*Hello, World! Moon Landing* Maverick  
 Arts

From writer Stacy McAnulty and  
 illustrator Stevie Lewis, *Moon! Earth's  
 Best Friend* is a light-hearted nonfiction  
 picture book about the formation and  
 history of the moon—told from the  
 perspective of the moon itself. Meet  
 Moon! She's more than just a  
 rock—she's Earth's rock, her best friend  
 she can always count on. Moon never  
 turns her back on her friend (literally:  
 she's always facing Earth with the same  
 side!). These two will stick together  
 forever. With characteristic humor and  
 charm, Stacy McAnulty channels the

voice of Moon in this next celestial  
 "autobiography" in the *Our Universe*  
 series. Rich with kid-friendly facts and  
 beautifully brought to life by Stevie  
 Lewis, this is an equally charming and  
 irresistible companion to *Earth! My First  
 4.54 Billion Years* and *Sun! One in a  
 Billion*.

Little World: to the Moon Doubleday Books for Young Readers

"One of my favorite books of the year. It completely reshaped how I think about information and how and why I take notes." —Daniel Pink, bestselling author of Drive A revolutionary approach to enhancing productivity, creating flow, and vastly increasing your ability to capture, remember, and benefit from the unprecedented amount of information all around us. For the first time in history, we have instantaneous access to the world's knowledge. There has never been a better time to learn, to contribute, and to improve ourselves. Yet, rather than feeling empowered, we are often left feeling overwhelmed by this constant influx of information. The very knowledge that was supposed to

set us free has instead led to the paralyzing stress of believing we'll never know or remember enough. Now, this eye-opening and accessible guide shows how you can easily create your own personal system for knowledge management, otherwise known as a Second Brain. As a trusted and organized digital repository of your most valued ideas, notes, and creative work synced across all your devices and platforms, a Second Brain gives you the confidence to tackle your most important projects and ambitious goals. Discover the full potential of your ideas and translate what you know into more powerful, more meaningful improvements in your work and life by Building a Second Brain.

Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and

moving final chapter of Hiroshima.
