Nursing Pharmacology Made Incredibly Easy Elsevier Health Sciences

This is a contemporary classic nursing pharmacology textbook known for its accurate drug content and its practical application of the nursing process. A consistent emphasis on health promotion through medication monitoring and patient education is a hallmark of the book.

Lippincott Coursepoint (Ver1) for Focus on Nursing Pharmacology Cengage AU

The eighth edition of Focus on Nursing Pharmacology is based on the premise that students first need to have a solid and clearly focused concept of the principles of drug therapy before they can easily grasp the myriad details associated with individual drugs. Armed with a fundamental knowledge of pharmacology, students appreciate and use the specific details that are readily available in the many annually updated and published nursing drug guides. With this goal in mind, Focus on Nursing Pharmacology provides a concise, user-friendly, uncluttered text for today's student. This difficult subject is presented in a streamlined, understandable, teachable, and learnable manner. Designed to be used in conjunction with a handbook of current drug information, content is streamlined and straight forward. The text reviews and integrates previously learned knowledge of physiology, chemistry, and nursing fundamentals into chapters focused on helping students conceptualize what is important to know about each group of drugs, with the prototype drug highlighted. Illustrations, sidebars, and tables sum up concepts to enhance learning. Special features further focus student learning on clinical application, critical thinking, patient safety, lifespan issues related to drug therapy, evidence-based practice, patient teaching, and case-study-based critical thinking exercises that incorporate nursing process principles. The new edition includes updated anatomy illustrations, expanded drug abuse content, and updated content throughout.

For pharmacology courses in nursing programs Help students think like nurses and understand how pharmacology relates to patient care. When drugs are learned in isolation from their associated diseases, students have difficulty connecting pharmacotherapy, pathophysiology, and nursing care. *Pharmacology for Nurses: A Pathophysiologic Approach*, Fifth Edition, helps students master pharmacology by tightly linking it to therapeutic goals and patient wellness. Organized by body systems and diseases, it places drugs in context with how they are used therapeutically. Students can then easily locate relevant anatomy, physiology, pathology, and pharmacology in the same chapter. *Nursing Process Application* features clearly relate pharmacology to key nursing processes. Features highlighting complementary therapies, community-oriented and evidence-based practices, and lifespan considerations help students make connections to nursing practice. To give readers a clear picture of the holistic nature of pharmacology, the Fifth Edition reflects current pharmacotherapeutics and advances in understanding disease. Also available with MyNursingLab® MyNursingLab is an online homework, tutorial, and assessment program designed to engage students in the Pharmacology course and improve results.
