*The Articulate Mammal* Lonely Planet

The Getty Museum's collection of drawings was begun in 1981 with the purchase of a Rembrandt nude and has since become an important repository of European works from the fifteenth through the nineteenth century. As in the first volume devoted to the collection (published in 1988 in English and Italian editions), the text is here organized first by national school, then alphabetically by artist, with individual works arranged chronologically. For each drawing, the authors provide a discussion of the work's style, dating, iconography, and relationship to other works, as well as provenance and a

complete bibliography.

*Lonely Planet Mexico* Getty Publications

The diary of Heinrich Witt (1799-1892) is the most extensive private diary written in Latin America known to us today. Written in English by a German migrant who lived in Lima, it is a unique source for the history of Peru, and for international trade and migration.

**The Maya Vase Book** Duke University Press

Throughout his career, Eduardo Galeano has turned our understanding of history and reality on its head. Isabelle Allende said his works "invade the reader's mind, to persuade him or her to surrender to the charm of his writing and power of his idealism." *Mirrors*, Galeano's most ambitious project since *Memory of Fire*, is an unofficial history of the world seen through history's unseen, unheard, and forgotten. As Galeano notes: "Official history has it that Vasco Núde Balboa was the first man to see, from a summit in Panama, the two oceans at once. Were the people who lived there blind??" Recalling the lives of artists, writers, gods, and visionaries, from the Garden of Eden to twenty-first-century New York, of the black slaves who built the White House and the women erased by men's fears, and told in hundreds of kaleidoscopic vignettes, *Mirrors* is a magic mosaic of our humanity.

#### **Fixing Haiti** Routledge

Haiti may well be the only country in the Americas with a last name. References to the land of the "black Jacobins" are almost always followed by the phrase "the poorest country in the Western Hemisphere". To that dubious distinction, on 12 January 2010 Haiti added another, when it was hit by the most devastating natural disaster in the Americas, a 7.0 Richter scale earthquake. More than 220,000 people lost their lives and much of its vibrant capital, Port-au-Prince, was reduced to rubble. Since 2004, the United Nations has been in Haiti through MINUSTAH, in an ambitious attempt to help Haiti raise itself by its bootstraps. This effort has now acquired additional urgency. Is Haiti a failed state? Does it deserve a Marshall-plan-like program? What will it

take to address the Haitian predicament? In this book, some of the world's leading experts on Haiti examine the challenges faced by the first black republic, the tasks undertaken by the UN, and the new role of hemispheric players like Argentina, Brazil and Chile, as well as that of Canada, France and the United States. *Philosophy, a School of Freedom* Princeton University Press  
In *An Aqueous Territory* Ernesto Bassi traces the configuration of a geographic space he calls the transimperial Greater Caribbean between 1760 and 1860. Focusing on the Caribbean coast of New Granada (present-day Colombia), Bassi shows that the region's residents did not live their lives bounded by geopolitical borders. Rather, the cross-border activities of sailors, traders, revolutionaries, indigenous peoples, and others reflected their perceptions of the Caribbean as a transimperial space where trade, information, and people circulated, both conforming to and in defiance of imperial regulations. Bassi demonstrates that the islands, continental coasts, and open waters of the transimperial Greater Caribbean constituted a space that was simultaneously Spanish, British, French, Dutch, Danish, Anglo-American, African, and indigenous. Exploring the "lived geographies" of the region's dwellers, Bassi challenges preconceived notions of the existence of discrete imperial spheres and the inevitable emergence of independent nation-states while providing insights into how people envision their own futures and make sense of their place in the world.

"Rachel B. Herrmann's *No Useless Mouth* is truly a breath of fresh

air in the way it aligns food and hunger as the focal point of a new lens to reexamine the American Revolution. Her careful scrutiny, inclusive approach, and broad synthesis—all based on extensive archival research—produced a monograph simultaneously rich, audacious, insightful, lively, and provocative."—The Journal of American History In the era of the American Revolution, the rituals of diplomacy between the British, Patriots, and Native Americans featured gifts of food, ceremonial feasts, and a shared experience of hunger. When diplomacy failed, Native Americans could destroy food stores and cut off supply chains in order to assert authority. Black colonists also stole and destroyed food to ward off hunger and carve out tenuous spaces of freedom. Hunger was a means of power and a weapon of war. In *No Useless Mouth*, Rachel B. Herrmann argues that Native Americans and formerly enslaved black colonists ultimately lost the battle against hunger and the larger struggle for power because white British and United States officials curtailed the abilities of men and women to fight hunger on their own terms. By describing three interrelated behaviors—food diplomacy, victual imperialism, and victual warfare—the book shows that, during this tumultuous period, hunger prevention efforts offered strategies to claim power, maintain communities, and keep rival societies at bay. Herrmann shows how Native Americans, free blacks, and enslaved peoples were "useful mouths"—not mere supplicants for food, without rights or power—who used hunger for cooperation and violence, and took steps to circumvent starvation. Her wide-ranging research on black Loyalists, Iroquois, Cherokee, Creek, and Western Confederacy Indians demonstrates that hunger creation and

prevention were tools of diplomacy and warfare available to all people involved in the American Revolution. Placing hunger at the center of these struggles foregrounds the contingency and plurality of power in the British Atlantic during the Revolutionary Era. Thanks to generous funding from Cardiff University, the ebook editions of this book are available as Open Access volumes from Cornell Open ([cornellpress.cornell.edu/cornell-open](http://cornellpress.cornell.edu/cornell-open)) and other repositories.

#### Guatemala, Belize & Yucatán Springer

This annual bestseller ranks the hottest countries, regions and cities for 2020, and reveals how well-planned, sustainable travel can be a force for good. Drawing on the knowledge and passion of Lonely Planet's staff, authors and online community, we present a year's worth of inspiration to take you out of the ordinary and into the unforgettable.

#### **Spain** Harvard University Press

This annual list ranks the planet (TM)s must-visit countries, cities and regions for 2022. As we re-engage with the world with a new appreciation for what a privilege and responsibility travel is, Lonely Planet has drawn on the knowledge of our global community of experts to curate a collection of experiences that will inspire you to reconnect with the world. We also reveal how you can have a positive impact as you return to the road, with practical advice that will help you to make sustainable travel choices, support local communities and celebrate inclusivity. Inside *Best in Travel 2022* you will discover: A reflective view on travel in a post-pandemic world Lonely Planet (TM)s top 10 countries, cities and regions to visit in 2022 Inspiration and guidance for every destination to help travellers make it happen

Expert advice on how to protect the areas you visit on your travels About Lonely Planet: Lonely Planet is a leading travel media company, providing both inspiring and trustworthy information for every kind of traveller since 1973. Over the past four decades, we've printed over 145 million guidebooks and phrasebooks for 120 languages, and grown a dedicated, passionate global community of travellers. You'll also find our content online, and in mobile apps, videos, 14 languages, armchair and lifestyle books, ebooks, and more, enabling you to explore every day.

*At Home: Isabel López-Quesada at Home* Bold Type Books

Everyone eats, but rarely do we ask why or investigate why we eat what we eat. Why do we love spices, sweets, coffee? How did rice become such a staple food throughout so much of eastern Asia? *Everyone Eats* examines the social and cultural reasons for our food choices and provides an explanation of the nutritional reasons for why humans eat, resulting in a unique cultural and biological approach to the topic. E. N. Anderson explains the economics of food in the globalization era, food's relationship to religion, medicine, and ethnicity as well as offers suggestions on how to end hunger, starvation, and malnutrition. *Everyone Eats* feeds our need to understand human ecology by explaining the ways that cultures and political systems structure the edible environment.

**Ecotourism in Appalachia** University Press of Kentucky

Tourism is the world's largest industry, and ecotourism is rapidly emerging as its fastest growing segment. As interest in nature travel increases, so does concern for conservation of the environment and the well-being of local peoples and cultures.

Appalachia seems an ideal destination for ecotourists, with its rugged mountains, uniquely diverse forests, wild rivers, and lively arts culture. And ecotourism promises much for the region: protecting the environment while bringing income to disadvantaged communities. But can these promises be kept? *Ecotourism in Appalachia* examines both the potential and the threats that tourism holds for Central Appalachia. The authors draw lessons from destinations that have suffered from the "tourist trap syndrome," including Nepal and Hawaii. They conclude that only carefully regulated and locally controlled tourism can play a positive role in Appalachia's economic development.

**Mirrors** Harper Collins

*Acoustic Properties: Radio, Narrative, and the New Neighborhood of the Americas* discovers the prehistory of wireless culture. It examines both the coevolution of radio and the novel in Argentina, Cuba, and the United States from the early 1930s to the late 1960s, and the various populist political climates in which the emerging medium of radio became the chosen means to produce the voice of the people. Based on original archival research in Buenos Aires, Havana, Paris, and the United States, the book develops a literary media theory that understands sound as a transmedial phenomenon and radio as a transnational medium. Analyzing the construction of new social and political relations in the wake of the United States' 1930s Good Neighbor Policy, *Acoustic Properties* challenges standard narratives of hemispheric influence through new readings of Richard Wright's cinematic work in Argentina, Severo Sarduy's radio plays in France, and novels by John Dos Passos, Manuel Puig, Raymond

Chandler, and Carson McCullers. Alongside these writers, the book also explores Che Guevara and Fidel Castro's Radio Rebelde, FDR's fireside chats, Félix Caignet's invention of the radionovela in Cuba, Evita Perón's populist melodramas in Argentina, Orson Welles's experimental New Deal radio, Cuban and U.S. "radio wars," and the 1960s African American activist Robert F. Williams's proto-black power Radio Free Dixie. From the doldrums of the Great Depression to the tumult of the Cuban Revolution, *Acoustic Properties* illuminates how novelists in the radio age converted writing into a practice of listening, transforming realism as they struggled to channel and shape popular power.

*Rethinking Columbus* Rethinking Schools

In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

*The Naturalist and His 'beautiful Islands'* ANU Press

This first book-length presentation of the results of our excavations at el-Jib has been written for the general reader who is concerned with the contribution that archaeology has made to the biblical history of the site.... In telling the story of Gibeon I have tried to show how the tale of the city unfolded week by week and year by year through excavation and study. I have sought to give in these pages a personally conducted tour, as it were, of the ruins of ancient Gibeon and what we have seen in them.... The results of the excavations at el-Jib are unique in that

they can be related with a high degree of certainty to specific events described in the Old Testament. For the first time in the history of scientific archaeology in the land of the Bible an actual place name of a biblical city, neatly incised on clay, has been found under circumstances which make certain the identification of the name with the ruins.--from the Preface

*The Diary of Heinrich Witt (10 vols.)* Lonely Planet

This book presents original happiness research from and about a region that shows unexpectedly high levels of happiness. Even when Latin American countries cannot be classified as high-income countries their population do enjoy, on average, high happiness levels. The book draws attention to some important factors that contribute to the happiness of people, such as: relational values, human relations, solidarity networks, the role of the family, and the availability and gratifying using of leisure time. In a world where happiness is acquiring greater relevance as a final social and personal aim both the academic community and the social-actors and policy-makers community would benefit from Happiness Research in Latin America.

this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

**A History of the Korean Language** Lonely Planet

In this highly original and critically informed book, Renata R. Mautner Wasserman looks at how, during the first decades following political independence, writers in the United States and Brazil assimilated and subverted European images of an "exotic" New World to create new literatures that asserted cultural independence and defined national identity. Exotic Nations demonstrates that the language of exoticism thus became part of the New World's interpretation of its own history and natural environment.

**Human Accomplishment** Franklin Classics

Guatemala's "Ten Years of Spring" (1944-1954) began when citizens overthrew a military dictatorship and ushered in a

remarkable period of social reform. This decade of progressive policies ended abruptly when a coup d'état, backed by the United States at the urging of the United Fruit Company, deposed a democratically elected president and set the stage for a period of systematic human rights abuses that endured for generations. Presenting the research of diverse anthropologists and historians, Out of the Shadow offers a new examination of this pivotal chapter in Latin American history. Marshaling information on regions that have been neglected by other scholars, such as coastlines dominated by people of African descent, the contributors describe an era when Guatemalan peasants, Maya and non-Maya alike, embraced change, became landowners themselves, diversified agricultural production, and fully engaged in electoral democracy. Yet this volume also sheds light on the period's atrocities, such as the US Public Health Service's medical experimentation on Guatemalans between 1946 and 1948. Rethinking institutional memories of the Cold War, the book concludes by considering the process of translating memory into possibility among present-day urban activists.
