The year 2008 marks the beginning of the baby boomer retirementavalanche just as the different demographics in advanced and mostdeveloping countries are becoming more pronounced. People areworrying again that developments in global population trends, foodsupply, natural resource availability and climate change raise thequestion as to whether Malthus was right after all. The Age of Aging explores a unique phenomenon for mankind and,therefore, one that takes us into uncharted territory. Low birthrates and rising life expectancy are leading to rapid aging and astagnation or fall in the number of people of working age inWestern societies. Japan is in pole position but will be joinedsoon by other Western countries, and some emerging marketsincluding China. The book examines the economic effects of aging,the main proposals for addressing the implications, and how agingsocieties will affect family and social structures, and the type ofenvironment in which the baby-boomers' children will grow up. The contrast between the expected old age bulge in Western nationsand the youth bulge in developing countries has importantimplications for globalization, and for immigration in Westerncountries - two topics already characterized by rising discontentor opposition. But we have to find ways of making bothglobalization and immigration work for all, for fear that failuremay lead us down much darker paths. Aging also brings newchallenges for the world to address in two sensitive areas, thepoliticization of religion and the management of internationalsecurity. Governments and global

institutions will have to takegreater responsibilities to ensure that public policy responses areappropriate and measured. The challenges arising within aging societies, and the demographiccontrasts between Western and developing countries make for afractious world - one that is line with the much-debated 'declineof the West'. The book doesn't flinch from recognizing the ways inwhich this could become more visible, but also asserts that we canaddress demographic change effectively if governments andstrengthened international institutions are permitted a larger rolein managing change.

An analysis of the welfare state from a political economy perspective that examines the effects of aging populations, migration, and globalization on industrialized economies. In The Decline of the Welfare State, Assaf Razin and Efraim Sadka use a political economy framework to analyze the effects of aging populations, migration, and globalization on the deteriorating system of financing welfare state benefits as we know them. Their timely analysis, supported by a unified theoretical framework and empirical findings, demonstrates how the combined forces of demographic change and globalization will make it impossible for the welfare state to maintain itself on its present scale. In much of the developed world, the proportion of the population aged 60 and over is expected to rise dramatically over the coming years—from 35 percent in 2000 to a projected 66 percent in 2050 in the European Union and from 27 percent to 47 percent in the United States—which may necessitate higher tax burdens and greater public debt to maintain national pension systems at current levels. Low-skill migration produces additional strains on welfare-state financing because such migrants typically receive benefits that exceed what they pay in taxes. Higher capital taxation, which could potentially be used to finance welfare benefits, is made unlikely by international tax competition brought about by globalization of the capital market. Applying a political economy model and drawing on empirical data from the EU and the United States, the authors draw an unconventional and provocative conclusion from these developments. They argue that the political pressure from both aging and migrant populations indirectly generates political processes that favor trimming rather than expanding the welfare state. The combined pressures of aging, migration, and globalization will shift the balance of political power and generate public support from the majority of the voting population for cutting back traditional welfare state benefits.

How can we measure poverty in the United Kingdom today, and which measures are most reliable? Is poverty related to other problems and disadvantages? Based on the largest research study on UK poverty ever commissioned, these fascinating volumes answer these questions and more, providing the most authoritative and up-to-date picture ever assembled of poverty throughout the four countries of the United Kingdom. Using state-of-the-art measurement methods, *Poverty and Social Exclusion in the UK* looks across geography, time, and key domains like health, employment, and housing to make enlightening--and sometimes shocking--comparisons. In the second volume, contributors consider different aspects of disadvantage, from access to local services, the world of work, the quality of housing and neighborhoods, and physical and mental health. They also look at wider aspects of social and community life, as well as participation in civic and political activities.

A Zen poem is nothing other than an expression of the enlightened mind, a handful of simple words that disappear beneath the moment of insight to which it bears witness. Poetry has been an essential aid to Zen Buddhist practice from the dawn of Zen—and Zen has also had a profound influence on the secular poetry of the countries in which it has flourished. Here, two of America's most renowned poets and translators provide an overview of Zen poetry from China and Japan in all its rich variety, from the earliest days to the twentieth century. Included are works by Lao Tzu, Han Shan, Li Po, Dogen Kigen, Saigyō, Bashō, Chiao Jan, Yuan Mei, Ryōkan, and many others. Hamill and Seaton provide illuminating introductions to the Chinese and Japanese sections that set the poets and their work in historical and philosophical context. Short biographies of the poets are also included.

Elements of Differential Geometry

Imagine that you are living in a country that does not recognize you as a citizen in spite of the fact that your people have maintained a continuous existence there for several centuries. If that was not enough of a traumatic experience, consider that because of your racial, ethnic and religious identity other ethnic groups that are fighting the brutal military regime in your country for their self-determination and human rights consider you as "settlers" from a neighboring country. It must be your worst nightmare when you realize that half of your people (almost 2 million) have been forced to take asylum or refuge outside, and you may be the next in line to seek a way out of this living hell of xenophobia, discrimination, intolerance, racism and bigotry. The victims are the Rohingya people of Burma (Myanmar). Because of their religion, race, ethnicity, color and language they are the most discriminated and persecuted people in our planet. Some argue that they are also one of the most forgotten. The Myanmar military regime has denied their citizenship rights, claiming that they are illegal settlers from nearby Bangladesh who have moved into Arakan during the British occupation of Burma in the 19th century. Is there any truth to such allegations? Does the military junta apply the same litmus test against all ethnic and religious groups in matters of citizenship? What is the basis for a nation's claim to self-determination? Must a people wander in the wilderness for two millennia and suffer repeated persecution, humiliation and genocide to qualify? How about the rights of a minority community to survive with their culture and traditions intact? Do they need to be 'children' of a 'higher' God to qualify? What makes the children of a 'lesser' God to be forgotten and denied the same treatment and privilege that was granted hitherto to other nations? For much of its history, Burma has been ruled by military. As has once again been demonstrated recently they are brutal, savage and tyrannical. They have ignored people's verdict in the election and imprisoned leaders and workers of the democracy movement. They cannot be guarantors or protectors of human rights of anyone, let alone religious and ethnic minorities. Do you know that the Rohingyas - face cruel restriction on marriage and those married without government authorization are paraded naked on the streets?- Are restricted from traveling outside their villages?- Have no legal right to own land or property?- Are restricted from getting education, finding work, getting medical and health care? - Are subjected to land confiscation, forced eviction and destruction of homes, offices, schools, mosques, shops, etc., and face religious persecution on a daily basis? - Are victims of staged riots, forced starvation, arbitrary taxation, extortion, arrest, torture and extra-judicial killings?- Are forced to do slave labor for establishment of government infrastructure, new Buddhist settlements, pagodas and monasteries on evicted lands with the government intent of changing the landscape and demography of Arakan?- Are forced to convert to Buddhism &/or worship Buddha? Do you know that when it comes to the Rohingya people, the Burmese government doesn't uphold any of the Articles of the Universal Declaration of Human Rights? Nothing can excuse us from the criminal silence that we practice in not voicing our concern about the plight of the Rohingya people. "The Forgotten Rohingya" makes a strong case for mobilizing concerned citizens of our globe to ease their sufferings. The author analyzes origin of the Rohingya people and offers ideas to solve their problem. The author also discusses problems of xenophobia and racism, which are so rampant in this country of many races, ethnicities and religions. He also analyzes the role of Daw Suu Kyi and failure of Burma's orange revolution.
