*Blockchain and Web 3.0* Marsilio

This is a new, revised, and updated edition of Brian Sutherland's classic book on making glazes from natural sources, such as trees, plants, and stones.

Adapted from a successful and thoroughly field-tested Italian text, the first edition of *Electromagnetic Waves* was very well received. Its broad, integrated coverage of electromagnetic waves and their applications forms the cornerstone on which the author based this second edition. Working from Maxwell's equations to applications in optical communications and photonics, *Electromagnetic Waves, Second Edition* forges a link between basic physics and real-life problems in wave propagation and radiation. Accomplished researcher and educator Carlo G. Someda uses a modern approach to the subject. Unlike other books in the field, it surveys all major areas of electromagnetic waves in a single treatment. The book begins with a detailed treatment of the mathematics of Maxwell's equations. It follows with a discussion of polarization, delves into propagation in various media, devotes four chapters to guided propagation, links the concepts to practical applications, and concludes with radiation, diffraction, coherence, and radiation statistics. This edition features many new and reworked problems, updated references and suggestions for further reading, a completely revised appendix on Bessel functions, and new definitions such as antenna effective height. Illustrating the concepts with examples in every chapter, *Electromagnetic Waves, Second Edition* is an ideal introduction for those new to the field as well as a convenient reference for seasoned professionals.

The Framework for management effectiveness developed by the IUCN World Commission for Protected Areas was published in the first version of this Best Practice Guideline. It is further explained and interpreted, although not substantially altered, in this version. A number of key guidelines for good practice in evaluation are presented from many practitioners around the world, and important needs and directions for the future are identified.

'If AI is outside your field, or you know something of the subject and would like to know more than Artificial Intelligence: The Basics is a brilliant primer.' - Nick Smith, *Engineering and Technology Magazine* November 2011 *Artificial Intelligence: The*

Basics is a concise and cutting-edge introduction to the fast moving world of AI. The author Kevin Warwick, a pioneer in the field, examines issues of what it means to be man or machine and looks at advances in robotics which have blurred the boundaries. Topics covered include: how intelligence can be defined whether machines can 'think' sensory input in machine systems the nature of consciousness the controversial culturing of human neurons. Exploring issues at the heart of the subject, this book is suitable for anyone interested in AI, and provides an illuminating and accessible introduction to this fascinating subject.

 PRESENTATION: HOW TO KNOW EVERYTHING ABOUT THE ROLEX GMT-MASTER The GMT-Master was created to meet the needs of Pan American Airways to supply its pilots with a wristwatch able to indicate the time back home and the time in their arrival destination simultaneously. It was necessary to give the pilots a "technical" wristwatch, which indicated simultaneously the two different times. It is from this point that the request arose from Pan Am to Rolex, to create a new watch for modern age aviators: a watch with two time zones. The name GMT-Master was chosen... Are you a watch collector and you need information about the Rolex GMT-Master? Are you a watch dealer and you want to know exactly what you are buying and selling? Do you want to know the real value of your GMT-Master? For all this and much much more, this book is perfect for you. You will also know the current value of every GMT-Master. TOPICS With high quality images, technical details and updated prices, this book shows and describes every GMT-Master and GMT-Master II reference. For each watch this guide explains every characteristic: crystal, bakelite bezel, anodized aluminium bezel, Cerachrom bezel, bracelet, case back, winding crown, case number with production year, dial, movement, hands, etc. Furthermore, the book shows: "Albino", bachelite, "Batman", bracelets, calibers, "circular" indexes, "circular edged" indexes, "Cornino" crown guards, "standard" crown guards, GMT hand with small arrow, Green Dial, Oysterlock, sunken holes, vintage advertisements, Underline, box, papers, the "Ice" model, "Chuck Yeager", "Tiffany & Co.", "Mission Everest", dials with Arab coats of arms, ... Attached are the updated estimates of every modern and vintage Rolex GMT-Master.

Peggy Guggenheim (1898 - 1979) challenged boundaries as a patron and collector. She is celebrated for her groundbreaking collection of European and American modern art. The volume will focus on a lesser-known but crucial episode in Guggenheim's own migratory path: her turn to the arts of Africa, Oceania, and the Americas in the 1950s and '60s. In these years, Guggenheim acquired works created by artists from cultures worldwide,

including early twentieth-century sculpture from Mali, Côte d'Ivoire, and New Guinea, and ancient examples from Mexico and Peru. 'Migrating Objects' emerges from an extended period of research and discussion on this largely ignored area of Guggenheim's collection by a curatorial advisory committee, which has led to exciting findings, including the reattribution of individual works, among them the Nigerian headdress (Ago Egungun) produced by the workshop of Oniyide Adugbologe (ca. 1875-1949), which is illustrated in the catalogue. *Between Imagined Communities and Communities of Practice* Wilderness Press

Community and participation have become central concepts in the nomination processes surrounding heritage, intersecting time and again with questions of territory. In this volume, anthropologists and legal scholars from France, Germany, Italy and the USA take up questions arising from these intertwined concerns from diverse perspectives: How and by whom were these concepts interpreted and re-interpreted, and what effects did they bring forth in their implementation? What impact was wielded by these terms, and what kinds of discursive formations did they bring forth? How do actors from local to national levels interpret these new components of the heritage regime, and how do actors within heritage-granting national and international bodies work it into their cultural and political agency? What is the role of experts and expertise, and when is scholarly knowledge expertise and when is it partisan? How do bureaucratic institutions translate the imperative of participation into concrete practices? Case studies from within and without the UNESCO matrix combine with essays probing larger concerns generated by the valuation and valorization of culture.

This volume is a collection of eight articles on the general topic of translation. The common element running through them all is the analysis of samples of tourist literature and their translations, from a pragmatic point of view. The languages concerned are mainly English and Spanish, but examples of German and French texts are also included. The theoretical approaches are multifaceted. Relevance theory, systemic-functional linguistics and discourse analysis are some of the theoretical standpoints taken as a background. The book covers phenomena as varied as translation quality assessment, audience design and perlocutionary effects, dealing also with more specific features like thematic structure, inference and propositional meaning, discourse markers and grammatical metaphor in order to provide a wide range of analyses for the specialised reader.

Updated second edition: "A bold and imaginative book which

moves our thinking about narratives of illness in new directions.” —Sociology of Heath and Illness Since it was first published in 1995, *The Wounded Storyteller* has occupied a unique place in the body of work on illness. A collective portrait of a so-called “remission society” of those who suffer from illness or disability, as well as a cogent analysis of their stories within a larger framework of narrative theory, Arthur W. Frank’s book has reached a large and diverse readership including the ill, medical professionals, and scholars of literary theory. Drawing on the work of such authors as Oliver Sacks, Anatole Broyard, Norman Cousins, and Audre Lorde, as well as from people he met during the years he spent among different illness groups, Frank recounts a stirring collection of illness stories, ranging from the well-known—Gilda Radner’s battle with ovarian cancer—to the private testimonials of people with cancer, chronic fatigue syndrome, and disabilities. Their stories are more than accounts of personal suffering: They abound with moral choices and point to a social ethic. In this new edition Frank adds a preface describing the personal and cultural times when the first edition was written. His new afterword extends the book’s argument significantly, discussing storytelling and experience, other modes of illness narration, and a version of hope that is both realistic and aspirational. Reflecting on his own life during the creation of the first edition and the conclusions of the book itself, he reminds us of the power of storytelling as way to understand our own suffering. “Arthur W. Frank’s second edition of *The Wounded Storyteller* provides instructions for use of this now-classic text in the study of illness narratives.” —Rita Charon, author of *Narrative Medicine* “Frank sees the value of illness narratives not so much in solving clinical conundrums as in addressing the question of how to live a good life.” —Christianity Today

The measurement of tourism is not an easy task. In the last decade there has been a growing interest in the tourism world in new methods to measure demand and supply of tourism. Fully revised and updated, the second edition of *The Economics of Tourism Destinations* provides a succinct guide to the economic aspects of tourism for students and practitioners alike to decipher the methods of measurement of supply, demand, trends and impacts. This book emphasizes new aspects such as measurement of tourism (e.g. Tourism Satellite Account), supply trends, competition models, macro evaluation of tourism projects and events and the role of tourism in a development strategy. Each chapter combines theory and practice and international case studies are provided.

*The Kiteboarding Manual* University of Pennsylvania Press Questo libro intende rimettere al centro dell’attenzione delle politiche territoriali e del progetto urbanistico il tema della qualità ecologica delle coste, intese come infrastrutture ambientali e di servizio per la rigenerazione dei contesti territoriali. Le coste sono geografie mobili e fragili il cui stato di salute appare sempre più minacciato dagli effetti pervasivi della pressione antropica e delle crisi congiunturali in atto. Nel nostro paese, oltre il 30% della popolazione nazionale vive in aree costiere; le città sul mare occupano il 13% del territorio nazionale; la densità di urbanizzazione nei cinquecento metri dalla linea della battigia è pari a cinque volte la media nazionale. L’effetto antropico produce ricadute negative sugli equilibri ambientali dei sistemi costieri, determinando un decremento della qualità dei servizi ecosistemici necessari alla vita degli organismi, compresa quella degli uomini. I cambiamenti climatici hanno accentuato le dinamiche di innalzamento delle maree, di ingressione marina, di subsidenza ed erosione, d’inquinamento dell’aria e dell’acqua. I contributi raccolti in questo volume affermano la necessità che i piani, i progetti e le governance territoriali riscattino gli approcci correnti – settoriali e frammentari – e pongano al centro dell’attenzione i temi della vulnerabilità e della sicurezza ambientale come materiali di un ampio programma progettuale, integrato e transcalare. È necessario confrontarsi con le prospettive di rigenerazione ecologica e sociale dei contesti urbani e territoriali, con politiche per la mobilità, il risparmio energetico, la salute ecosistemica del suolo, la qualità dei servizi collettivi, la riduzione della vulnerabilità ambientale e sociale dei tessuti interessati dai programmi d’intervento. Si tratta, inoltre, di attraversare e descrivere le coste: far emergere la loro

complessità e il loro spessore ecologico. In quest’ultima prospettiva, il libro raccoglie un interessante atlante di scatti fotografici che hanno partecipato al concorso Erosioni, bandito da Legambiente e dall’Osservatorio paesaggi costieri italiani nel luglio 2020.

Readers seeking to understand the resurgence of fascism in the world today should profit from Emilio Lussu’s account. This is an autobiography through which the reader encounters men and women caught up in the brutalizing of a State whose opponents suffer the consequences of holding to principle. In Sardinia in the 1920’s a bourgeois class fell easy prey to fascism. Lussu’s personal, humorous, warm, perceptive, ironic and telling account of his own humiliation and punishment, affords the reader the unique perspective of a man at the centre of opposition to a movement which would eventually plunge Europe into war.

Introduzione In questo manuale troverete le istruzioni per costruire in una settimana la vostra tavola da kiteboard custom. Ho scelto di illustrare un metodo facile, economico e veloce senza poi togliere nulla alle prestazioni e alle qualità della vostra tavola. È indispensabile non avere fretta di terminare il lavoro, seguire attentamente le istruzioni di questo manuale e le istruzioni che trovate nelle confezioni di resine – stucchi ecc.. E’ importante sapere che qualsiasi errore commesso è recuperabile e si può aggiustare con un po’ di calma e pazienza . L’unico rischio effettivo di buttare il lavoro è derivato da un errore in fase di miscelazione della resina. Fate attenzione!!!!!! Già tramite i miei consigli molte persone sono riuscite a planare con le loro custom ed alcuni di loro hanno già pubblicato, su un apposita sessione, le foto delle loro tavole. Vi ricordo inoltre che durante le fasi della lavorazione si sporca notevolmente l’ambiente circostante, si crea rumore durante la fase di levigazione, ed è bene che il locale sia areato per evitare odori .

Seeking to move beyond the customary limits of archaeological prose and representation, *Subjects and Narratives in Archaeology* presents archaeology in a variety of nontraditional formats. The volume demonstrates that visual art, creative nonfiction, archaeological fiction, video, drama, and other artistic pursuits have much to offer archaeological interpretation and analysis. Chapters in the volume are augmented by narrative, poetry, paintings, dialogues, online databases, videos, audio files, and slideshows. The work will be available in print and as an enhanced ebook that incorporates and showcases the multimedia elements in archaeological narrative. While exploring these new and not-so-new forms, the contributors discuss the boundaries and connections between empirical data and archaeological imagination. Both a critique and an experiment, *Subjects and Narratives in Archaeology* addresses the goals, advantages, and difficulties of alternative forms of archaeological representation. Exploring the idea that academically sound archaeology can be fun to create and read, the book takes a step beyond the boundaries of both traditional archaeology and traditional publishing.

PRESENTATION: STAINLESS STEEL ROLEX This book is about all stainless steel Rolex watches, both modern and vintage models. The stainless steel is an alloy, mainly composed of iron and carbon, which is resistant, shiny, but above all... fashionable. A Rolex watch must work and perform even in the most hostile environment. With the passing of time, the techniques of stainless steel production have continuously evolved. Therefore there are different types of steel which have been used by Rolex (i.e. Rolesium: a Rolex patent from 21 May 1932 to arrive today to 904L steel). Technical details, historical profiles, characteristics of all Rolex watches in stainless steel will satisfy your professional needs and will also represent a useful guide to invest in these watches. TOPICS Between the topics of the book we can find: The whole Oyster line Push-Back case Rolex watches: those models with the snap on the case Chronographs: this chapter is divided in two parts - chronographs with push-back case and chronographs with Oyster case The "Masters": the most complicated Rolex watches The military models: Rolex watches that were part of the equipment of different army soldiers. Between the models in this chapter: Submariners, Cosmographs, GMT-Master and Turn-O-Graphs. The Panerai Rolexes: those Panerai models with a Rolex movement. These watches achieved a very high value by Mario Paci. Comex: all Rolexes produced for Comex. Not only Submariner and Sea-Dweller but also Explorer and GMT-Master. Personalized dials: those Rolex watches with dials characterized by different logos, such as logos of companies, countries, ministers, Rolex retailers and much more. Faded dials: those examples with turning color dial. The most relevant colors are brown, light green and cream. Rare and particular dials: Rolex watches with pulsometer, underline, albino, black out, cern, 3-6-9 dials Bamford: Rolex watches personalized by Bamford Watch Department It is an updated and complete edition which provides technical details, history, scrutinized descriptions, high quality images and updated prices of Rolexes in stainless steel. The book comes with the updated price list of all published watches.
