How can you determine if someone is telling the truth? Did Thalia Thalassos try to kill her cheating husband, despite her denials? Why is nurse Bryce Gilbertson giving a false name to visitors as he roams hospital hallways with a deadly syringe in his pocket? In this sixth Tarot Mystery, Xana Bard must use her tarot-trained intuition to unravel the truth from its nest of lies, and along the way learn more about golf tournaments and long-distance horse races than she, or anyone else, cares to know.

Large Print Edition of the true account of the 2017-2018 solo non-stop circumnavigation by Jerome Rand aboard the Westsail 32 "Mighty Sparrow". A testament to endurance and adventure, this memoir recounts what life is like aboard a small sailboat during a 271 day voyage around the globe, alone and without stopping. One of the greatest challenges of both body and mind, the author will take you onboard during the good times and the bad. As one of only a handful of people to have ever succeed in such a small boat, this story is truly the adventure of a lifetime.

Everyone dreams of tropical escape. But what happens when you escape for too long? Imagine spending 24 hours a day with your spouse in 31 not-so-square feet . . . for years; crossing the Pacific Ocean on two gallons of fuel; and tossing spaghetti marinara around your living room, then cleaning it up while bouncing like ice in a martini shaker. *Tightwads on the Loose* tells the story of Wendy and Garth, lured to sea by the promise of adventure. They buy a 31-foot boat that fits their budget better than it fits Garth's large frame and set sail for an open-ended voyage, never imagining they'd be gone seven years, or cover 34,000 miles at the pace of a fast walk. They live without most "necessities" and learn that teamwork and a sense of humor matter most as they face endless "character-building opportunities." They make a long-anticipated visit to the island where Garth had been shipwrecked as a teenager, only to find it had become a penal colony. An electronic catastrophe in the Solomon Islands leaves them without navigation equipment, which forces them to trade their free-wheeling lifestyle for one that seems straight out of a '60s sitcom: jobs at a U.S. Army base in the Marshall Islands. In Asia, they dodge typhoons and ships that threaten to turn their home into kindling. Finally they endure a grueling 49-day nonstop ocean crossing. None of this prepares them for their arrival "home" to a post-9/11 America which leaves them wondering what had changed more, them or the world. *Tightwads on the Loose* offers a fun read to the armchair adventurer -- or anyone afflicted with wanderlust.

Bruce Cable owns a popular bookstore in the sleepy resort town of Santa Rosa on Camino Island in Florida. He makes his real money, though, as a prominent dealer in rare books. Very few people know that he occasionally dabbles in the black market of stolen books and manuscripts. Mercer Mann is a young novelist with a severe case of writer's block who has recently been laid off from her teaching position. She is approached by an elegant, mysterious woman working for an even more mysterious company. A generous offer of money convinces Mercer to go undercover and infiltrate Bruce Cable's circle of literary friends, ideally getting close enough to him to learn his secrets. Hurricane Michael may have taken away some of the landmarks, but these images reveal the history of Florida's Mexico Beach, once known as the "Unforgettable Coast". As French interests in the Americas dwindled, records indicate very little activity around Mexico Beach until rumors of buried riches and sunken ships brought treasure hunters to the coast. In the early 1900s, businessman Felix du Pont purchased the land known today as Mexico Beach. Resin to make turpentine was harvested from the native pine trees, and fishermen could not resist the migratory fish passing through the area's waters. By the 1930s, US Highway 98 was completed, and visitors could finally reach the sugar-soft sand beaches of the "Unforgettable Coast." By 1941, Tyndall Field was constructed and became a training site for Air Force pilots. In 1946, a group of farsighted businessmen, led by Gordon Parker, W.T. McGowan, and J.W. Wainwright, purchased 1,850 acres along the beach for \$65,000. Parker's son Charlie moved to the area in 1949 with his wife, Inky, and their family. He soon took over development responsibilities for the Mexico Beach Corporation and laid the groundwork for the beach town known and loved today. Charlie went on to become the city's first mayor and a lifelong advocate of the family-friendly community.

Saving Sailing makes an eloquent case for the revival of family sailing -- and similar uses of free time for lifelong pastimes that

enrich our lives. The issue: participation in sailing is declining in America, down more than 40% since 1997 and 70% since 1979. In this wide-ranging book, researcher and avid sailor Nicholas Hayes explains why. The book shows how pressures on free time have increased, and how, in response, many Americans have turned to less rewarding forms of passive or overly structured activities and away from lifelong, family-based, multi-generational recreation. *Saving Sailing* builds a case for choosing how to spend free time better, seeking quality experiences with families and friends through lifelong pastimes like sailing. The main challenge, he suggests, is to develop an active system of mentoring, especially between generations. The lessons are broader than sailing, with useful ideas for all parents, for anyone seeking to strengthen the social fabric of American communities, and for those involved in programming for youth and adult activities. Author Nick Hayes is a market researcher and partner at the consulting firm FiveTwelve Group, and is active in the Milwaukee sailing scene. He has studied sailing, sailors, and sailing clubs for years, and interviewed more than 1,200 sailors worldwide since 2003 for this book. He lives in Milwaukee, Wisconsin.

Nigel Calder, a diesel mechanic for more than 25 years, is also a boatbuilder, cabinetmaker, and machinist. He and his wife built their own cruising sailboat, *Nada*, a project they completed in 1984. Calder is author of numerous articles for *Yachting Monthly* and many other magazines worldwide, as well as the bestselling *Boatowner's Practical and Technical Cruising Manual* and *Boatowner's Mechanical and Electrical Manual*, both published by Adlard Coles Nautical. Here, in this goldmine of a book, is everything the reader needs to keep their diesel engine running cleanly and efficiently. It explains how diesel engines work, defines new terms, and lifts the veil of mystery that surrounds such engines. Clear and logical, this extensively illustrated guide will enable the reader to be their own diesel mechanic. As Nigel Calder says: 'there is no reason for a boatowner not to have a troublefree relationship with a diesel engine. All one needs is to set the engine up correctly in the first place, to pay attention to routine maintenance, to have the knowledge to spot early warning signs of impending trouble, and to have the ability to correct small ones before they become large ones.'
