*The Silent Feminists* Springer

Taking up questions and issues in early chant studies, this volume of essays addresses some of the topics raised in James McKinnon's *The Advent Project: The Later Seventh-Century Creation of the Roman Mass*, the last book before his untimely death in February 1999. A distinguished group of chant scholars examine the formation of the liturgy, issues of theory and notation, and Carolingian and post-Carolingian chant. Special studies include the origins of musical notations, nuances of early chant performance (with accompanying downloadable resources), musical style and liturgical structure in the early Divine Office, and new sources for Old-Roman chant. *Western Plainchant in the First Millennium* offers new information and new insights about a period of crucial importance in the growth of the liturgy and music of the Western Church.

Anthropology and Development Springer Science & Business Media

A timely and captivating account of America's first women directors who, with little recognition, helped pave the way for females in the film industry today. Originally published in 1977 as *Early Women Directors*, Anthony Slide's *The Silent Feminists* was the first volume to recognize and honor the work of female directors in the American silent film industry. With a new foreword by the author, this invaluable resource documents these pioneering women's lives and careers and provides an introduction to the notable yet often overlooked history of female film directors. It introduces readers to such trailblazers of the motion picture as Alice Guy Blaché, Lois Weber, Mrs. Wallace Reid, Ida May Park, Margery Wilson, and many others. More than forty years after its original publication, *The Silent Feminists* remains an important and influential study, providing original documentation on a subject that has steadily and deservedly

grown in significance.

**Singapore Cinema** Routledge

In this collection of poems, farmers, fathers, poverty-stricken pioneers, and people blackened by the grist of the sugar mills are exposed to the blazing midday sun of Murray's linguistic powers. Richly inventive, tenderly perceptive, and fiercely honest, these poems surprise and bare the human in all of us.

**The Genus Alexandrium Halim (Dinoflagellata)** Farrar, Straus and Giroux

This book presents a state-of-the-art overview of the relationship between globalization studies and literature and literary studies, and the bearing that they have on each other. It engages with the manner in which globalization is thematized in literary works, examines the relationship between globalization theory and literary theory, and discusses the impact of globalization processes on the production and reception of literary texts.

Suman Gupta argues that, while literature has registered globalization processes in relevant ways, there has been a missed articulation between globalization studies and literary studies. Examples are given of some of the ways in which this slippage is now being addressed and may be taken forward, taking up such themes as the manner in which anti-globalization protests and world cities have figured in literary works; the ways in which theories of postmodernism and postcolonialism, familiar in literary

studies, have diverged from and converged with globalization studies; and how industries to do with the circulation of literature are becoming globalized. This book is intended for university-level students and teachers, researchers, and other informed readers with an interest in the above issues, and serves as both a survey of the field and an intervention within it.

*Choral Conducting: Philosophy and Practice, Second Edition* is an updated resource for conductors and singers alike, a college-level text for students of choral conducting that considers conducting and singing from a holistic perspective. This singer-friendly and voice-healthy approach examines the rehearsal environment alongside its musical performance counterpart. The author explores what is involved in leading a choral group, examining theories of learning and human behavior to understand the impact choral conductors have on the act of singing. Divided into two main parts—Philosophy and Practice—the text begins with an historical look at conducting, exploring questions of why people sing and why they sing together, and ultimately presents the application of this philosophy, showing how a conductor's gestures and patterns can influence vocal outcomes. In addressing how singers learn and respond to choral music, as well as how conductors communicate with singers in rehearsal and performance, *Choral Conducting* turns an eye to learning how we learn and the role successful choral conductors play in motivating singers, developing healthy singing habits, and improving individual and ensemble vocal quality—all with the aims of enhancing musical understanding. New to this edition: Updated diagrams, photos, and musical examples Revised sample choral programs Increased consideration of the orchestral conductor A renewed focus on the intersections of learning, health and well-being, and the social perspective, supported by new and recent research

**Ukrainians in America** University of Illinois Press

This book re-establishes the relevance of mainstream anthropological (and sociological) approaches to development processes and simultaneously recognizes that contemporary development ought to be anthropology's principal area of study. Professor de Sardan argues for a socio-anthropology of change

and development that is a deeply empirical, multidimensional, diachronic study of social groups and their interactions. The Introduction provides a thought-provoking examination of the principal new approaches that have emerged in the discipline during the 1990s. Part I then makes clear the complexity of social change and development, and the ways in which socio-anthropology can measure up to the challenge of this complexity. Part II looks more closely at some of the leading variables involved in the development process, including relations of production; the logics of social action; the nature of knowledge; forms of mediation; and 'political' strategies.

*Antidepressants: Past, Present and Future* B. T. Batsford Limited  
John Ernest offers a comprehensive survey of the broad-ranging and influential African American organizations and networks formed in the North in the late eighteenth century through the end of the Civil War. He examines fraternal organizations, churches, conventions, mutual aid benefit and literary societies, educational organizations, newspapers, and magazines. Ernest argues these organizations demonstrate how African Americans self-definition was not solely determined by slavery as they tried to create organizations in the hope of creating a community.

This study of the dioscorea genus or yam, consisting of 600 species, is a synthesis of new information. In this world of famine, the yam must play a leading role in the regions it is grown. Its cultivation may even increase once the problems which this book highlights have been resolved. The text fills a critical gap, summarizing what is known about the yam; it is also significant because it asks many questions, and encourages further

experimentation.

needs.

*The Fundamental Principles of Old and New World Civilizations* Zed Books Ltd.

The period covered by this book, 31 B.C. to A.D. 193, is often referred to as the Golden Age of the Roman Empire. In his scholarly reappraisal Professor Paul Petit challenges many long-held assumptions. Drawing on a wide range of sources he discusses some of the contemporary social and economic problems and shows how the period was in many respects as fraught with tension and difficulties as the later Empire.

*Subhuman Redneck Poems* Rowman & Littlefield

Looks at choruses not only as a source of music, but as organizations that come together for aesthetic, social, political, and religious purposes. This volume discusses groups, including an East African chorus; groups from 19th century England, Germany, and America; early twentieth-century Russian Menonites; Soviet workers' clubs; and more.

*Western Plainchant in the First Millennium* Springer Science & Business Media

This book takes stock of Belgium's exceptional and - for some foreign observers -schizophrenic position in the political world and explains its idiosyncrasy to a non-Belgian audience. Offering a broad and comprehensive analysis of Belgian politics, the guiding questions throughout each of the chapters of this book are: Is Belgium a political enigma, and why? Along which axes is Belgium "exceptional" compared to other countries? And what insights does a comparative study of Belgian politics have to offer? The book therefore provides a critical assessment of how Belgian politics "stands out" internationally, both in good and bad ways - including consociationalism, federalism, democratic innovations, Euroscepticism, government formation, gender equality, among others - and which factors can explain Belgium's exceptional position. Based on cutting-edge research findings, the book will be of wide interest to scholars and students of Belgian politics, European Politics and Comparative politics.
