A Nigerian psychologist travels to a remote southern border town to uncover the truth about the murder of three university students in this "original and fast-paced thriller" (Lauren Wilkinson, author of *American Spy*). When Dr. Philip Taiwo is called on by a powerful Nigerian politician to investigate the public torture and murder of three university students in remote Port Harcourt, he has no idea that he's about to be enveloped by a perilous case that is far from cold. Philip is not a detective. He's an investigative psychologist, an academic more interested in figuring out the why of a crime than actually solving it. But when he steps off the plane and into the dizzying frenzy of the provincial airport, he soon realizes that the murder of the Okriki Three isn't as straightforward as he thought. With the help of his loyal and streetwise personal driver, Chika, Philip must work against those actively conspiring against him to parse together the truth of what happened to these students. A thrilling and atmospheric mystery, and an unforgettable portrait of the contemporary Nigerian sociopolitical landscape, *Lightseekers* is a wrenching novel tackling the porousness between the first and third worlds, the enduring strength of tribalism and homeland identity, and the human need for connection in the face of isolation.

Science-fiction author William Gibson is famously quoted as saying, "The future is already here – it's just not very evenly distributed." During the Covid pandemic, telehealth and remote monitoring were elevated from interesting innovations to essential tools in many healthcare systems, but not all countries had the infrastructure necessary to pivot quickly, amply demonstrating the negative consequences of the digital divide. This book presents the proceedings of MedInfo 2023, the 19th World Congress on Medical and Health Informatics, held from 8 - 12 July 2023 in Sydney, Australia. This series of biennial conferences provides a platform for the discussion of applied approaches to data, information, knowledge, and wisdom in health and wellness. The theme and title of MedInfo 2023 was The Future is Accessible, but the digital divide is a major concern for health and care-informatics professionals, whether because of global economic disparities, digital literacy gaps, or limited access to reliable information about health. A total of 935 submissions were received for the conference, of which 228 full papers, 43 student papers and 117 posters were accepted following a thorough peer-review process involving 279 reviewers. Topics covered include: information and knowledge management; quality, safety and outcomes; health data science; human, organizational and social aspects; and global health informatics. Significant advances in artificial intelligence, machine learning, augmented reality, virtual reality, and genomics hold great hope for future healthcare planning, delivery, management, education, evaluation, and research, and this book will be of interest to all those working to not only exploit the benefits of these technologies, but also to identify ways to overcome their associated challenges.

There's only one way home: straight through the enemy . . . An action-packed WWII tale filled with "snappy authenticity" (Kirkus Reviews). Four British commandos parachute into occupied Holland. Their mission: to delay and impede German communications long enough to cover the escape of an Allied unit a few miles away. Soon the countryside is in chaos, and the whole German army is

hunting for them. And if they miss the rendezvous with the plane sent to extract them, it's a long way home . . . The author of *The Long Day's Dying* returns with another tense, gripping story about a daring mission in Nazi-occupied Europe. "White's technical knowledge is authoritative." —Kirkus Reviews

"In the monsoons of 2012, a phantasm driven geriatrician, Dr. Suchitra Nigam, is all set to open her dream venture: Rajshree Varma Memorial Foundation, a holistic healthcare for the geriatrics. She then encounters several irregularities plaguing the medical and social scene in the country. She is further intrigued when a nonagenarian from Singapore persistently lays claims to an ardent affair withered by a deadly war, seventy years back. Was he another geriatric with clouded coherence and unfounded delusions? A heart-rending tale of love, separation, dejection, violence, compassion and corruption! A gripping story which narrates the saga of two saviours-the doctors, the soldiers and the common man. *Natal Fault* is an irresistible socio-political narrative. It is bold and beautiful; romantic and philosophical; contemporary and classic at the same time. It feels the pulse of the nation and scales a long span of Indian panorama, both contemporary and classic, as it flows and fizzles out from a drab B class fictional Indian town of Jeerulot, through a war ravaged planet to a posh Singapore."
