The idea of the maze taps into so many subconscious notions: the game, the quest, the spiritual journey. Perhaps this is the key to their enduring appeal. This beautifully illustrated book will delight lovers of mazes, acting as a guide, directory, and puzzle book combined. Specially commissioned illustrations by Thibaud Hérem represent 60 real and imagined mazes from around the world, with a bird's eye view of each maze so that readers can make their own journey. A pioneering scientist writes of the fascinating ecological and pharmaceutical properties of trees, and how mother trees nourish younger trees and help them defend themselves - the inspiration for the documentary *Call of the Forest: The Forgotten Wisdom of Trees* Renowned scientist Diana Beresford-Kroeger presents an unforgettable and highly original work of natural history with *The Global Forest*. She explores the fascinating and largely untapped ecological and pharmaceutical properties of trees: leaves that can comb the air of particulate pollution, fatty acids in the nuts of hickory and walnut trees that promote brain development, the compound in the water ash that helps prevent cancer, aerosols in pine trees that calm nerves. In precise, imaginative, and poetic prose, she describes the complexity and beauty of forests, as well as the environmental dangers they face. The author's indisputable passion for her subject matter will inspire readers to look at trees, and at their own connection to the natural world, with newfound awe.

(Piano Solo Songbook). "I think there is a similarity between the infinite big and the infinite smallness of everything," says Yann Tiersen. "It's the same experiment looking through a microscope as it is a telescope." Named after a chapel in a small village on the island of Ushant, Kerber marks a new chapter in critically-acclaimed composer Yann Tiersen's career. A chapter still true to Tiersen's nuanced and subtle approach but one that sets out with his most overtly electronic material to date. Beautifully textured, highly immersive and thoughtfully constructed, Tiersen creates an electronic world, providing an environment in which the piano source exists. A sense of place has often been a central theme in Tiersen's work and here that is no different. Each track is tied to a place mapping out the immediate landscape that surrounds Tiersen's home, linking back to his thoughts on the possibilities of the infinite smallness. This official, exclusive folio is beautifully printed on high-quality, uncoated paper with striking graphic artwork. All seven pieces are presented for solo piano and follow an exclusive introduction to the project.

The great French Marxist philosopher weighs up the contributions of the three major critics of modernity. With the translation of Lefebvre's philosophical writings, his stature in the English-speaking world continues to grow. Though certainly within the Marxist tradition, he consistently saw Marx as an 'unavoidable, necessary, but insufficient starting point'. Unsurprisingly, Lefebvre always insisted on the importance of Hegel to understanding Marx. But the imposing Metaphilosophy also suggested the significance he ascribed to Nietzsche, in the 'realm of shadows' through which philosophy seeks to think the world. Lefebvre proposes here that the modern world is at the same time Hegelian in terms of the state; Marxist in terms of the social and society; and Nietzschean in terms of civilization and its values. As early as 1939, Lefebvre pioneered a French reading of Nietzsche that rejected the philosopher's appropriation by fascism, bringing out the tragic implications of Nietzsche's proclamation that 'God is dead' long before this approach was followed by such later writers as Foucault, Derrida and Deleuze. Forty years later, in the last of his philosophical writings, Lefebvre juxtaposes the contributions of the three great thinkers, in a text whose themes remain surprisingly relevant today.

Intimate Metropolis explores connections between the modern city, its architecture, and its citizens, by questioning traditional conceptualizations of public and private. Rather than focusing purely on public spaces—such as streets, cafés, gardens, or department stores—on the domestic sphere, the book investigates those spaces and practices that engage both the urban and the domestic, the public and the private. The legal, political and administrative frameworks of urban life are seen as constituting private individuals' sense of self, in a wide range of European and world cities from Amsterdam and Barcelona to London and Chicago. Providing authoritative new perspectives on individual citizenship as it relates to both public and private space, in-depth case studies of major European, American and other world cities and written by an international set of contributors, this volume is key reading for all students of architecture.

The Character Conundrum is a practical guide for developing confidence, independence and resilience in primary and secondary classrooms. Tackling the hotly-contested question of what role schools can play in developing 'character', the book untangles the big debates in this area and outlines how teachers can support their pupils to develop the skills and mindsets that will help them to thrive academically. Based on a combination of ground-level investigations and academic research, the book offers a simple, evidence-based approach that can be implemented at every level of school life. The key to this approach is being deliberate and consistent: knowing which mindsets, skills and habits you're trying to develop, and planning the details of your classroom culture, relationships, routines and instruction so that they align and combine to address your aims. When you do this, the author contends, seemingly minor changes to your practice can have a major effect on pupils. The book contains a step-by-step guide to bringing this approach to life in your classroom, including a framework of pupil outcomes, a flowchart of teacher actions, classroom case studies and a wealth of tried-and-tested strategies from primary and secondary schools across the UK. A lack of confidence, independence and resilience is a major barrier to learning for many pupils and dilutes other efforts that schools make to support them. The Character Conundrum argues that teachers can help pupils develop these characteristics in any school context and illustrates how they can do so within and through their day to day teaching. Written with passion and clarity, it will be essential reading for primary and secondary teachers, as well as policy makers with an interest in 'character', grit and resilience, and any education professionals committed to giving students greater ownership of their learning and setting them up to succeed.

The burial tumulus of Lofkend lies in one of the richest archaeological areas of Albania (ancient "Illyria"), home to a number of burial tumuli spanning the Bronze and Iron Ages of later prehistory. Some were robbed long ago, others were reused for modern burials; few were excavated under scientific conditions. Modern understanding of the pre- and protohistory of Illyria has largely been shaped by the contents of such burial mounds. What inspired the systematic exploration of Lofkend by UCLA was more than the promise of an unlooted necropolis; it was also a chance to revisit the significance of this tumulus and its fellows for the emergence of urbanism and complexity in ancient Illyria. In addition to artifacts, the recovery of surviving plant remains, bones, and other organic material contribute insights into the environmental and ecological history of the region.

Milan Systemic Family Therapy Jonglez

This long-awaited book is the first to offer a complete and clear presentation of the therapy of the Milan Associates, Luigi Boscolo and Gianfranco Cecchin. Based on cybernetic theory, their work has had dramatic success in helping families change behavior. This practical and enlightening book uses clinical cases and the fascinating conversations among the four authors to examine the relationship between Milan theory and practice. Transcripts of sessions conducted by Boscolo and Cecchin—which include a family that is hiding a history of incest and one dominated by an anorectic girl—provide vivid examples of family interaction and therapeutic imagination. In the accompanying conversations with Boscolo and Cecchin about these sessions, Hoffman and Penn take us behind the scenes to show how the therapists think through and conduct their therapy. These highly readable conversations clarify the essentials of the therapy, including hypothesizing, circular questioning, positive connotation, and crafting interventions. Like Milan therapy itself, the interviews are recursive; new ideas about the therapy feed back into the conversations and stimulate further revelations. A lengthy introduction sets the Milan approach in historical context, and introductions to the individual cases highlight the main ideas.
