*Highway to E.S.L.* Routledge

A couple's future hangs in the balance as they wait for a train in a Spanish café in this short story by a Nobel and Pulitzer Prize-winning author. At a small café in rural Spain, a man and woman have a conversation while they wait for their train to Madrid. The subtle, casual nature of their talk masks a more complicated situation that could endanger the future of their relationship. First published in the 1927 collection *Men Without Women*, "Hills Like White Elephants" exemplifies Ernest Hemingway's style of spare, tight prose that continues to win readers over to this day.

**The Crimson League** Cambridge University Press

This book looks at mediaeval English drama using the theoretical frameworks of historical sociopragmatics and dialogue analysis. It focuses on the collection of cycle plays known as the N.Town Plays, preserved in a manuscript from the fifteenth century. The

book examines various linguistic markers that are important for the expression of social relations and pragmatic stance: pronouns and terms of address, modal markers, performatives, and sequential structures such as question-answer, imperative-compliance, etc. These elements are examined separately and then brought together to arrive at a more integrated analysis of dramatic dialogue and of the dynamics of interaction it portrays. A separate chapter is devoted to tracing the same mechanisms on a different communication level, i.e. in 'dialogue' with the audience, which is particularly relevant to the instructional purposes of the plays. The book will be useful to students and scholars of pragmatics, historical linguistics, dialogue studies and drama studies.

*The Complete Guide to Functional Writing in English* Taylor & Francis

*Illegal Alphabets and Adult Bilingual*--based on four years of intensive fieldwork in a small rural community in Southern Illinois--is a landmark work in the area of adult literacy, combining insights from linguistics, anthropology, literacy studies, and education in a culturally situated exploration of the language and

literacy practices of migrant workers. As such, it is a substantive contribution to the linguistic study of indigenous literacies; to sociocultural approaches to language, learning, and literacy; and to ethnographic and critical approaches to education. The book begins with a true story about "illegal aliens" who, in the summer of 1980, in the town of Cobden, Illinois, decided to help each other write down English como de veras se oye--the way it really sounds. The focus is on why and how they did this, what they actually wrote down, and what happened to their texts. The narrative then shifts to how and why the strategies adult immigrants actually use in order to cope with English in the real world seem to have little in common with those used by students in publicly funded bilingual and ESL classrooms. The book concludes with a discussion of the ideal of a universal alphabet, about the utopian claim that anyone can use a canonical set of 26 letters to reduce to script any language, ever spoken by anyone, anywhere, at any time. This claim is so familiar that it is easy to overlook how much undocumented intellectual labor was invested over the centuries by those who successfully carried the alphabet across the border from one language to the next. From this undocumented labor, without which none of us would now be able to read, everyone profits. To make his story and his argument as accessible as possible, Kalmar steers clear of jargon and excessive technical terminology. At the same time, however, readers who are familiar with any of the current postmodern discourses on the social construction of symbolic forms will be able to bring such discourses to bear on what he has to say about the game, the discourse, and the scene of writing that constitute the focus of his theoretical analysis. When people today argue about "illegal aliens" in the United States, probably the last question on their minds is the one to which this book is devoted: how do "illegal aliens" use an alphabet they already know in order to chart the speech sounds of colloquial English? It is the author's hope that readers will interpret his story as a parable with serious political implications. *Illegal Alphabets and Adult Bilingual Education* is a compelling, vitally relevant book for researchers, students, practitioners, and anyone else interested in language and literacy in social, cultural, and political contexts, including bilingual and ESL education, second-language acquisition and development, applied and sociolinguistics, multicultural education, educational anthropology, and qualitative research.

This book provides a blended approach in outlining the properties of grammatical knowledge that have been causing difficulty to Chinese speaking learners, including tense and aspect, articles, passives, unaccusatives, plurality and motion verbs. It explains from different linguistics perspectives how these constraints/difficulties might be dealt with. It also offers readers a comprehensive account of these problems, and outlines the possible pedagogical solutions teachers can try in the classroom. These topics are selected because they bring substantial challenges and difficulties to Chinese English as a Second Language (ESL) learners. This book bridges the gap between acquisition theory and language pedagogy research, benefiting not just language learners but language teachers around the world, and all those who would like to witness collaboration between second language acquisition theory and second language teaching practice in general. It initiates future work in which researchers from different fields with diverging theoretical perspectives and methodological approaches will be able to develop studies that are compatible with each other. This overall can facilitate our understanding of second language acquisition, and how instruction might help.

Over the last quarter-century, Palestinian cinema has emerged as a major artistic force on the global scene. Deeply rooted in the historic struggles for national self-determination, this cinema is the single most important artistic expression of a much-maligned people. In *Dreams of a Nation*, filmmakers, critics and scholars discuss the extraordinary social and artistic significance of Palestinian film. It is the only volume of its kind in any language. *English as a Second Language* Scarecrow Press

This important anthology addresses established notions about Third Cinema theory, and the cinema practice of developing and postcolonial nations. The 'Third Cinema' movement called for a politicised film-making practice in Africa, Asia and Latin America, one which would take on board issues of race, class, religion, and national integrity. The films which resulted from the movement, from directors such as Ousmane Sembene, Satyajit Ray and

Nelson Pereira dos Santos, are among the most culturally significant, politically sophisticated and frequently studied films of the 1960s and 1970s. However, despite the contemporary popularity and critical attention enjoyed by films from Asia and Latin America in particular, Third Cinema and Third Cinema theory appears to have lost its momentum. Rethinking Third Cinema seeks to bring Third Cinema and Third Cinema theory back into the critical spotlight. The contributors address the most difficult and challenging questions Third Cinema poses, suggesting new methodologies and redirections of existing ones. Crucially, they also re-examine the entire phenomenon of film-making in a fast-vanishing 'Third World', with case studies of the cinemas of India, Iran and Hong Kong, among others.

*Grammar of Spoken and Written English* Cambridge University Press

It is a well-known fact that the area of the present perfect has always been a hotly contested ground, but recent corpus analyses have shown that grammatical variation in this realm in English is far more pervasive than previously assumed. This volume is the first ever book-length treatment dedicated to corpus-based work on the present perfect. It offers fresh theoretical insights resting on a solid empirical footing and investigates central aspects of language contact and change, grammaticalization, typology, and dialect formation. It sheds light on this morphosyntactic area from different angles, as it comprises both diachronic and synchronic viewpoints. Contributions explore variation in the expression of perfect meaning and the multifunctionality of perfect forms in a number of native and non-native varieties, thus going beyond the traditional British/American English paradigm, while a second focus lies on cross-variety comparisons. Bringing together the knowledge of leading experts in the field, this book represents the state of the art in data-driven research on the present perfect and will be of interest for those working in the fields of language variation and change, corpus linguistics, sociolinguistics, and typology.

*Interactive Storytelling* John Benjamins Publishing

This edited collection is about the application of English grammar and specialises in 'functional' and 'corpus' approaches, approaches which are increasingly recognised as providing significant insights into English language in action. It aims to stimulate interest and understanding of grammar as an applied tool not just for grammarians or language learners, but for all those interested in how language is organized to shape our view of events in the world. As the chapters in this book show, functional and corpus approaches allow us to make observations that would not be amenable through more traditional forms of grammatical analysis. They also illustrate how researchers can fruitfully bring together corpus and functional approaches to reveal how grammar and lexis create and transmit values, identities and ideologies. Research in Critical Discourse Analysis (CDA) has a long tradition of drawing on functional grammar but has only relatively recently begun to draw on corpus linguistics. As such, the book is unusual in presenting work on CDA which draws on corpus linguistics. But not only that, it is also unique in presenting work in CDA which brings together the methodologies of corpus linguistics and functional grammar, demonstrating their combined potential for illuminating ideological perspectives, particularly in media texts. Given this focus and given the increasing value of empirical data, the book will be of interest to those in a range of disciplines including the humanities and media and cultural studies. Chapters comprise both newly commissioned and previously published works that illustrate the two methodological approaches to grammatical analysis and how they can be applied to deepen our understanding of language.

### **Applying English Grammar.** Cambridge University Press

This book presents an extended analysis of the development of L2 Spanish past tense morphology among L1 English-speaking learners. The study addresses three major questions: (1) what is the developmental pattern of acquisition of past tense verbal morphology among tutored learners? (2) what are the relevant factors that may account for the particular distribution of morphological endings (especially at the beginning stages)?, and (3) how does instruction affect the movement from one stage to the next? The analysis provides a reassessment of the general claim of Andersen's lexical aspect hypothesis and proposes minor changes that may render the hypothesis more appropriate for, especially, L2 classroom learning. The study includes an overview of theoretical positions on the notion of lexical versus grammatical aspect, and a comparison of the findings from previous empirical studies on the development of past tense verbal morphology among both classroom and naturalistic learners.

This anthology brings together fresh corpus-based research by international scholars. It contrasts southern and northern hemisphere usage on variable elements of morphology and syntax. The nineteen invited papers include topics such as irregular verb parts, pronouns, modal and quasimodal verbs, the perfect tense, the progressive aspect, and mandative subjunctives. Lexicogrammatical elements are discussed: light verbs (e.g. "have a look"), informal quantifiers (e.g. "heaps of"), "no"-collocations, concord with "government" and other group nouns, alternative verb complementation (as with "help, prevent"), zero complementizers and connective adverbs (e.g. "however"). Selected information-structuring devices are

analyzed, e.g. "there is/are," "like" as a discourse marker, final "but" as a turn-taking device, and swearwords. Australian and New Zealand use of hypocoristics and changes in gendered expressions are also analyzed. The two varieties pattern together in some cases, in others they diverge: Australian English is usually more committed to colloquial variants in speech and writing. The book demonstrates linguistic endonormativity in these two southern hemisphere Englishes.
