis (local, national, international and global) and by covering case studies from Spain to Poland and France to Greece in the nineteenth and twentieth centuries. Thirdly, this book goes beyond state centrism in welfare studies by bringing back a host of public and private actors, from municipalities to international organizations, from older charities to modern NGOs. Since the publication of the still very valuable Biblioteca histórica de la filología by Cipriano Muñoz y Manzano, conde de la Viñaza (Madrid, 1893), our knowledge of the history of the study of the Spanish language has grown considerably, and most manuscript and secondary sources had never been tapped before Hans-Josef Niederehe of the University of Trier courageously undertook the task to bring together any available bibliographical information together with much more recent research findings, scattered in libraries, journals and other places. The resulting Bibliografía cronológica de la lingüística, la gramática y la lexicografía del español: Desde los principios hasta el año 1600 (BICRES) began appearing in 1994. BICRES I covered the period from the early beginnings to 1600), followed by BICRES II (1601-1700), BICRES III (1701-1800), and together with Miguel Ángel Esparza Torres of Madrid there followed BICRES IV (1801 to 1860). Now, the fifth volume, has become available, covering the years from 1861 to 1899. Access to the bibliographical information of altogether 5,272 titles is facilitated by several detailed indexes, such as a short title index, a listing of printers, publishers and places of production, and an author index. More than twenty years of research in the major libraries of Spain and other European countries have gone into this unique work — relative sources of the Americas have also been covered — making it exhaustive source for any serious scholar of any possible aspect of the Spanish language.
