This book constitutes the refereed and revised proceedings of the workshops and the doctoral consortium co-located with the 10th International Conference on Perspectives in Business Informatics Research (BIR), held in Riga, Latvia, in October 2011. The four workshops focused on Information Logistics and Knowledge Supply for Viable Enterprises (ILOG 2011), Alignment of Business Processes and Security Modeling (ABPSM 2011), Intelligent Educational Systems and Technology-Enhanced Learning (INTEL-EDU 2011), and User-Oriented Information Integration (UOII 2011). The two best papers from the doctoral consortium are

also included.

Marketing Law Springer Nature

This book constitutes the refereed proceedings of the 16th International Conference on Verification, Model Checking, and Abstract Interpretation, VMCAI 2015, held in Mumbai, India, in January 2015. The 24 revised full papers presented were carefully reviewed and selected from 53 submissions. The papers cover a wide range of topics including program verification, model checking, abstract interpretation, abstract domains, program synthesis, static analysis, deductive methods, program certification, error diagnosis, program transformation, and hybrid and cyberphysical systems. Workshops on Business Informatics Research Oxford University Press  
 Recent research results in the area of parallel algorithms for problem solving,

search, natural language parsing, and computer vision, are brought together in this book. The research reported demonstrates that substantial parallelism can be exploited in various machine intelligence and vision problems. The chapter authors are prominent researchers actively involved in the study of parallel algorithms for machine intelligence and vision. Extensive experimental studies are presented that will help the reader in assessing the usefulness of an approach to a specific problem. Intended for students and researchers actively involved in parallel algorithms design and in machine intelligence and vision, this book will serve as a valuable reference work as well as an introduction to several research directions in these areas.

*Drug and Alcohol Testing of Commercial*

*Motor Vehicle Drivers* Routledge  
Physical Education for Children With Moderate to Severe Disabilities offers a comprehensive view of the inclusion of students with disabilities, including instruction, assessment, collaborative practices, communication protocols, and skill analysis. The text is relevant for all teaching environments and includes sample lesson plans aligned with grade-level outcomes.

*Implementation and Application of Automata* John Wiley & Sons

A sentence of first-order logic is satisfiable if it is true in some structure, and finitely satisfiable if it is true in some finite structure. The question arises as to whether there exists an algorithm for determining whether a given formula of first-order logic is satisfiable, or indeed finitely satisfiable. This question was answered negatively in 1936 by Church and Turing (for satisfiability) and in 1950 by Trakhtenbrot (for finite satisfiability). In contrast, the satisfiability and finite satisfiability problems are algorithmically solvable for restricted subsets—or, as we say, fragments—of first-order logic, a fact which is today of considerable interest in Computer Science. This book provides an up-to-date survey of the principal axes of research, charting the limits of decision in first-order logic and exploring the trade-off between expressive power and complexity of reasoning. Divided into three parts, the book considers for which fragments of first-order logic there is an effective method for determining satisfiability or finite satisfiability. Furthermore, if these problems are decidable for some fragment, what is their computational complexity? Part I focusses on fragments defined by restricting the set of available formulas. Topics covered include the Aristotelian syllogistic and its relatives, the two-variable fragment, the guarded fragment, the quantifier-prefix fragments and the fluted fragment. Part II investigates logics with counting quantifiers. Starting with De Morgan's numerical generalization of the Aristotelian syllogistic, we proceed to the two-variable fragment with counting quantifiers and its guarded subfragment, explaining the applications of the latter to the problem of query answering in structured data. Part III concerns logics characterized by semantic constraints, limiting the available interpretations of certain predicates. Taking propositional modal logic and graded modal logic as our cue, we return to the satisfiability problem for two-variable first-order logic and its relatives, but this time with certain distinguished binary predicates

constrained to be interpreted as equivalence relations or transitive relations. The work finishes, slightly breaching the bounds of first-order logic proper, with a chapter on logics interpreted over trees.

**Readings in Agents** Kluwer Law International B.V.

Contains systems of records maintained on individuals by Federal agencies which were published in the Federal Register and rules of each agency concerning the procedures the agency will use in helping individuals who request information about their records.

Authentic Assessment and Evaluation Approaches and Practices in a Digital Era Human Kinetics

Exploring the advantages and disadvantages of codifying contract law, this book considers the question from the perspectives of both civil and common law systems, referring in detail to issues of international and consumer law. With contributions from leading international scholars, the chapters present a range of opinions on the virtues of codification, encouraging further debate on this topic. The book commences with a discussion on the internationalization imperative for codification of contract law. It then turns to regional issues, exploring first codification attempts in the European Union and Japan, and then issues relevant to codification in the common law jurisdictions of Australia, New Zealand and the United States. The collection concludes with two chapters which consider the need to draw upon both private and comparative international law perspectives to inform any codification reforms. This book will be of interest to international and comparative contract law academics, as well as regulators and policy-makers.

**International Responses to Issues of Credit and Over-indebtedness in the Wake of Crisis** Springer Science & Business Media

Examining the factors that shaped the first interim governments of Tunisia and Libya, which formed in the immediate aftermath of the 2011 uprisings that brought down their governments, Managing Transition analyses each interim government to enhance our understanding of how political transition occurred within two North African countries. Tracing the importance of the key decisions made during these transition periods, Sabina Henneberg demonstrates the importance of these decisions taken during the short phase between authoritarian collapse and first post-uprising elections, including decisions around leadership, institutional

reform, transitional justice, and the electoral processes themselves. By documenting, in close detail, the important events of the 2011 Arab Uprisings, and the months that followed, this study shows that while pre-existing structures strongly influence the design and behaviour of first interim governments, actors' choices are equally important in shaping both immediate and longer-term phases of transition.

Troubled Waters Springer Science & Business Media

This book collects the most significant literature on agents in an attempt to forge a broad foundation for the field. Includes papers from the perspectives of AI, databases, distributed computing, and programming languages. The book will be of interest to programmers and developers, especially in Internet areas.

The Liberalization of Electricity and Natural Gas in the European Union Springer Science & Business Media

The series Advances in Industrial Control aims to report and encourage technology transfer in control engineering. The rapid development of control technology impacts all areas of the control discipline. New theory, new controllers, actuators, sensors, new industrial processes, computer methods, new applications, new philosophies ... , new challenges. Much of this development work resides in industrial reports, feasibility study papers and the reports of advanced collaborative projects. The series offers an opportunity for researchers to present an extended exposition of such new work in all aspects of industrial control for wider and rapid dissemination. In Europe, and soon in the United States, power system deregulation is becoming widespread. This involves the privatisation of former public power utilities and the creation of power markets. The United Kingdom has recently undergone this transformation and the countries of the European Union are being encouraged to follow this deregulation policy. This volume Advanced Load Dispatch for Power Systems and its companion volume Control of Modern Integrated Power Systems both by Professor E. Mariani and Professor S.S. Murthy are therefore very timely additions to the power system literature and to the Advances in Industrial Control series. Strategies for Inclusion Springer Science & Business Media  
This book offers concrete examples of how data can be used by faculty, staff, and program leaders to improve their collective work as teacher educators. Strong external accountability mandates often lead to tensions that undermine local

morale and motivation. This volume focuses on the practical work of navigating these tensions so that valuable programmatic change can happen. It describes policies and practices drawn from a study of "high data use" teacher education programs from around the country that have strategically engaged the challenges of learning to use data for program improvement. Readers will see how the data-use work carried out in these programs strengthened local program identity and coherence. Representing a collaborative effort between researchers and practitioners, this volume presents lessons learned to assist teacher educators who are engaged daily with the challenges of making data useful and used in their programs. Book Features: Examples of how tensions between external mandates for accountability and program improvement can be navigated in ways that are grounded in local program values. Detailed case study portraits of individual programs that offer a full and action-oriented sense of data use work. Strategies for ensuring that data systems are responsive to multiple stakeholders, such as faculty, administrators, students, and policymakers. A diversity of perspectives and experiences from small liberal arts colleges, large teacher preparation institutions, and research-intensive universities.

**High Performance Computing - HiPC 2008** Springer Science & Business Media "The new 4th edition of Seider's 'Product and Process Design Principles : Synthesis, Analysis and Design' covers content for process design courses in the chemical engineering curriculum, showing how process design and product design are inter-linked and why studying the two is important for modern applications. A principal objective of this new edition is to describe modern strategies for the design of chemical products and processes, with an emphasis on a systematic approach. This fourth edition presents two parallel tracks : (1) product design ("what to make"), and (2) process design ("how to make"), with an emphasis on process design. Process design instructors can show easily how product designs lead to new chemical processes. Alternatively, product design can be taught in a separate course subsequent to the process design course."--adapted from description on publisher web site.

Fragments of First-Order Logic Cambridge University Press

This book constitutes revised papers from the twelve International Workshops held at the 17th International Conference on

Business Process Management, BPM 2019, in Vienna, Austria, in September 2019: The third International Workshop on Artificial Intelligence for Business Process Management (AI4BPM) The third International Workshop on Business Processes Meet Internet-of-Things (BP-Meet-IoT) The 15th International Workshop on Business Process Intelligence (BPI) The first International Workshop on Business Process Management in the era of Digital Innovation and Transformation (BPMInDIT) The 12th International Workshop on Social and Human Aspects of Business Process Management (BPMS2) The 7th International Workshop on Declarative, Decision and Hybrid approaches to processes (DEC2H) The second International Workshop on Methods for Interpretation of Industrial Event Logs (MIEL) The first International Workshop on Process Management in Digital Production (PM-DiPro) The second International Workshop on Process-Oriented Data Science for Healthcare (PODS4H) The fourth International Workshop on Process Querying (PQ) The second International Workshop on Security and Privacy-enhanced Business Process Management (SPBP) The first International Workshop on the Value and Quality of Enterprise Modelling (VEnMo) Each of the workshops discussed research still in progress and focused on aspects of business process management, either a particular technical aspect or a particular application domain. These proceedings present the work that was discussed during the workshops. *Goals and Priorities of the Member Tribes of the National Congress of American Indians and the United South and Eastern Tribes* Springer

Provides a detailed analysis of the economic and scientific rationales for biodiversity conservation.

Internal Revenue Bulletin Federation Press Strategies for Inclusion, Fourth Edition, provides a clear road map for successful inclusion of students with disabilities in physical education settings. It contains 38 teachable units, complete with assessment tools for curriculum planning, teaching tips, and ready-to-use forms and charts.

*Managing Transition* Springer Science & Business Media

The IUTAM Symposium on "Non-Linear Singularities in Deformation and Flow" took place from March 17 to 21, 1997, at the Technion in Haifa, Israel, with 70 participants from 12 countries. The leitmotif of this Symposium brought together scientists working on singularity-dominated local fields in various branches of continuum mechanics, covering

traditional solid and liquid behaviour as well as that of more complex non-linear materials; non-linearities arise either from the constitutive equations for the material or from the presence of interfaces or both. The scientific committee invited speakers who presented 34 papers in 12 sessions. Topics covered in the lectures included near tip fields of cracks, notches and wedges; flow around corners, wedges and cones; interfacial phenomena; moving contact lines in multiphase systems; cusps in fluid interfaces and shocks and localization. There was a general consensus among the participants that singularities induced by non-linearities provide a challenging and currently important area of research in mechanics, engineering and applied mathematics. Presentation and discussions during the symposium initiated further studies of problems in these interesting areas. This volume contains 30 full length papers, submitted by the lecturers after the symposium and reviewed to the standards of international scientific periodicals. It is our pleasure to acknowledge the efficient and tireless help of Mrs. Alice Goodman and Mr. Gideon Wachsmann of the Faculty of Aerospace Engineering at the Technion. David Durban Anthony Pearson Haifa Cambridge April 1998 IX International Scientific Committee C. Atkinson (UK) G. I. Barenblatt (USA) H. -c.

Multicultural Education Cambridge University Press

Marketing Law covers Australian and applicable international laws applying to manufacturing, packaging, labelling, advertising, promotion, pricing and the sale of goods and services. The authors outline the applicable legal principles and legislation, and cover the extensive case law, with extracts of critical cases. There are 12 chapters: The Expression of Ideas - Copyright, Branding, Designs and Inventions, Consumer Protection, Defamation, Confidential Information, Unfair Selling Practices, Product Liability, Arrangements Restricting Competition, Exclusive Dealing, Misuse of Market Power, and Insurance. Topics covered include: statutory frameworks applying to copyright, designs, trade marks and patents; the common law tort of passing off applying to unfair selling practices; confidential information; potential defamatory liability; legislation in relation to product quality and liability; trade practices laws and the responsibilities of marketers; restrictive trade practices, with specific emphasis on the prohibitions on arrangements restricting competition, exclusive dealing and misuse of market power.

Intellectual Property Rights andBiodiversity Conservation ANU E Press

In this important book, notable European experts in the energy field provide valuable perspectives on the principal issues raised by the liberalisation of the electricity and natural gas markets in the EU. Lawyers, business people, regulators, and policymakers who deal with matters and issues in the energy, natural resources, and environmental fields will find the details and insights presented

here of great value.

**Using Data to Improve Teacher Education** Routledge

This book constitutes the refereed proceedings of the 15th International Conference on High-Performance Computing, HiPC 2008, held in Bangalore, India, in December 2008. The 46 revised full papers presented together with the abstracts of 5 keynote talks were carefully reviewed and selected from 317 submissions. The papers are organized in topical sections on applications

performance optimization, parallel algorithms and applications, scheduling and resource management, sensor networks, energy-aware computing, distributed algorithms, communication networks as well as architecture.

Competition Laws Outside the United States Human Kinetics

On a special field trip in the magic school bus, Ms. Frizzle's class goes into outer space and visits each planet in the solar system.
