This remarkable work is a
comprehensive historiographical and
bibliographical survey of the most
important scholarly and printed
materials about the naval and maritime
history of England and Great Britain from

the earliest times to 1815. More than
4,000 popular, standard and official
histories, important articles in journals
and periodicals, anthologies, conference,
symposium and seminar papers, guides,
documents and doctoral theses are
covered so that the emphasis is the
broadest possible. But the work is far, far
more than a listing. The works are all
evaluated, assessed and analysed and
then integrated into an historical
narrative that makes the book a hugely

useful reference work for student, scholar, and enthusiast alike. It is divided into twenty-one chapters which cover resource centres, significant naval writers, pre-eminent and general histories, the chronological periods from Julius Caesar through the Vikings, Tudors and Stuarts to Nelson and Bligh, major naval personalities, warships, piracy, strategy and tactics, exploration, discovery and navigation, archaeology and even naval fiction. Quite simply, no-one with an interest and enthusiasm for naval history can afford to be without this book at their side.

Horatio Nelson was a hero from the time when his dramatic initiative won the

battle of St Vincent in 1797, while his last battle, at Trafalgar, reduced the enemy naval forces so thoroughly that they were no longer able to have any bearing on the outcome of the war. As well as being a brilliant study of those naval battles which played such an important role in Napoleon's defeat, it also makes a close study of the admiral's art which, during the last years of the eighteenth century, developed faster than at any time since the previous century and led to Britain's mastery of the seas for more than 100 years. The Seven Years War and the War of the American Revolution stimulated the development of new ideas and the experience gained from them, as well as the developments in ship design and signalling, and the perfection of drill,

transformed naval methods. Nelson became a master of them all. This technical prowess, combined with a remarkable ability to lead his men and his genius for making decisive moves, 'the Nelson touch', made him the consummate master of naval warfare. Highly readable, concise and insightful, this new edition will prove a popular choice for those seeking an introduction to naval warfare in the age of sail

This encyclopedic collection of more than 200 of the most decisive and important battles throughout world history gets a fresh interpretation by a noted military historian. The mythic and doomed stand of the 300 Spartans at Thermopylae; the siege of Carthage in

149-146 BCE, which ended with Rome destroying the city and enslaving the entire remaining Carthaginian population; the Battle of Hastings in 1066, arguably the most important battle ever on English soil; the Battle of Trenton that saved the American Revolutionary cause and established the military reputation of General Washington; the firebombing of Tokyo on the night of March 9-10, 1945, that destroyed one quarter of the city. All of these conflicts—and hundreds more—played a crucial role in defining the direction of history and the evolution of human society. This text provides high school-level readers with detailed descriptions of the battlefield actions that have played the greatest parts in shaping military history and human

existence. Special attention is paid to the greater historical context and significance of each battle, especially in relation to other events.

Britannia's Palette looks at the lives of British artists who witnessed the naval war against the French Republic and Empire between 1793 and 1815. This band of brothers, through their artistic and entrepreneurial efforts, established the images of the war at sea that were central to the understanding their contemporaries had of events - images that endure to this day. In this unprecedented book, Nicholas Tracy reveals the importance of the self-employed artist to the study of a nation at war. He includes lively accounts of

serving officers, retired sailors, and academy-trained artists who, often under the threat of debtor's prison, struggled to balance the standards of art with the public desire for heroic, reassuring images. Containing over eighty illustrations, Britannia's Palette explores a varied and exciting collection of paintings that reveal the poignancy of the human experience of war.

This title explores the controversy surrounding the design of the new Foreign Office in London during Britain's Imperial heyday. In 1855 it was decided to build a new block of government offices in London, starting with the Foreign and War Offices. The government offices competition came at what was probably - looking back on it -

the zenith of Britain's confidence as a nation and international power. One would expect the mid-Victorians to have felt, firstly, pride in their current national situation; and secondly, the urge to commemorate this in the most important national building to be projected in twenty years. Porter uses the debates surrounding the building of these important new monuments to interrogate the very fabric of British society, culture and nation building. The discussion on so many issues - religion, nationality, empire, history, modernism, truth, morality, gender - quite apart from considerations of 'pure' aesthetics, offers an unusual, perhaps even unique, insight into the relationship between these matters and the 'culture' of the time.

The Allure of Battle Macmillan

Finalist for the Pulitzer Prize in History A dramatic, riveting, and “fresh look at a region typically obscured in accounts of the Civil War. American history buffs will relish this entertaining and eye-opening portrait” (Publishers Weekly). Megan Kate Nelson “expands our understanding of how the Civil War affected Indigenous peoples and helped to shape the nation” (Library Journal, starred review), reframing the era as one of national conflict—involving not just the North and South, but also the West. Against the backdrop of this larger series of battles, Nelson introduces nine individuals: John R. Baylor, a Texas legislator who established the Confederate Territory of Arizona; Louisa Hawkins Canby, a Union Army wife who nursed Confederate soldiers back to health in Santa Fe;

James Carleton, a professional soldier who engineered campaigns against Navajos and Apaches; Kit Carson, a famous frontiersman who led a regiment of volunteers against the Texans, Navajos, Kiowas, and Comanches; Juanita, a Navajo weaver who resisted Union campaigns against her people; Bill Davidson, a soldier who fought in all of the Confederacy's major battles in New Mexico; Alonzo Ickis, an Iowa-born gold miner who fought on the side of the Union; John Clark, a friend of Abraham Lincoln's who embraced the Republican vision for the West as New Mexico's surveyor-general; and Mangas Coloradas, a revered Chiricahua Apache chief who worked to expand Apache territory in Arizona. As we learn how these nine charismatic individuals fought

for self-determination and control of the region, we also see the importance of individual actions in the midst of a larger military conflict. Based on letters and diaries, military records and oral histories, and photographs and maps from the time, "this history of invasions, battles, and forced migration shapes the United States to this day—and has never been told so well" (Pulitzer Prize-winning author T.J. Stiles).

T.P.'s Weekly Oxford University Press Chronicles the events of the Battle of Bunker Hill and the beginning of the American Revolution, describing key figures from both sides, and how the battle's outcome influence British strategy throughout the course of the conflict.

History has tended to measure war's winners and losers in terms of its major engagements, battles in which the result was so clear-cut that they could be considered "decisive." Cannae, Konigsberg, Austerlitz, Midway, Agincourt-all resonate in the literature of war and in our imaginations as tide-turning. But these legendary battles may or may not have determined the final outcome of the wars in which they were fought. Nor has the "genius" of the so-called Great Captains - from Alexander the Great to Frederick the Great and Napoleon - play a major role. Wars are decided in other ways. Cathal J. Nolan's *The Allure of Battle* systematically and engrossingly examines the great battles, tracing what he calls "short-war thinking," the hope that victory might be

swift and wars brief. As he proves persuasively, however, such has almost never been the case. Even the major engagements have mainly contributed to victory or defeat by accelerating the erosion of the other side's defences. Massive conflicts, the so-called "people's wars," beginning with Napoleon and continuing until 1945, have consisted of and been determined by prolonged stalemate and attrition, industrial wars in which the determining factor has been not military but matériel. Nolan's masterful book places battles squarely and mercilessly within the context of the wider conflict in which they took place. In the process it help corrects a distorted view of battle's role in war, replacing popular images of the "battles of annihilation" with somber appreciation of

the commitments and human sacrifices made throughout centuries of war particularly among the Great Powers. Accessible, provocative, exhaustive, and illuminating, *The Allure of Battle* will spark fresh debate about the history and conduct of warfare.

While there is a perennial interest in the Royal Navy during the Napoleonic wars and in Nelson himself, there is no reference work that chronicles all the captains of his ships, their social origins, their characters and the achievements in their lives beyond their service under Nelson. This new book, researched and written by distinguished historians, descendants of some of Nelson's officers, and members of the 1805 Club, presents concise biographies of those

officers who fought with Nelson in his three great battles, with superb colour illustration throughout. Nelson first gave the name of 'band of brothers' to the officers who had commanded ships of his fleet at the battle of the Nile (1798). This new volume will include 100 officers, ranging from lieutenants in command of gunboats at the battle of Copenhagen (1801) through captains of line-of- battle ships at the Nile and at Trafalgar (1805), to admirals in command of squadrons in his fleets. Of real significance are the specially commissioned photographs of all the monuments and memorials to Nelson's captains, descriptions with transcriptions of epitaphs, and clear directions to enable the readers to find them. Part travel book, part biography and moving testimony to Nelson's

faithful captains, Nelson's band of Brothers presents the opportunity to rediscover 100 local heroes.

"One of the most interesting, important, and ambitious books about the conduct, and perhaps the ultimate futility, of war."

--Gunther E. Rothenberg " A] highly scholarly and wonderfully absorbing study." --John Bayley, *The London Review of Books* "What Russell F. Weigley writes, the rest of us read. *The Age of Battles* is a persuasive reminder

that even in the age of 'rational' warfare, one can honestly wonder why war seemed an unavoidable policy choice." --

"[Baker] enthralls the readers of the brutal encounters Nelson engaged in in his scrappy career...It is simply the best book ever written on the life of Battling Nelson. Not only does Mr. Baker bring to life the long forgotten pugilist, but his era is vividly reconstructed where the reader feels as if he were sitting in the early years of the 20th Century...To those fans who enjoy reading about a bygone era and the great fighter who plied their trade, this is the book for you.

It is terrific....highly recommended”—The USA Boxing News Oscar “Battling” Nelson (1882-1954) was perhaps the toughest professional boxer ever to enter the ring. Although a Hall of Fame inductee, Nelson remains a lesser known great of boxing lore. From the beginning of his career at 14, the Danish immigrant presented himself as a man of integrity who never smoked, drank or took a dive. In the ring and in public, Battling Nelson crafted a Renaissance man image as a lightweight champion, reporter, entertainer, real estate mogul, entrepreneur and ladies’ man. The first ever champion in his weight class to mount a comeback, he strove to break new ground (even if he wasn’t always successful). This book tells the story of a ring legend whose endurance was

second to none and whose trilogy with Joe Gans is one of the great rivalries in sports history.

Admiral Horatio Nelson captures our imaginations like few other military figures. A mixture of tactical originality, raw courage, cruelty, and romantic passion, Nelson in action was daring and direct, a paramount naval genius and a natural born predator. Now, in *The Nelson Touch*, novelist Terry Coleman

provides a superb portrait of Britain's most revered naval figure. Here is a vivid account of Nelson's life, from his childhood and early career at sea--where a high-placed uncle helped speed his advancement to post captain--to gripping accounts of his greatest sea battles. Readers will witness the Battle of the Nile, where Nelson crushed a French squadron of thirteen ships of the line, and the Battle of Trafalgar, where he died at the moment of his greatest triumph. What emerges is a man of strength of mind amounting to genius, frequently generous, always fascinated with women, often uneasy with his superior officers, and absolutely fearless. Nelson was a ruthless commander, whose instinct was not just to defeat the enemy but to annihilate him. Sure to

appeal to readers of Patrick O'Brian and other seafaring fiction, as well as all military history and naval history buffs, this is a superbly written biography that gives readers the texture and feel of this magnificent life.

Battling Nelson, the Durable Dane A&C Black

Leadership is still much discussed, studied, and sought after, even though we now live in supposedly more democratic times with flatter organizations and empowered employees. But how can we best understand leadership? Are leaders born or made? Do they have particular traits or are we all potential leaders? Do the requirements for leadership change over time or are there timeless patterns? Do traditional approaches help us to pick and develop leaders or are there alternative ways that advance our understanding? In this book, Keith Grinstead who has been studying and teaching leadership for over a decade investigates the notion of leadership in a series of historical case studies and rich essay portraits of some

of the most famous, and infamous, leaders (e.g. Florence Nightingale, Richard Branson, Horatio Nelson, Martin Luther King, Henry Ford, etc.). The scenarios are drawn from right across the spectrum to include business, politics, society, and the military. The first part of the book considers four sets of parallel cases where leadership appears to be a major explanation of success and failure. The second part takes the four critical issues arising from these parallel cases (identity, strategic vision, organizational tactics, and persuasive communication) and explores them in detail. One main reason we have such difficulty in explaining and enhancing leadership, Grinstead argues, is because we often adopt perspectives and models that obscure rather than

illuminate the issues involved. The reliance upon traditional scientific analysis has not provided the anticipated advances in our understanding because leadership is more fruitfully considered

as an art, or more exactly an array of arts, rather than as a science. Grint's rich and meticulously-researched profiles combine to reveal these Arts of Leadership.
