Guide to Current Official Statistics Penguin

During the 1930s in the United States, the Works Progress Administration developed the Federal Writers' Project to support writers and artists while making a national effort to document the country's shared history and culture. The American Guide series consists of individual guides to each of the states. Little-known authors—many of whom would later become celebrated literary figures—were commissioned to write these important books. John Steinbeck, Saul Bellow, Zora Neale Hurston, and Ralph Ellison are among the more than 6,000 writers, editors, historians, and researchers who documented this celebration of local histories. Photographs, drawings, driving tours, detailed descriptions of towns, and rich cultural details exhibit each state's unique flavor. Published in 1941, the WPA Guide to Michigan documents the rich history and economies of the Great Lake State. From the Upper Peninsula to the Lower, and the Straits of Mackinac between, the guide features many photographs of the distinctive geography as well as essays about marine lore, architecture, and—in the essay on Detroit—the nation's burgeoning auto industry.

The British National Bibliography Penguin

The only guide to Southeast Asia that covers the entire length and breadth of a region frequently visited by round-the-world sailors, many of whom leave Australia to head west. This 2008 edition concentrates on the most frequented routes and includes the most popular stops. There are hundreds of possible anchorages, the most popular of which are usefully summarised in tables. Introductory sections cover planning and the last part of the book deals with more general topics including advice on provisioning and the problems that are often faced by cruisers. Stephen Morgan and Elaine Davies first arrived in the region over 30 years ago. They work in Hong Kong- Stephen Davies as Director of the Hong Kong Maritime Museum and Elaine Morgan as a writer and editor. While this pilot is aimed at yachtsmen and indeed was surveyed from the Davies/Morgan yacht, it is just as relevant to the commercial or military mariner. The part of the world described in this work is one of the most interesting on our planet. Culturally, scenically, climatically and commercially- it has everything. This excellent book - now in its second edition, describes it all very enticingly. Set to the usual

high standard of the Imray pilots that precede it, this one is spiced up by the wit and anecdotes the authors are so good at.

At Templeton's Crossing in October 1942, Private Nick Kennedy paused to write in his diary: 'One wonders why all this strife should be ... these men in the prime of their life cut down like flowers'. As a young nursing orderly serving with the 2/4th Australian Field Ambulance, Kennedy was unenviably well-placed to reflect on the futility of war. The Australian Army was woefully unprepared to fight a medical war in Papua and the soldiers paid the price. Almost 30,000 soldiers suffered from illness and tropical diseases, and an estimated 6000 were killed or wounded during the six-month campaign. These statistics have traditionally been represented as unavoidable consequences of fighting a war in a place such as Papua. This book disputes that narrative. Death and disease were inevitable outcomes, but the scale of the suffering was not. The medical challenges presented in Papua were extreme - they were not insurmountable. *Shadows on the Track* considers a wide range of issues that impacted on the health of the Australian soldiers before, during and after the Papuan campaign was fought and won. The strengths, successes, shortcomings and failures of the medical campaign are identified, analysed and evaluated. The focus on the front-line medical personnel - the men of the field ambulance units - brings a new perspective to the battles of the Kokoda Track, Milne Bay and the Beachheads. Shining a light on these Australians who tended the sick, mended the wounded and buried the dead in Papua makes stepping out of the shadows a little easier.

Tracing Your British Indian Ancestors gives a fascinating insight into the history of the subcontinent under British rule and into the lives the British led there. It also introduces the reader to the range of historical records that can be consulted in order to throw light on the experience of individuals who were connected to India over the centuries of British involvement in the country. Emma Jolly looks at every aspect of British Indian history and at all the relevant resources. She explains the information held in the British Library India Office Records and The National Archives. She also covers the records of the armed forces, the civil service and the railways, as well as religious and probate records, and other sources available for researchers. At the same time, she provides a concise and vivid social history of the British in India: from the early days of the East India Company, through

the Mutiny and the imposition of direct British rule in the mid-nineteenth century, to the independence movement and the last days of the Raj. Her book will help family historians put their research into an historical perspective, giving them a better understanding of the part their ancestors played in India in the past.
