In 2022, the 100th anniversary of the so-called "Critical Theory," the antithesis of "Traditional

Theory", was celebrated. 100 years ago, the first founding memorandum of the Institute for Social Research in Frankfurt was written. In 2022, the world and legal theory are surprised by numerous new challenges, such as a war as not been seen for a long time, which requires an uprising to resignify the Critical Theory and its relevance within theories of justice and freedom, as well as a celebration of truly critical dialogues. The present collection brings together experienced legal theory researchers, who revive the critical theory from the current demands of law. Critical thinkers have been developing reflections on capitalism in a way that considers not just economic perspectives, but also individual's social and cultural spheres of life.

Study of a magnetic gearbox for energy storage system application. Contains simulation results and tests carried out to verify the behavior of the torque output as a function of geometric and operation parameters. Focused on magnetic gearboxes with gains of 10 times or higher operating at high speed.

When transnational couples split, one of the parents wants to reestablish the status quo ante. But now there is a child. Rodrigo Meira brings to light this problem in Brazil and delivered the first research that has delved into the court files, with a view to understanding international abduction in Brazil. The author worked at the Brazilian Central Authority and is concluding his PhD in International Law, in which he examines Brazilian compliance, analyzing cases from 2002 to 2022 and interviewing other professionals who deal everyday with the problem. Meira shows what lies behind this procedural slowness, critically analyzing the culture of biased interpretation by procedural means. He also suggests good points for future changes in Brazilian Law. A compelling bestseller for students, undergraduate and graduate, treating core issues from a lawyer's perspective. Rather than responding to child abduction with strict legal proceedings, the work argues that national solutions must be met, based on previous international experience. The Long and Winding Lawsuit is also a vade mecum for practitioners desiring a solid footing to make further enquiries on international child abduction in Brazil. This eye-opening book overlaps the lack of information on international abduction and explains the resilience of Brazilian Judiciary to comply

with the conventional terms, suggesting what can be done to change this profile.

The ability of sports federations to self-regulate is a profession of faith in the governance of global sports, even as a defense measure against attempts at political appropriation of the virtues of sports ideas, especially by autocratic or totalitarian regimes, as seen, for example, in "Nazification" of the aesthetics of the Berlin Olympic Games in 1936, or the use of sport as a piece of propaganda during the Cold War, in the second half of the 20th century. However, the possible hypocrisy of the discourse of an alleged purity of ideals defended by sporting autonomy has been exposed by successive episodes of abuse and corruption by sector leaders, at the most diverse levels, generating government reactions in order to issue norms that allow a greater degree of state intervention in sport. Given this situation, the work proposes governance standards that can preserve sports self-regulation, especially from the point of view of democratization of national and international federations and in light of the regulatory innovations issued by FIFA and the International Olympic Committee, in reaction to the episodes that undermine the credibility of global sports governance.

A practical guide that will deeply change the way you negotiate and make decisions in a negotiation! Who has never felt vulnerable after a negotiation after realizing that they did not recognize a tactic their counterpart used? Just like in a game of chess, negotiation tactics are intentional practices adopted during negotiations in order to produce the desired and predetermined effects on the counterpart you are negotiating with. For this reason, it is vital to know them, both to improve your understanding of the scenario in which you are negotiating and to know how and when to use them in order to maximize the desired results. This book compiles the 48 most powerful negotiation tactics, constituting a practical guide that presents not only the description of each tactic but also the explanation of how and why they work, their desired effects, examples of applications, and, mainly, how to neutralize them when they are used against you. Once you have finished reading, you will certainly be better prepared to understand the negotiations in which you will participate, as well as have at your disposal a real guide to facilitate your decision on how to act during them. In short: this book is a must-have, it is a practical guide to always have on your side to be ready and willing to negotiate.

A sociedade contemporânea é profundamente marcada pela presença das tecnologias digitais e pelo desenvolvimento do ciberespaço como "terreno virtual" de comunicação e interação que transcende as fronteiras dos Estados e questiona as suas capacidades de controlo. Não surpreende que esta mudança suscite desafios essenciais ao direito e aos direitos e reclame um debate sobre os modelos regulatórios mais apropriados. Focado no Ciberdireito da União Europeia, este livro oferece uma análise fundamentada sobre a resposta do direito à revolução digital no que respeita à proteção de liberdades e direitos fundamentais e à regulação da economia digital. O livro é o fruto de décadas de investigação e ensino da autora sobre o novo - e inovador - campo do direito que emergiu da grande transformação impulsionada pelas tecnologias digitais e do imperativo de a regular.

Esta é a história de um professor universitário americano que decide voltar para o seu país. Seu objetivo é modificar a estrutura educacional de um país pobre, que ele deixou aos 18 anos, após acontecimentos trágicos em sua vida. Em sua jornada, ele descobre suas surpreendentes origens e tem os seus valores testados. Seu presente se mistura com o seu passado de forma constante. Os personagens dessa história, com diferentes idades e realidades, se identificam com muitos de nós pelos seus conflitos e características pessoais. Esta obra contribui para algumas reflexões necessárias sobre objetivos de vida e valores, nos levando à seguinte reflexão: "Quem somos nós?" That is the story of an American university professor who decides to return to his country.

His objective is to change the educational structure of his poor country, which he left at the age of 18, after tragic events in his life. On his journey, he discovers his surprising origins and has his values tested. His present mixes with his past constantly. The characters in this story, with different ages and realities, resemble many of us because of their conflicts and personal characteristics. This work contributes to some necessary reflections on life goals and values, leading us to the following reflection: "Who are we?"

Social dialogue and labour inspection are essential to promote and achieve decent work and are also important in times of crisis. After a brief historical review of social dialogue in Brazil in recent years, the experience of the Brazilian labour inspection in dealing with the crisis caused by the new coronavirus pandemic is described and later compared with the practices adopted by labour inspectorates in other countries. Data collection includes interviews with two social partners and an international survey with the participation of representatives from twelve countries. In the end, guidelines are proposed on how the performance of labour inspection and the use of social dialogue should be in the face of a crisis with negative economic effects in order to overcome it quickly and without major problems, generating beneficial and lasting results in the world of work and helping to recover the economy.

THE DIGITAL ENVIRONMENT HAS NO BOUNDARIES. A new business model, product or technological service emerges all the time. Along with the facilitation and solutions brought by technological development, new problems, conflicts and litigation in social and economic relations also arise. Laws of several countries are not often able to keep up with the digital dynamism. Furthermore, there is not a consensus in international trade organisations on the concept of digital services and electronic commerce. That is the scenario in which the European Union has constantly developed rules to regulate the digital environment, ensuring and combining legal security and standardisation of rules with the practical advantages of these new social and trade relations, stimulating innovation and economic growth. While the WTO and the OECD have not reached a consensus on this matter, the EU has been influencing rules around the world and adding chapters on electronic commerce to its deep integration trade agreements with third countries. The book analyses EU regulations regarding the online environment such as personal data protection, electronic commerce, electronic contract, electronic signature and identification, advertising, digital services, consumer rights, and taxation. It addresses several decisions made by the Court of Justice and national courts of the EU. The influence of the EU in Mercosur is demonstrated through the analysis of laws and jurisprudence of Mercosur countries.

This research evaluates whether the new model of investment agreement developed by Brazil (CFIA) is a mechanism for enhancing protection and respect for social and economic rights. The research starts by exploring the origins of investment treaties, their development and main characteristics. It examines why investment treaties and socio-economic rights are related, by mapping cases in which investment treaties have already impaired the protection of such rights. The research then analyzes how these two issues shall be jointly handled. It considers international organizations? initiatives to regulate business and human rights and investment treaties? frameworks that foster sustainable development, as well as new investment agreements? models developed by different countries, and then suggests criteria for evaluating whether an investment treaty is adequate from the socio-economic rights standpoint. Finally, this research investigates the CFIA model, brings a brief historical overview, evaluates CFIA's? wording, and examines how some CFIA's? institutional mechanisms consider corporate social responsibility issues. In conclusion, this research asserts that the CFIA model can be a mechanism for enhancing protection and respect for socio-economic rights, but some concerns (particularly related to safeguarding States? regulatory space and providing for stronger obligations to investors and States to protect human rights) need to be addressed.

At present, a highly efficient tool for organic synthesis is the combination of organocatalytic and multicomponent processes. In the organocatalysis reaction it is possible to generate a reactive intermediate with high enantioselectivity and later, in the multicomponent stage, the complexity and structural diversity of the process increases. This strategy allows the synthesis of various analogues of optically active natural compounds and biologically relevant molecules of pharmacological interest, which are essential for human life. The current study, which is divided into three chapters, describes a methodology for the synthesis of tetrasubstituted cliclopentene derivatives from an organocatalytic reaction, followed by a multicomponent Ugi-type reaction under continuous flow regime. The use of green solvents in each reaction step, as well as the adoption of flow chemistry, led to obtaining products with high yield and enantiomerically-enriched in a fast and efficient manner, allowing the development of more sustainable strategies in synthetic chemistry.

This master's thesis approaches the heroes in George R. R. Martin's "A Song of Ice and Fire", analyzing the journeys of Eddard Stark, Quentyn Martell, Jon Snow, and Daenerys Targaryen. The application of Campbell's famous Monomyth, or Hero's Journey, did not prove particularly successful when it comes to this series, which leads to a series of ponderations about its universality and the role point of view plays in this debate. "A Song of Ice and Fire" is a masterpiece of fantasy literature that helps scholars to rethink axioms they have been taking for granted for decades, and there is still much more to be said about it.
