AVILA REBEKAH

Developing Clinical Judgment Springer Publishing Company
 About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include: Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins! Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of

mastering this content becomes apparent. Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together. Skeletons in the closet: Every house has closets and some have a few skeletons in them! Incivility and men in nursing will be explored in detail!

Educating Nurses F.A. Davis

-- A well-written and engaging introduction to nursing education and to nursing as a profession that will promote students' enthusiasm for the study and practice of nursing -- Presents the essential personal/vocational relations content taught in LPN/LVN programs in the United States and Canada, including student and professional skills, communication techniques, nursing history, ethical and legal issues, introduction to the health care system, and issues and trends -- Subjects covered include caring, empowerment, nurse as advocate, leadership/management issues, teamwork, critical thinking, and cultural diversity in nursing education and practice -- Interactive approach to subject accomplished through case studies, learning activities, and personal vignettes -- All pages are perforated and allow case studies and other exercises to be assigned as homework and handed in

Clinical Reasoning Cases in Nursing Lippincott Williams & Wilkins
Get much-needed exposure to real-world clinical scenarios and psychiatric evaluations, with this invaluable guide to positive, effective psychiatric advance practice nursing care. For an expert guide to providing patient-centered, evidence-based psychiatric care, keep *Psychiatric Case Studies for Advanced Practice* by your side. Practical and easy-to-follow, these more than 50 case scenarios clearly display the complaints, diagnoses, and treatments of the most common psychiatric disorders, supporting the critical decision-making skills of nurses practicing in a broad range of settings. Psychiatric, family, emergency, and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed, holistic practice. Follow the real-life cases and expert analysis of psychiatric patients of a wide variety of ages, backgrounds, and conditions . . . Real-world child, adolescent, adult, and geriatric inpatient and outpatient psychiatric case studies that emphasize problem-based learning and an evidence-based practice Current diagnostic content from the Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5), that includes DSM-5's newer diagnoses—gender dysphoria, binge eating disorder, and autism spectrum, plus current treatments for alcohol and opiate addiction Sample routine screening tools that offer convenient checklists and handouts to support patient treatment Content presented in a simple format—organized by age and indexed by diagnostic category for quick reference Each case presented in a standard format: chief complaint, history, mental status, diagnosis, differential diagnosis, treatment plan, and rationale for treatment prescribed—with questions at the end that guide you to create a diagnosis using the DSM-5 Cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings—counseling centers, correctional facilities, homeless shelters, inpatient psychiatric units, and hospital consultation and liaison services Treatments and rationales that represent current, evidence-based research—treatment sections divided into psychopharmacology, diagnostic tests, referral, psychotherapy, and psychoeducation Supplemental teaching tool for graduate psychiatric nurse practitioner/APN programs

Nursing Case Studies in Caring Mosby

Mastering critical thinking skills can be challenging for student nurses. Case studies help but can be flat and predictable. Instead, this book uses unfolding case studies that provide new information as the reader goes along, teaching critical skills and the knowledge to apply what is learned in nursing school to real-life on-the-job situations.

THINK Like a Nurse! Jones & Bartlett Learning

Based on real life scenarios, the Clinical Cases series presents quality case studies, complete with answers, to provide nursing students with an opportunity to explore scenarios they are likely to encounter in a variety of practice settings. *Clinical Cases: Nursing Care Case Studies* is perfect for use during exam preparation or as a study tool, providing an engaging approach to learning and revision.

Unfolding Health Assessment Case Studies for the Student Nurse

Transitioning From LPN/LVN to BSN SIGMA Theta Tau International

As the fastest growing population sector worldwide, older adults are seen in almost every care setting in which clinicians practice. Developed as a resource for advanced practice nurses in any setting, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* presents readers with a range of both typical and atypical cases from real clinical scenarios. The book is organized

into six units covering cases related to ageism, common health challenges, health promotion, environments of care, cognitive and psychological issues, and issues relating to aging and independence. Each case follows a similar format including the patient's presentation, critical thinking questions, and a thorough discussion of the case resolution through which students and clinicians can enhance their clinical reasoning skills. Designed to promote geriatric clinical education through self-assessment or classroom use, *Case Studies in Gerontological Nursing for the Advanced Practice Nurse* is a key resource for all those dedicated to improving care for older adults.

Medical-surgical Nursing Routledge

Medical-Surgical Nursing: An Integrated Approach, 2E examines all aspects of this nursing field, from how and where the health care delivery system is set up, to the nurse's role in care related to IV therapy and diagnostic testing, to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies, and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross-referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form making important information about the test, normal values and nursing responsibilities easy to find. Chapter end critical thinking questions help students apply chapter content. "Web Flash" box suggests Internet sites students can consult for additional information. Text includes a glossary, a list of abbreviations and acronyms, a listing of the latest NANDA nursing diagnoses and Standard Precautions

Gerontology Nursing Case Studies, Second Edition Elsevier

The Instructor Version provides all of the information found in the Student Version, plus suggested answers to the student questions and an Instructor's Guide, online at DavisPlus. (Available online as PDF and Microsoft Word files.)

Pediatric Nursing Elsevier Health Sciences

Deeper learning, dialogic learning, and critical thinking are essential capabilities in the 21st-century environments we now operate. Apart from being important in themselves, they are also crucial in enabling the acquisition of many other 21st-century skills/capabilities such as problem solving, collaborative learning, innovation, information and media literacy, and so on. However, the majority of teachers in schools and instructors in higher education are inadequately prepared for the task of promoting deeper learning, dialogic learning, and critical thinking in their students. This is despite the fact that there are educational researchers who are developing and evaluating strategies for such promotion. The problem is bridging the gap between the educational researchers' work and what gets conveyed to teachers and instructors as evidence-based, usable strategies. This book addresses that gap: in it, leading scholars from around the world describe strategies they have developed for successfully cultivating students' capabilities for deeper learning and transfer of what they learn, dialogic learning and effective communication, and critical thought. They explore connections in the promotion of these capabilities, and they provide, in accessible form, research evidence demonstrating the efficacy of the strategies. They also discuss answers to the questions of how and why the strategies work. A seminal resource, this book creates tangible links between innovative educational research and classroom teaching practices to address the all-important question of how we can realize our ideals for education in the 21st century. It is a must read for pre-service and in-service teachers, teacher educators and professional developers, and

educational researchers who truly care that we deliver education that will prepare and serve students for life.

A Case Studies Approach to Nursing Fundamentals Springer Publishing Company

The New Quick Facts for NCLEX® 2019 - 2022 is for both RN & LPN nursing students ! The Five-Star Edition features the best content for Pharmacology, newly added Clinical Skills section, and case studies. Every nursing student needs Quick Facts! It's the perfect tool to build your core nursing content from day one of school all the way through beginning your NCLEX Prep. If you don't know Quick Facts you're not ready for NCLEX. Students love to call this their 'Nursing Bible' because they take it everywhere they go! Quick Facts is your starting place for NCLEX Prep and the foundation of the ReMar NCLEX Virtual Training System!

The Remar Review Quick Facts for NCLEX 2019-2022 Jones & Bartlett Learning

Gain valuable experience applying your knowledge and critical thinking skills to real-world scenarios! *Case Studies in LPN/LVN Nursing* features 50 case studies that cover all clinical areas of practice: fundamental skills, medical-surgical adult health nursing, pediatric, maternity, mental health, geriatric nursing, and leadership management. Patient scenarios help you learn how to apply nursing knowledge to nursing practice by promoting the development of critical thinking and clinical reasoning skills. Cases integrate content on assessment findings, diagnostic/laboratory tests, pharmacology, and nutrition to encourage you to think critically about all aspects of patient care, including the physical and psychosocial needs of the patient, communication, collaboration with the health care team, teaching wellness and health promotion, and integration of cultural competence. Cases unfold as care is provided and a variety of multiple-choice, select-all-that-apply, prioritization, and short-answer questions challenge you to formulate and select relevant and/or potential decisions. The case studies are separated by clinical area, allowing you to use this worktext throughout your nursing program. Questions for the Next-Generation NCLEX(R) (NGN) prepare you for the biggest change to the NCLEX-PN(R) test plan to date. Answer keys are available to instructors on our accompanying Evolve website. Fifty case studies cover patient scenarios that span the entire LPN/LVN curriculum. Unfolding case progressions help you learn to identify changes, anticipate outcomes, and prioritize care. Emphasis on interprofessional collaboration builds your communication and delegation skills. A variety of question formats reinforce critical thinking and help you prepare for the NCLEX-PN(R) exam. Documentation questions challenge you to identify critical information to chart.

Nursing Case Studies Springer Publishing Company

This is a unique case study reference for students in the medical surgical nursing core course and a review/workbook for students about to embark on the NCLEX-RN exam. Unlike other reviews, the book embeds required information into compelling, unfolding case studies—studies that evolve over time—in order to promote active learning and facilitate knowledge retention. These unfolding case studies are of particular value because they closely mimic real-life situations in nursing and provide situational mental models that assist students with problem-solving and critical thinking techniques. The unfolding case study method also assists in the development of skills that are important for NCLEX-RN success in assessment, planning, intervention, and evaluation of patient care. All content areas required for NCLEX-RN success—safe and effective care, health promotion, physiological and psychological integrity—are interwoven in an enjoyable format that dispels the drudgery of straightforward memorization. A variety of NCLEX-style question formats are used throughout the book to help students assess

their own learning. Additionally, eResource links to additional information are included throughout the book. Key Features: Uses unique unfolding case study method to present medical-surgical concepts Promotes active learning and knowledge retention Develops problem-solving and critical thinking skills Provides all of types of NCLEX-style questions for exam preparation Offers eResources throughout the Review for enhanced learning opportunities

Leadership and Management in Nursing Test Success Springer Publishing Company

Written by nurse practitioners for nurse practitioners in collaboration with a physician, this popular text builds a solid understanding of the theoretical foundation of nursing practice, while also providing comprehensive patient-care guidance based on the latest scientific evidence.

Simulation Scenarios for Nursing Education Mosby

This volume in the Content Review Plus Practice Series polishes your knowledge of pediatric nursing while sharpening your critical thinking and test-taking skills. Each chapter offers a concise, yet comprehensive review of the topic, followed by NCLEX-style questions in both multiple-choice and alternate-item formats. Rationales for both correct and incorrect answers, as well as test-taking tips, explain how to apply critical thinking to the question types—great preparation for classroom exams and the NCLEX-RN® Exam.

Case Studies in Cultural Diversity Cengage Learning

A collection of case studies for nursing students and practitioners offers 148 examples that foster creative thinking skills in medical-surgical, pediatric, maternity and psychiatric situations.

Case Studies in LPN/LVN Nursing E-Book Springer Publishing Company

Connect nursing theory to clinical practice with 46 in-depth, real-world case studies. For each case study, answer questions that call on you to recall facts, understand nursing concepts, apply critical thinking, and sharpen your clinical reasoning skills in common clinical situations.

The LPN's Companion Springer Publishing Company

Uncovers the art and science of nursing grounded in caring for all nursing situations Grounded in the belief that caring is the central domain of nursing, this innovative book presents a new approach to "nursing situations." These are case studies depicting shared lived experiences between the nurse and patient that are studied from various theoretical perspectives. They are designed to foster a nursing student's ability to care effectively for a patient, family, or group. Each case study features a compelling scenario that engages the reader to feel and fully participate in the caring experience. The book presents a variety of situations that new and experienced nurses are likely to encounter, many of which present scenarios that require caring for a patient under difficult or complex circumstances. The book addresses the need, as defined by leading health care and nursing education organizations, for the study of nursing from a contextual, story-oriented perspective. It is based on the Barry, Gordon & King Teaching/Learning Nursing Framework, developed as a guide to uncover the art and science of nursing grounded in caring in all nursing situations. Following a description of the framework's foundational concepts, the text describes how to use nursing situations to facilitate learning. The scenarios offer detailed, practical strategies for analyzing nursing situations in ways that bring to life the simple and complex practice of nursing grounded in caring. These real-life stories also help students understand the impact of health conditions on individuals and families, thereby fostering empathy. Case studies address nursing situations across a variety of populations, health concerns, and practice settings. Using multiple ways of knowing and

understanding, each scenario concludes with direct and reflective questions that help students develop nursing knowledge and skills. The book serves as a core resource for nurse educators and students at all levels seeking to study the art and science of nursing grounded in caring. Additionally, the book is a resource for in-service educators in health care systems that specifically address caring as an essential value for practice. KEY FEATURES: Delivers a new approach to nursing education focusing on the context of caring between nurse and patient Presents a collection of real-life nursing scenarios designed to foster caring knowledge and skills under all circumstances Offers detailed, practical strategies for analyzing nursing situations to aid in learning the practice of nursing grounded in caring Helps students to understand the impact of health conditions on individuals and families

Winningham and Preusser's Critical Thinking Cases in Nursing John Wiley & Sons

Resource added for the Nursing-Associate Degree 105431, Practical Nursing 315431, and Nursing Assistant 305431 programs.

Primary Care National Academies Press

Med-Surg Success in the Palm of Your Hand Master the art of critical thinking and clinical reasoning with this book designed to help you develop and utilize the nursing process and prioritization

in real to life case studies surrounding the most commonly seen and tested patient diagnosis. After Reading This Book You Will Improve your clinical reasoning skills Develop confidence in answering difficult Med-Surg questions Become familiar with the most common patient disorders Learn how to answer hard NCLEX(R) style questions Improve prioritization skills Master the nursing process in clinical settings Case Study Layout Client case presentation Questions regarding client background Case progression Additional critical thinking questions Rational Each case study includes 8-15 questions that require you to think beyond the most simple rational. Case studies also include highly detailed and in depth rationales (over 500 words) to insure that you are learning as much as possible about the disease process. Disease Processes Covered in this Book Congestive Heart Failure Ischemic Stroke Pneumothorax Hypertensive Crisis End Stage Renal Disease Cirrhosis Acute MI (STEMI) Hypothyroidism End Stage Renal Disease COPD Seizure Disorder Sepsis CABG Pancreatitis Respiratory Acidosis The selection process for the 15 diseases covered in this book included drawing on my experience as a CCRN in a large metropolitan ICU, speaking with other nurses in various specialties, referring to a mountain of NCLEX(R) prep books, reviewing CCRN study materials, speaking with physicians, and reviewing NIH (National Institute of Health) data regarding the most commonly presenting conditions in hospitals.
