HARRISON BLACKBURN

Diercke International Atlas. Universalatlas - Englisch Longman

Students will . *enjoy their course with the inspiring and up-to-date topics and Culture Shocks' sections. *be motivated and confident with activities that help learners both understand and internalise grammar rules and avoid common mistakes *be able to speak easily with a syllabus that focuses on communication in real-world contexts and vocabulary. *are extensively prepared for school-leaving exams with a clear syllabus supported by exam practice and exam strategies. Teachers .. *can make every lesson different with the variety of material in the Student's Book, the video, the CD-ROM, photocopiables and tests. *can easily adapt lessons and tests with photocopiables and the Testmaster CD-ROM. SUCCESS. It's all in the name

Just Go for it HAK/HUM 5 Harvard University Press

All students want to succeed. All teachers want to create great lessons. Success gives them the opportunity.

Experiments in Ethics

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about

character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.
