*The Craft and Science of Coffee* Routledge  
 In a world with an uncertain future, do you imagine for the best - or worst-case scenario? Twelve writers tackle extreme utopias and dystopias - and the gray areas in between - in *Biketopia*, the fourth volume of the *Bikes in Space* series of feminist science fiction stories about bicycling. Whatever your own future or present reality, these stories will motivate and inspire you to envision something different... and maybe even better.

### **Men and Women of the Corporation** SAGE

It has been more than a decade since the first edition of Peter Koestenbaum's landmark book *Leadership: The Inner Side of Greatness* was published. Since that time world events have caused a dramatic shift in how we think about our lives and our work. Now we grapple with the fundamental questions. How can we live a courageous life and manage anxiety? Is it possible to reach greater heights of ethics

and responsibility? Peter Koestenbaum, the preeminent business philosopher, has been a trusted mentor to business leaders worldwide. In this thoroughly revised edition of his classic book he shares his wisdom about the fundamental nature of leadership and shows what it takes to become an exceptional and passionate leader in today's complex world. At the very heart of the book is his Leadership Diamond model— a paradigm that challenges managers to transform their thinking and approach everything with fresh effectiveness in order to reap richer results and become great leaders. Throughout the book, Koestenbaum encourages managers to give meaning to their lives through the quality of their work. He offers an insightful look at the characteristics great leaders have in common— vision, reality, ethics, and courage— and identifies the strategies all managers can use to achieve and sustain both personal and organizational greatness. This new edition expands on Koestenbaum's leadership theories and is filled with updated examples—such as an analysis of the Enron scandal—that reflect the challenges of today's business

environment. The book also includes a wealth of new intervention tools, techniques, and strategies, and an expanded section contains reflections on moral and cultural issues that emphasize the importance of authenticity in leadership. More than ever, *Leadership: The Inner Side of Greatness* is the book managers need to learn what they must be to become truly effective leaders. [Sensemaking in Organizations](#) John Wiley & Sons

Lead your organization into the 21st century with the help of this groundbreaking book that is already creating a stir in corporate boardrooms across America! In a book that does for managers what his mega-bestseller, *The Team Handbook*, did for teams, Peter Scholtes, who is widely acknowledged as one of the most influential Quality leaders of the decade, shows the real root of management problems. Learn how to stop blaming your workers and start changing the systems with the help of activities and exercises that enable you to immediately begin implementing breakthrough improvements in all your work processes! [Feminist Futures of Spatial Practice](#) Elly

Blue Publishing

This book opens with a quiz designed to identify your existing strengths and weaknesses and direct you to the corresponding chapters. It goes on to explore, in turn, the key elements of effective leadership, with the aid of studies of successful BrainSmart Leaders, exercises, quizzes, Mind Maps® and practical guidance for applying the ideas described. Working through the text and the related material will equip you with the mental technology to apply your creativity to maximum effect. The result should be a dramatic improvement in your own performance and that of your organization.

**Learning by Doing** Pfeiffer

The groundbreaking classic that explores how women can and should negotiate for parity in their workplaces, homes, and beyond When Linda Babcock wanted to know why male graduate students were teaching their own courses while female students were always assigned as assistants, her dean said: "More men ask. The women just don't ask." Drawing on psychology, sociology, economics, and organizational behavior as well as dozens of interviews with men and women in different fields and at all stages in their careers, *Women Don't Ask* explores how our institutions, child-rearing practices, and implicit assumptions discourage women from asking for the opportunities and resources that they have earned and deserve—perpetuating inequalities that are fundamentally unfair and economically unsound. *Women Don't Ask* tells women how to ask, and why they should.

**Biketopia** Basic Books

The fifth volume in a AAHE and Campus Compact's series on service-learning in the disciplines, this volume focuses on curriculum reform in accounting programs based on goals identified by accounting educators and describes specific implementations across the accounting curriculum. A practical guide with real solutions for both accounting educators and students.

**Problems from Locke** Jossey-Bass

Authors Joann Keyton and Stephenson J. Beck present a communicative framework—one that emphasizes the creation and management of messages as well as the reception and perception of meaning—for the investigation of groups and teams. The book also elaborates on the strategic and contextual nature of group interaction. The book is structured around five key elements of groups, all pieces of a puzzle, that can be used to evaluate group effectiveness. These are: group size, interdependence of members, group

identity, group goals, and group structure. Throughout the book, and in pedagogical features, skills are grounded in a solid research base (and further highlighted in Skill Builder and Theory Standout boxes). Examples are extensive and true-to-life, with many utilizing transcripts of group dialogues so students can see the communication process unfold (Message and Meaning boxes). A wide range of group types is presented, from family and social groups, to work teams and task groups, to discussion and decision-making groups. Whether students' experiences are with groups that are formal or informal, personal or professional, task oriented or relationally oriented, they need communication skills to build and maintain relationships that support effective problem solving and decision making. Building on the strengths of previous editions, robust enhancements to this edition include new chapter opening stories; examples of a wider variety of group types from in-person to hybrid to virtual; the inclusion of new trends and research; and updated instructor and Active Learning resources.

**Extreme Teaming** Center for Creative Leadership

This innovative reader brings together classic theoretical texts and cutting-edge ethnographic analyses of specific state institutions, practices, and processes and outlines an anthropological framework for rethinking future study of "the state". Focuses on the institutions, spaces, ideas, practices, and representations that constitute the "state". Promotes cultural and transnational approaches to the subject. Helps readers to make anthropological sense of the state as a cultural artifact, in the context of a neoliberalizing, transnational world.

**Teaching Smart People How to Learn** Routledge

Architecture and the arts have long been on the forefront of socio-spatial struggles, in which equality, access, representation and expression are at stake in our cities, communities and everyday lives. Feminist spatial practices contribute substantially to new forms of activism, expanding dialogues, engaging materialisms, transforming pedagogies, and projecting alternatives. 'Feminist Futures of Spatial Practice' traces practical tools and theoretical dimensions, as well as temporalities, emergence, histories, events, durations ? and futures ? of feminist practices. 0Authors include international practitioners, researchers, and educators, from architecture, the arts, art history, curating, cultural heritage studies, environmental sciences, futures

studies, film, visual communication, design and design theory, queer, intersectional and gender studies, political sciences, sociology, and urban planning. Established as well as emerging voices write critically from within their institutions, professions, and their activist, political and personal practices.

**Driving Fear Out of the Workplace** AIAA

This book gives an exhaustive account of the classification and management of epileptic disorders. It provides clear didactic guidance on the diagnosis and treatment of epileptic syndromes and seizures through thirteen chapters, complemented by a pharmacopoeia and CD ROM of video-EEGs.

A PDF version of this book is available for free in open access via [www.tandfebooks.com](http://www.tandfebooks.com) as well as the OAPEN Library platform, [www.oapen.org](http://www.oapen.org). It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or 'wires') for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business

history.

Extreme Teaming provides new insights into the world of increasingly complex, cross industry projects. Amy Edmondson and Jean-Francois Harvey show vividly through their international cases how the complex demands of collaboration impact on management and revolutionize our understanding of teams.

**The Religious Identity of Young Muslim Women in Berlin** Harvard Business Review Press

This volume is a readily accessible compilation of current, original scholarly research in the area of power and influence in organizations. It offers a rich exploration of emerging trends and new perspectives.

**Leadership: The Key Concepts** McGraw Hill Professional

The teaching of organization theory and the conduct of organizational research have been dominated by a focus on decision-making and the concept of strategic rationality. However, the rational model ignores the inherent complexity and ambiguity of real-world organizations and their environments. In this landmark volume, Karl E Weick highlights how the 'sensemaking' process shapes organizational structure and behaviour. The process is seen as the creation of reality as an ongoing accomplishment that takes form when people make retrospective sense of the situations in which they find themselves.

**Leadership Metaphor Explorer** Edward Elgar Publishing

J. L. Mackie selects for critical discussion six related topics which are prominent in John Locke's Essay Concerning Human Understanding: the distinction between primary and secondary qualities; representative theories of perception; substance, real essence, and nominal essence; abstract ideas, universals, and the meaning of general terms; identity, especially personal identity; and the conflict between empiricism and the doctrine of innate ideas. He examines Locke's arguments carefully, but his chief interest is in the problems themselves, which are important for our attempt to decide what sort of world we live in and

how we can defend our claim to know about it. The book shows that on most of these topics, views close to Locke's are more defensible than has commonly been supposed, but that there is nonetheless a tension in Locke's thought between extreme empiricism and common-sense or scientific realism. Whereas Locke's immediate successors, Berkeley and Hume, and many later thinkers, have stressed the empiricism at the expense of the realism, this book argues against the more extreme empiricist doctrines but supports the more moderate ones, especially the claims that innate ideas cannot be a source of necessary truth and that authoritative, autonomous knowledge of synthetic truths requires empirical support. The position J. L. Mackie advocates thus reconciles realism with moderate empiricism.

**Women Don't Ask** Oxford University Press, USA

Pfeffer argues that the world of organizations has changed in several important ways, including the increasing externalization of employment and the growing use of contingent workers; the changing size distribution of organizations, with a larger proportion of smaller organizations; the increasing influence of external capital markets on organizational decision-making and a concomitant decrease in managerial autonomy; and increasing salary inequality within organizations in the US compared both to the past and to other industrialized nations. These changes and their public policy implications make it especially important to understand organizations as social entities. But Pfeffer questions whether the research literature of organization studies has either addressed these changes and their causes or made much of a contribution to the discussion of public policy.

With the composer's consent, the manuscript was smuggled out of Soviet Russia - but Shostakovich, fearing reprisals, stipulated that the book should not appear until after his death. Ever since its publication in 1979 it has been the subject of controversy, some suggesting that Volkov invented parts of it, but most affirming that it revealed a profoundly ambivalent Shostakovich which the world had never seen before - his life at once triumphant and tragic. Either way, it remains indispensable to an understanding of Shostakovich's life and work. Testimony is intense and fiercely ironic, both plain-spoken and outspoken.
