NEW YORK TIMES BESTSELLER • From the Pulitzer Prize-winning critic comes an impassioned critique of America's retreat from reason We live in a time when the very idea of objective truth is mocked and discounted by the occupants of the White House. Discredited conspiracy theories and ideologies have resurfaced, proven science is once more up for debate, and Russian propaganda floods our screens. The wisdom of the crowd has usurped research and expertise, and we are each left clinging to the beliefs that best confirm our biases. How did truth become an endangered species in contemporary America? This decline

began decades ago, and in *The Death of Truth*, former New York Times critic Michiko Kakutani takes a penetrating look at the cultural forces that contributed to this gathering storm. In social media and literature, television, academia, and politics, Kakutani identifies the trends—originating on both the right and the left—that have combined to elevate subjectivity over factuality, science, and common values. And she returns us to the words of the great critics of authoritarianism, writers like George Orwell and Hannah Arendt, whose work is newly and eerily relevant. With remarkable erudition and insight, Kakutani offers a provocative diagnosis of our current condition and points toward a new path for our truth-challenged times.

A sixty-year history of Afro-South Asian musical collaborations From Beyoncé's South Asian music-inspired Super Bowl Halftime performance, to jazz artists like John and Alice Coltrane's use of Indian song structures and spirituality in their work, to Jay-Z and Missy Elliott's high-profile collaborations with diasporic South Asian artists such as the Panjabi MC and MIA, African American musicians have frequently engaged South Asian cultural productions in the development of Black music culture. *Sounds from the Other Side* traces such engagements through an interdisciplinary analysis of the political implications of African American musicians' South Asian influence since the 1960s. Elliott H. Powell asks, what happens when we consider Black musicians' South Asian sonic explorations as distinct from those of their white counterparts? He looks to Black musical genres of jazz, funk, and hip hop and examines the work of Miles Davis, John Coltrane, Rick James, OutKast, Timbaland, Beyoncé, and others, showing how Afro-South Asian music in the United States is a dynamic, complex, and contradictory cultural site where comparative racialization, transformative gender and queer

politics, and coalition politics intertwine. Powell situates this cultural history within larger global and domestic sociohistorical junctures that link African American and South Asian diasporic communities in the United States. The long historical arc of Afro-South Asian music in *Sounds from the Other Side* interprets such music-making activities as highly political endeavors, offering an essential conversation about cross-cultural musical exchanges between racially marginalized musicians.

The Dark Side of Truth (Book #1) Penguin

Steven Shapin argues that science, for all its immense authority and power, is and always has been a human endeavor, subject to human capacities and limits. Put simply, science has never been pure. To be human is to err, and we understand science better when we recognize it as the laborious achievement of fallible, imperfect, and historically situated human beings. Shapin's essays collected here include reflections on the historical relationships between science and common sense, between science and modernity, and between science and the moral order. They explore the relevance of physical and social settings in the making of scientific knowledge, the methods appropriate to understanding science historically, dietetics as a compelling site for historical inquiry, the identity of those who have made scientific knowledge, and the means by which science has acquired credibility and authority. This wide-ranging and intensely interdisciplinary collection by one of the most distinguished historians and sociologists of science represents some of the leading edges of change in the scholarly understanding of science over the past several decades.

"A loving testament to the work and reward of the best friendships, the kind where your arms can't distinguish burden from embrace." — People New York Times Bestselling author Ann Patchett's first work of nonfiction chronicling her decades-long friendship with the critically acclaimed and recently deceased author, Lucy Grealy. Ann Patchett and the late Lucy Grealy met in college in 1981, and, after enrolling in the Iowa Writer's Workshop, began a friendship that would be as defining to both

of their lives as their work. In Gealy's critically acclaimed and hugely successful memoir, *Autobiography of a Face*, she wrote about losing part of her jaw to childhood cancer, years of chemotherapy and radiation, and endless reconstructive surgeries. In *Truth & Beauty*, the story isn't Lucy's life or Ann's life, but the parts of their lives they shared together. This is a portrait of unwavering commitment that spans twenty years, from the long cold winters of the Midwest, to surgical wards, to book parties in New York. Through love, fame, drugs, and despair, this is what it means to be part of two lives that are intertwined...and what happens when one is left behind. This is a tender, brutal book about loving the person we cannot save. It is about loyalty and being uplifted by the sheer effervescence of someone who knew how to live life to the fullest.
