This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

The Save a Life Initiative has just released its newest course: Basic Life Support. This manual is based on the 2015-2020 Basic Life Support guidelines published by the American Heart Association. The Basic Life Support (BLS) Provider Handbook is a comprehensive resource intended for health care professionals currently enrolled in a Basic Life Support Certification or Recertification Course. It serves as the primary training material for BLS Certification and Recertification courses. Although it is primarily intended for professionals to use during their courses, the handbook was also created to

serve as daily resource material for health care professionals. Information covered in the handbook includes Basic Life Support instruction for adults and children, AED usage, airway obstruction and rescue breathing techniques, and more. Specific Algorithms for BLS and more are also included within the handbook. All material included in this handbook is delivered in a manner meant to enhance learning in the most comprehensive and convenient way possible.

The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides information on how to manage illness and injuries in a child during the first few minutes of an emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Little League organizations, as well as parents, grandparents, and baby sitters.

Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference tool that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-choice questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings.
