A ten-year-old girl learns the importance of family and community in this tale of love and hope set during the Hurricane Katrina disaster. Armani Curtis can think about only one thing: her tenth birthday. All her friends are coming to her party, her mama is making a big cake, and she has a good feeling about a certain wrapped box. Turning ten is a big deal to Armani. It means she's older, wiser, more responsible. But when Hurricane Katrina hits the Lower Nines of New Orleans, Armani realizes that being ten means being brave, watching loved ones die, and mustering all her strength to help her family weather the storm. A powerful story of courage and survival, Upside Down in the Middle of Nowhere celebrates the miraculous power of hope and love in the face of the unthinkable. Praise for Upside Down in the Middle of Nowhere "Lamana goes for and achieves realism here, carefully establishing the characters and setting before describing in brutal detail, beyond what is typical in youth literature, the devastating effects of Katrina—loss of multiple family members, reports of attacks in the Superdome, bodies drifting in the current and less-than-ideal shelter conditions. An honest, bleak account of a national tragedy sure to inspire discussion and research." —Kirkus Reviews "I recommend the book because I think it does a good job of capturing what life was like in New Orleans both before and after Katrina and because Armani's journey will give readers a lot to think about and discuss. But parents will want to know that it doesn't flinch when describing the death and destruction that hit New Orleans during that time and be cautious with younger, sensitive readers." —Cindy Hudson, author of Book by Book

Many scholars have noted the role of China's demand for silver in the emergence of the modern world. This book discusses the interaction of this demand and the early-nineteenth-century Latin American independence movements, changes in the world economy, the resulting disruptions in the Qing dynasty, and the transformation from the High Qing to modern China. Man-houng Lin shows how the disruption in the world's silver supply caused by the turmoil in Latin America and subsequent changes in global markets led to the massive outflow of silver from China and the crisis of the Qing empire. During the first stage of this dynastic crisis, traditional ideas favoring plural

centers of power became more popular than they ever had been. As the crisis developed, however, statist ideas came to the fore. Even though the Qing survived with the resumption of the influx of Latin American silver, its status relative to Japan in the East Asian order slipped. The statist inclination, although moderated to a degree in the modern period, is still ascendant in China today. These changes—Qing China's near-collapse, the beginning of its eclipse by Japan in the East Asian order, and shifting notions of the proper relationship between state and market and between state and society—led to "China upside down."

Acton Academy: The one-room schoolhouse for the twenty-first century Seeking a 21st century education for their children, Laura and Jeff Sandefer jumped off the track of conventional school and created a new model for learning. They created Acton Academy as a better school where learning is made practical and meaningful and where students begin a lifelong Hero's Journey to discover their true potential. Using the Socratic method, elements of the Montessori approach and state-of-the-art online instruction, Acton guides students toward independence and self-motivation, helping them find the courage to grow into the person they were meant to be. Soon, other parents wanted to start their own Acton Academies, and less than a decade from the seven founding students' first Socratic discussion, Acton has spread around the world. Courage to Grow is the Sandefer family's personal quest for their own children's education and happiness. Their story also contains a path for other parents who want to give their children the freedom to take ownership of their own education and to start their own school. The treasure at the end is much larger than Laura ever expected--a quickly growing network of dedicated, curious young people and parents who are not afraid to set them free.

From the winner of the first Lannan Prize for Cultural Freedom, a bitingly funny, kaleidoscopic vision of the first world through the eyes of the third Eduardo Galeano, author of the incomparable Memory of Fire Trilogy, combines a novelist's intensity, a poet's lyricism, a journalist's fearlessness, and the strong judgments of an engaged historian. Now his talents are richly displayed in Upside Down, an eloquent, passionate, sometimes hilarious exposé of our first-world privileges and assumptions. In a series of lesson plans and a "program of study" about our beleaguered planet, Galeano takes the reader on a wild trip through the global looking glass. From a master class in "The Impunity of Power" to a seminar on "The Sacred Car"--with tips along the way on "How to Resist Useless Vices" and a declaration of "The Right to Rave"--he surveys a world unevenly divided between abundance and deprivation, carnival and torture, power and helplessness. We have accepted a reality we should reject, Galeano teaches us, one where machines are more precious than humans, people are hungry, poverty kills, and children toil from dark to dark. A work of fire and charm, Upside Down makes us see the world anew and even glimpse how it might be set right. "Galeano's outrage is

tempered by intelligence, an ineradicable sense of humor, and hope." -Los Angeles Times, front page

This edited collection explores the narrative, genre, nostalgia and fandoms of the phenomenally successful Netflix original series, *Stranger Things*. The book brings together scholars in the fields of media, humanities, communications and cultural studies to consider the various ways in which the Duffer Brothers' show both challenges and confirms pre-conceived notions of cult media. Through its three sections on texts, contexts and receptions, the collection examines all aspects of the series' presence in popular culture, engaging in debates surrounding cult horror, teen drama, fan practices, and contemporary anxieties in the era of Trump. Its chapters seek to address relatively neglected areas of scholarship in the realm of cult media, such as set design, fashion, and the immersive Secret Cinema Experience. These discussions also serve to demonstrate how cult texts are facilitated by the new age of television, where notions of medium specificity are fundamentally transformed and streaming platforms open up shows to extensive analysis in the now mainstream

world of cult entertainment.

How to Survive in a Stranger Things World (Stranger Things) Viking Juvenile

Over the course of the nation's history, the Constitution has been turned upside-down, Michael Greve argues in this provocative book. The Constitution's vision of a federalism in which local, state, and federal government compete to satisfy the preferences of individuals has given way to a cooperative, cartelized federalism that enables interest groups to leverage power at every level for their own benefit. Greve traces this inversion from the Constitution's founding through today, dispelling much received wisdom along the way. The Upside-Down Constitution shows how federalism's transformation was a response to states' demands, not an imposition on them. From

the nineteenth-century judicial elaboration of a competitive federal order, to the New Deal transformation, to the contemporary Supreme Court's impoverished understanding of constitutional structure, and the "devolution" in vogue today, Greve describes a trend that will lead to more government and fiscal profligacy, not less. Taking aim at both the progressive heirs of the New Deal and the vocal originalists of our own time, *The Upside-Down Constitution* explains why the current fiscal crisis will soon compel a fundamental renegotiation of a new federalism grounded in constitutional principles.

When the World Turned Upside Down HarperCollins

What if the path toward an extraordinary life is becoming more ordinary? Ordinary is not a call to be more radical. If anything, it is a call to the contrary. The kingdom of God isn't coming with light shows, and shock and awe, but with lowly acts of service. Tony Merida wants to push back against sensationalism and "rock star Christianity," and help people understand that they can make a powerful impact by practicing ordinary Christianity. Through things such as humble acts of service, neighbor love, and hospitality, Christians can shake the foundations of the culture. In order to see things happen that have never happened before, Christians must do what Christians have always done. Christians need to become more ordinary. Let's think together about how we, ordinary people, doing ordinary things, might turn the world upside down.

The Big Shrink (Upside-Down Magic #6) Ballantine Books

"A novelistic mosaic that simultaneously reads like a thriller and like a strange, dreamlike excursion into the subconscious." —The New York Times Years ago, when *House of Leaves* was first being passed around, it was nothing more than a badly bundled heap of paper, parts of which would occasionally surface on the Internet. No one could have anticipated the small but devoted following this terrifying story would soon command. Starting with an odd assortment of marginalized youth -- musicians, tattoo artists, programmers, strippers, environmentalists, and adrenaline junkies -- the book eventually made its way into the hands of older generations, who not only found themselves in those strangely arranged pages but also discovered a way back into the lives of their estranged children. Now this astonishing novel is made available in book form, complete with the original colored words, vertical footnotes, and second and third appendices. The story remains unchanged, focusing on a young family that moves into a small home on Ash Tree Lane where they discover

something is terribly wrong: their house is bigger on the inside than it is on the outside. Of course, neither Pulitzer Prize-winning photojournalist Will Navidson nor his companion Karen Green was prepared to face the consequences of that impossibility, until the day their two little children wandered off and their voices eerily began to return another story -- of creature darkness, of an ever-growing abyss behind a closet door, and of that unholy growl which soon enough would tear through their walls and consume all their dreams.
