Sea-level Change in Mesolithic Southern Scandinavia Walter de Gruyter

This book outlines the origins of Danish Capitalism and prosperity, from a poor and devastated minor state in the 19th century to a consolidated universal mixed economy welfare state at the end of the 20th century. The book argues that firm-based innovation drove Danish prosperity and redistributive capacity. It is a comprehensive

but manageable examination of the institutions and choices that shaped a highly innovative and wealthy nation. The book relies on history and economic theory, presents commonly accepted narratives and theories, and contributes new explanations.

Therefore, the book also traces both antecedents and the current state of 20th-century capitalism in Denmark and particular outcomes and critical institutions such as firm age, the labor market, and pension schemes. The book will be of interest to academics in business history and economic policy, as well as policymakers and all those interested in mixed economy studies.

Kurzgrammatik

Dänisch Dictionary of Literary Biograp
 At the height of the Cold War, the United States Army secretly began work on a base embedded deep in the Greenland ice cap: Camp Century. Officially defined as a scientific research station, this facility had an undisclosed purpose: to aim up to 600 nuclear warheads, buried in the ice, at the Soviet Union. In 1966, just six years after the camp was established, the United States gave up this provocative strategy and abandoned the base. Despite its brief life, Camp Century has been the cause of controversies from diplomatic relations between the United States and its Arctic allies, Denmark and

Greenland, to the risks of radioactive waste abandoned at the site. This book is the first comprehensive account of the U.S. Army's "city under the ice." Beginning with the Truman administration's vision of military superiority in the Arctic and continuing through present-day concerns over the effects of climate change, Kristian H. Nielsen and Henry Nielsen unravel the extraordinary history of this clandestine installation. Drawing on sources including top-secret memos and never-before-seen photographic evidence, they follow the intertwining threads of high-level politics, ice-core research, media representations, daily life beneath the ice,

and the specter of long-buried environmental problems that will one day resurface. Camp Century reveals a hidden chapter of Cold War history—and why, as the Greenland ice cap slowly melts, this story is not yet over.

Report of the Danish Biological Station to the Board of Agriculture Columbia University Press
Annotation This handbook is conceived as a comprehensive history of the North Germanic languages from the oldest times up to the present day. Whereas most of the

traditional presentations of Nordic language history are confined to individual languages and often concentrate on purely linguistic data, the present work covers the history of all Nordic languages in its totality, embedded in a broad culture-historical context. The Nordic languages are described both individually and in their mutual dependence as well as in relation to the neighboring non-Nordic languages. The handbook is not tied to a particular methodology, but keeps in principle to a pronounced methodological pluralism, encompassing all aspects of actual methodology. Moreover it combines diachronic with

synchronic-systematic aspects, longitudinal sections with cross-sections (periods such as Old Norse, transition from Old Norse to Early Modern Nordic, Early Modern Nordic 1550-1800 and so on). The description of Nordic language history is built upon a comprehensive collection of linguistic data; it consists of more than 200 articles, written by a multitude of authors from Scandinavian and German and English speaking countries. The organization of the handbook combines a central part on the detailed chronological developments and some chapters of a more general character: chapters on theory and methodology in the beginning, and on

overlapping spatio-temporal topics in the end.

Library of Congress Catalog Hueber Verlag Presents career biographies and criticism of writers from three and a half centuries of Danish literature. The literary genres range from fiction and fairy tales to philosophy.

The seabed in southern Scandinavia contains numerous traces of a submerged landscape that is thought to be the remnant of a once important habitat for Mesolithic hunter-gatherers. Large parts of this landscape were gradually flooded by rising seas between 9500 and 4000 BC and perceptions of the Maglemose culture (9500-6400 BC) have, consequently, been based almost exclusively on former inland settlements. As a result, Early and Late Mesolithic societies have been understood as almost diametrically opposed with regards to their reliance upon

marine resources and their degree of sedentism. The main objective of the book is to investigate two questions that are directly related to our current understanding of the populations of the now submerged areas: 1) Do we have a representative picture of the spread of Early Mesolithic sites in southern Scandinavia, or does the weighting towards inland sites reflect the fact that coastal sites have not been identified below present-day sea-level? 2) How did sea-level changes impact Mesolithic populations at different temporal and spatial scales, and how were these experienced from 8000-4000 BC? The book presents an extensive and up-to-date review of various

types of evidence from the Boreal period such as faunal remains, fishing instruments, $\delta^{13}C$ values in bones, settlement positions and available marine resources. These are used to discuss the extent to which marine resources were utilised in the Maglemose culture. Another central component of this book is a series of new coastline models made to determine the Mesolithic sea-level changes / coastline positions. The eight new coastline models are created to facilitate new evaluations of possible relationships between sea-level changes and cultural changes. On the basis of the new coastline models the book also presents the preliminary results of 47 diver investigations

conducted with the aim of identifying potential coastal settlements from the Maglemose culture.

Danish Capitalism in the 20th Century
Springer Nature

This is the first book to focus on Helhesten (The Hell-Horse), an avant-garde artists' collective active during the Nazi occupation of Denmark and one of the few tangible connections between radical European art groups from the 1920s to the 1960s. The Danes' deliberately unskilled painterly abstraction, embrace

of the tradition of dansk folkelighed (the popular) and its iterations of egalitarianism and consensus reform, called for the political relevance of art and interrogated the ideologies underlying culture itself. The group's cultural activism presents an alternative trajectory of continuity, which challenges the customary view of World War II as a moment of artistic rupture.
