NATIONAL BESTSELLER • In this witty and warm-hearted account, Peter Mayle tells what it is like to realize a long-cherished dream and actually move into a 200-year-old stone farmhouse in the remote country of the Lubéron with his wife and two large dogs. He endures January's frosty mistral as it comes howling down the Rhône Valley, discovers the secrets of goat racing through the middle of town, and delights in the glorious regional cuisine. A Year in Provence transports us into all the earthy pleasures of Provençal life and lets us live vicariously at a tempo governed by seasons, not by days.

[Mediterranean Transit Migration](#) Hunter Publishing, Inc
 Guidebook to the Hebridean Way, a 155-mile (247km) trail across 10 of Scotland's Outer Hebrides islands. This waymarked, multi-day route is ideal for a fortnight's exploration, using mostly low-level paths and crossing a variety of terrain, from dazzling white shell beaches to rugged hills and wild moors. The official waymarked route starts in Vatersay in the south and finishes at Stornoway in the north, via Barra, Eriskay, South Uist, Benbecula, Grimsay, North Uist, Berneray, Harris and Lewis 10 daily stages of 10-22 miles (16-35km) in length, with optional 30-mile (48km) extension from Stornoway to the Butt of Lewis, which takes two days Clear route descriptions with 1:50,000 maps and details of refreshments, public transport and accommodation Includes notes on geology, history, plants and wildlife, and a glossary of Gaelic and Norse placenames GPX files available for download

Walk! Lanzarote Aurum

A guidebook to trekking the 560km (348 mile) GR131 across the Canary Islands. The island-hopping long-distance trail crosses Lanzarote, Fuerteventura, Gran Canaria, Tenerife, La Gomera, La Palma and El Hierro and can be hiked in around a month, or split into shorter sections. Most of the route uses quiet roads, tracks and old mule paths, but there are some remote stretches, as well as occasional steep and rocky mountain paths. The route is presented in 32 stages of between 7 and 30km (4-18 miles). Also included is an optional ascent of Spain's highest peak, El Teide on Tenerife. Clear route description illustrated with 1:50,000 mapping GPX files available to download Notes on accommodation, refreshments and local transport Information on

"The strongest overview I have encountered of the scope and the current state of research across all the fields involved in advancing our understanding of tourism. For its range of topics, depth of analyses, and distinction of its contributors, nothing is comparable." - Professor Dean MacCannell, University of California, Davis "The breadth of vision and sweep of accounts is remarkable, and range of topics laudable... a rare combination of the authoritative, the challenging and stimulating." - Professor Mike Crang, Durham University Tourism studies developed as a sub-branch of older disciplines in the social sciences, such as anthropology, sociology and economics, and newer applied fields of study in hospitality management, civil rights and transport studies. This Handbook is a sign of the maturity of the field. It provides an essential resource for teachers and students to determine the roots, key issues and agenda of tourism studies, exploring: The evolution and position of tourism studies The relationship of tourism to culture The ecology and economics of tourism Special events and destination management Methodologies of study Tourism and transport Tourism and heritage Tourism and postcolonialism Global tourist business operations Ranging from local to global issues, and from questions of management to the ethical dilemmas of tourism, this is a comprehensive, critically informed, constructively organized overview of the field. It draws together an inter-disciplinary group of contributors who are among the most celebrated names in the field and will be quickly recognized as a landmark in the new and expanding field of tourism studies.

The volcanic and oceanic nature of the Canary Islands, its rich plant biodiversity and high rate of endemism, as well as the relict character of some of its plant communities make it a territory of great biological interest. The main geographic, climatic, bioclimatic, biogeographic and floristic features of the Islands are shown and related to the distributional pattern of potential communities along an altitudinal gradient. Current vegetation units and their ecology are described and illustrated with numerous pictures. Potential vegetation units are summarized and comprehensive maps of the potential natural vegetation for each island are given. Human impact on the natural landscape, the occurrence of invasive plants, and the probable impact of climate change on the flora and vegetation are discussed. The conservation status of flora and vegetation are assessed. Four appendixes include a syntaxonomical scheme, a brief history of botanical studies and explorations in the Islands, ethnobotanical notes, and a list of selected literature.

Statistical information is an important tool for analysing changing patterns of urban development and the impact that policy decisions have on life in our cities, towns and suburbs. Urban Europe - statistics on cities, towns and suburbs provides detailed information for a number of territorial typologies that can be used to paint a picture of urban developments and urban life in the EU Member States, as well as EFTA and candidate countries. Each chapter presents statistical information in the form of maps, tables and figures, accompanied by a description of the policy context and a set of main findings. The publication is broken down into two parts : the first treats topics under the heading of city and urban developments, while the second focuses on the people in cities and the lives they lead. Overall there are 12 main chapters, covering : the urban paradox, patterns of urban and city developments, the dominance of capital cities, smart cities, green cities, tourism and culture in cities, living in cities, working in cities, housing in cities, foreign-born persons in cities, poverty and social exclusion in cities, as well as satisfaction and the quality of life in cities.
