Zoom into a cloud. Zoom out of a rock. Watch the volcano explode, the lightning strike, an aurora undulate. Imagine ice sheets expanding, retreating - pulsating - while continents continue their leisurely collisions. Everywhere there are structures within structures... within structures. A Voyage Through Scales is an invitation to contemplate the earth's extraordinary variability, from changes in milliseconds to geologic time scales, from microns to the size of the planet. The range of scales in space, in time - in space-time - is truly mind boggling. Their complexity challenges our ability to measure, to model, to comprehend. Join us on this odyssey. Contents: Up into the Sky; Biogeosciences connecting Earth's spheres from microscopic to global scales; Scales in Atmospheric Remote Sensing Instruments; Beautiful Geometries Underlying Ocean Nonlinear Processes; Ocean Science; Soil: a journey through time and space; From microscopic ice crystals to global ice ages.

First man on the Moon Neil Armstrong reveals the adventure of the first Moon landing, and how the Earth and the Moon came to be, in this unique non-fiction picture book. A young boy sits up in bed and gazes at the distant Moon through his window. He wonders if, one day, a human will stand on its surface and look back at the Earth. But Earth is already being studied from the Moon. An all-seeing Moon rock of almost impossible age, called Bok, has been looking down at our blue and green planet for millennia. Geologists - people who study rocks - have a saying: 'Rocks remember'. During his time, Bok has witnessed some truly wondrous things. Created in the Earth-shattering collision 4.5 billion years ago that led to the formation of the Moon, he has seen stars burst into being and meteors streak through the solar system. He has seen his own Moon surface be transformed with craters, and he has watched a fiery, volcanic planet transform into the haven we know today - as mountain ranges rose up, oceans appeared and dinosaurs roamed the Earth. And he found himself rudely awoken one early lunar morning by a strange creature picking him up and throwing him into a box. That is how Bok and Neil Armstrong first met, and this is their (true) story.

A century ago, outsiders saw China as a place where nothing ever changes. Today the country has become one of the most dynamic regions on earth. In Oracle Bones, Peter Hessler explores the human side of China's transformation, viewing modern-day China and its growing links to the Western world through the lives of a handful of ordinary people. In a narrative that gracefully moves between the ancient and the present, the East and the West, Hessler captures the soul of a country that is undergoing a momentous change before our eyes.

From a beginning in an Egyptian delta town and the port of Alexandria to the scenic vistas of sunny southern California, Ahmed Zewail takes us on a voyage through time — his own life and the split-second world of the femtosecond. In this endearing exposé of his life and work until his receipt of the Nobel Prize in 1999, he draws lessons from his life story so far, and he meditates on the impact which the revolution in science has had on our modern world — in both developed and developing countries. What makes the book enchanting and engaging is Zewail's emphasis on the human dimension and his unique ability to paint the journey of Life and Science with insightful analogies and ingenious metaphors. But this inspiring book goes far beyond the usual province of an autobiography. Zewail integrates the two worlds he equally belongs to — Egypt and America — and, despite differences, he emphasizes the confluence of the two cultures — the East and the West. He rejects the view that the current state of the world is due to a clash of civilizations or a conflict of religions, and suggests a concrete course of action for the world of the have-nots. The book ends with his road map for a partnership between developed and developing worlds. Throughout the book, Zewail takes on the mantle of philosopher, historian and even political and economic adviser.

After Paul Stutzman lost his wife to breast cancer, he sensed a tug on his heart—the call to a

challenge, the call to pursue a dream. Paul left his stable career, traveled to Georgia, and took his first steps on the Appalachian Trail. What he learned during the next four and a half months changed his life--and will change readers' lives as well. In *Hiking Through*, readers will join Paul on his remarkable 2,176-mile hike through fourteen states in search of peace and a renewed sense of purpose, meeting fascinating and funny people along the way. They'll discover that every choice we make along the path has consequences for the journey and will come away with a new understanding of God's grace and guidance. Nature-lovers, armchair adventurers, and those grieving a loss may not be able to hike the AT themselves, but they can go on this spiritual pilgrimage with a truly humble and sympathetic guide.

"Engaging hybrid - part lyrical travelogue, part investigative journalism and part jeremiad, all shot through with droll humor." --The Atlanta Journal Constitution In 1867, John Muir set out on foot to explore the botanical wonders of the South, from Kentucky to Florida. One hundred and fifty years later, veteran Atlanta reporter Dan Chapman recreated Muir's journey to see for himself how nature has fared since Muir's time. He uses humor, keen observation, and a deep love of place to celebrate the South's natural riches. But he laments the long-simmering struggles over misused resources and seeks to discover how Southerners might balance surging population growth with protecting the natural beauty Muir found so special. *A Road Running Southward* is part travelogue, part environmental cri de coeur--a passionate appeal to save one of the loveliest and most biodiverse regions of the world by understanding what we have to lose if we do nothing.

Global Warming. Rising Oceans. Population Explosion. Hunger. Rise in Crime. Strange Diseases. Where is this planet headed? What is in store for us, for our children, or for future generations? When standing at the check-out counter of any grocery or convenience stores, one cannot help but wonder as you read the headlines of the magazines for sale. Titles like, *World Will End Soon*, *Giant Asteroid on Collision Course with Earth*, *Are There Intelligent Beings in Other Galaxies?* People purchase these magazines or stand and read them while waiting to go through the check-out. They are interested in what the future holds. Along with the interest in the unknown, people are also concerned with the terms that psychics and prophets use in their predictions, like 666, *The Millennium*, *Christ's Return*, *Life on the Other Side of Death*, *The End of the World*, 144,000, and *the Mark of the Beast*. What do they all mean? As you relax with this book on the subway, the airplane, or by the fireplace, you will find answers to these and many other questions you may have, as you *Journey Into Time!*

The coming of age happened fast for a young Dr. Shah when he was sent away to a tough British military-style boarding school in the Nilgiris Mountains of India. Dr. Shah narrates a cultural and inspirational memoir of a child maturing into a man, then father, determined to succeed despite his obstacles. With a love for history and nature, he paints his story through a lens of the landscapes he journeys. He takes you from India, to Wales and Scotland, and finally to America, where he achieves his psychiatry degree and settles with his family in beautiful West Virginia. Dr. Shah's passion for service and medicine is witnessed as he shares unique experiences of treating patients with tropical illnesses in India to psychiatric cases with children, coal miners, veterans and prisoners in the US. While sharing glimpses into patient lives, he does not shy away from his own struggles with anxiety, personal failures, cultural adjustments, and parental concerns of raising two daughters in the values of a western world. His memoir beautifully balances the challenges and joys of his life by weaving in stories of family, friendships, adventures and his now retired life in Florida. Along with a sprinkle of poetry and pictures, Dr. Shah passes on a written legacy of humanity and life lessons that portrays both heart and strength...a book not to be missed!

The journey begins with viewing the origin of our universe and following natural evolution, leading to an analysis of the human mind, our greatest asset. After a discussion of the meaning and direction in our life, thoughts are presented to guide and support us in our path, as pronounced in the biblical Beatitudes and in a meditation for nonbelievers. In the end, aging is described as one experiences it. A view to the future indicates the fundamental problems and opportunities for mankind which should concern us all.

In this unique illustrated book, PhD students, postdoctoral researchers, senior visiting scholars, and staff describe their personal experiences in working with the late Prof. Ahmed H. Zewail at Caltech. Their reminiscences provide snapshots of their rich interactions, reflecting the great scientific achievements, as well as the human and humorous sides of Ahmed H. Zewail. The contributors tell us their stories covering a period of forty years, beginning from the time of Zewail's arrival at Caltech in 1976. Some of them cover the time when Zewail was starting his pioneering work on femtochemistry at the end of 80's, while others relate events long after he was awarded the Nobel Prize in Chemistry (1999) and had embarked on a new career in ultrafast electron imaging. The aims and scope of this book is to provide both scientists and non-scientists descriptions of the experiences of scientists in the early or mature stages of their careers when interacting with one of the greatest scientists of the 20th century, from developing the field of femtochemistry to

pioneering ultrafast electron diffraction and imaging technology. The personal dimension of Zewail's leadership is reflected in all the contributions, and highlighted by special tributes from two of his children. The scientific and anecdotal stories recounted in the book give a rare view of experiences in shaping science. The reader will get firsthand accounts of how a Nobel Prize winner interacted daily with his co-workers to develop the laser-based science and technology for which he was internationally recognized. The recounted experiences may serve as a basis for scientists developing their own research, tutoring students, and supervising postdoctoral researchers.

I was born in December 1954 or January 1955 ('when the first snow fell') as the third child of a Kurdish family living in a remote village of Eastern Turkey. My father died of tuberculosis at the age of 31 when I was six years old. My mother was 34, never married again, dedicated her life to her children. From the moment I learned how to read and write I became a passionate reader of the books; books of literature, books of history, books of travel, books of philosophy, books of memoirs, books of biographies, books of politics... This book contains some of the excerpts that I noted while reading. Excerpts of wisdom and reflection from Barack Obama to Haji Ali (Nurmadhar of Korphe Village in Karakoram) from Edward Gibbon to Abdul Sattar Edhi (Pakistani Philanthropist). Excerpts on life, on love, on humanity, on civilization, on courage, on art, on ideas, on faith, on democracy, on freedom, on nations, on education, on war, on peace... Just a few short examples: For only in death are we alone-Rabindranath Tagore *** Sir, that all who are happy, are equally happy, is not true. A peasant and a philosopher may be equally satisfied, but not equally happy. Happiness consists in the multiplicity of agreeable consciousness-Samuel Jonson *** Serious literature is no less of a life preserver, even if the society is all but oblivious of it-Philip Roth *** It bothers me a little that at 99 you're going to die any minute, because I have a lot of other things I want to do-Delmer Berg Sezai Arli Doha, November 2020

Increasingly, many Christians and spiritual seekers feel they are in a sort of wilderness space where the familiar, settled, and normal parts of life have become unsettled, out of balance. More and more people are evaluating their lives and asking, "Where to now?" In *Life Unsettled*, Cory Driver uses the metaphor of wilderness journeying (a hallmark of the life of faith across the millennia) and the study of biblical texts, ancient Jewish legends, modern theological insights, and his own personal journeys to provide a guide for moving forward when we feel lost and confused. The biblical book of Numbers takes center stage in the author's creative musings about life in the wilderness. The Hebrew title of Numbers is Bemidbar, which means "In the Wilderness." In this oft-overlooked book are stories of God's passionate intimacy and anger, communal formation and struggles, and personal failures and triumphs. The author shows how the wilderness journey in Numbers has a deep relevance for our time and for our personal journeys. The book includes a discussion guide ideal for group use.
