Dosso Dossi has long been considered one of Renaissance Italy's most intriguing artists. Although a wealth of documents chronicles his life, he remains, in many ways, an enigma, and his art continues to be as elusive as it is compelling. In *Dosso's Fate*, leading scholars from a wide range of disciplines examine the social, intellectual, and historical contexts of his art, focusing on the development of new genres of painting, questions of style and chronology, the influence of courtly culture, and the work of his collaborators, as well as his visual and literary sources and his painting technique. The result is an important and original contribution not only to literature on Dosso Dossi but also to the study of cultural history in early modern Italy.

Situated at the intersection of scholarship and practice, *Heritage Keywords* positions cultural heritage as a transformative tool for social change. This volume unlocks the persuasive power of cultural heritage—as it shapes experiences of change and crafts present and future possibilities from historic conditions—by offering new ways forward for cultivating positive change and social justice in contemporary social debates and struggles. It draws inspiration from deliberative democratic practice, with its focus on rhetoric and redescription, to complement participatory turns in recent heritage work. Through attention to the rhetorical edge of cultural heritage, contributors to this volume offer innovative reworkings of critical heritage categories. Each of the fifteen chapters examines a key term from the field of heritage practice—authenticity, civil society, cultural diversity, cultural property, democratization, difficult heritage, discourse, equity, intangible heritage, memory, natural heritage, place, risk, rights, and sustainability—to showcase the creative potential of cultural heritage as it becomes mobilized within a wide array of social, political, economic, and moral contexts. This highly readable collection will be of interest to students, scholars, and professionals in heritage studies, cultural resource management, public archaeology, historic preservation, and related cultural policy fields. Contributors include Jeffrey Adams, Sigrid Van der Auwera, Melissa F. Baird, Alexander Bauer, Malcolm A. Cooper, Anna Karlström, Paul J. Lane, Alicia Ebbitt McGill, Gabriel Moshenska, Regis Pecos, Robert Preucel, Trinidad Rico, Cecelia Rodéhn, Joshua Samuels, Kathryn Lafrenz Samuels, and Klaus Zehbe.

Consideration of the interactions between decisions made at one point in the supply chain and its effects on the subsequent stages is the core concept of a systems approach. Postharvest Handling is unique in its application of this systems approach to the handling of fruits and vegetables, exploring multiple aspects of this important process through chapters written by experts from a variety of backgrounds. Newly updated and revised, this second edition includes coverage of the logistics of fresh produce from multiple perspectives, postharvest handling under varying weather conditions, quality control, changes in consumer eating habits and other factors key to successful postharvest handling. The ideal book for understanding the economic as well as physical impacts of postharvest handling decisions. Key Features: *Features contributions from leading experts providing a variety of perspectives *Updated with 12 new chapters *Focuses on application-based information for practical implementation *System approach is unique in the handling of fruits and vegetables

This volume was created initially from a symposium of the same name presented at the International Primatological Society's XVIII Congress in Adelaide, South Australia, 6-12 January 2000. Many of the authors who have contributed to this text could not attend the symposium, so this has become another vehicle for the rapidly growing discipline of Fragmentation Science among primatologists. Fragmentation has quickly become a field separate from general ecology, which underscores the severity of the situation since we as a planet are rapidly losing habitat of all types to human disturbance. Getting ecologists, particularly primatologists, to admit that they study in fragments is not easy. In the field of primatology, one studies many things, but rarely do those things (genetics, behavior, population dynamics) get called out as studies in fragmentation. For some reason "fragmentation primatologists" fear that our work is somehow "not as good" as those who study in continuous habitat. We worry that perhaps our subjects are not demonstrating as robust behaviors as they "should" given fragmented or disturbed habitat conditions. I had a colleague openly state that she did not work in fragmented forests, that she merely studied behavior when it was clear that her study sites, everyone of them, was isolated habitat. Our desire to be just another link in the data chain for wild primates is so strong that it makes us deny what kinds of habitats we are working in. However,

Scientists rarely take 'paranormal experiences' seriously. Furthermore, in the recent past the concept of the 'paranormal' did not even exist in philosophy. William James, who extensively studied mediumistic phenomena, labelled them 'wild beasts of the philosophical desert'. This book demonstrates that to important philosophers - from Kant to Derrida - controversial phenomena like telepathy and clairvoyance were serious topics. The authors of this collection have studied relevant texts that have hitherto received little attention, and illustrate how each of the philosophers in question thoughtfully interpreted exceptional experiences that seem to go beyond our understanding.

The books in the Florida and the Caribbean Open Books Series demonstrate the University Press of Florida's long history of publishing Latin American and Caribbean studies titles that connect in and through Florida, highlighting the connections between the Sunshine State and its neighboring islands. Books in this series show how early explorers found and settled Florida and the Caribbean. They tell the tales of early pioneers, both foreign and domestic. They examine topics critical to the area such as travel, migration, economic opportunity, and tourism. They look at the growth of Florida and the Caribbean and the attendant pressures on the environment, culture, urban development, and the movement of peoples, both forced and voluntary. The Florida and the Caribbean Open Books Series gathers the rich data available in these architectural, archaeological, cultural, and historical works, as well as the travelogues and naturalists' sketches of the area in prior to the twentieth century, making it accessible for scholars and the general public alike. The Florida and the Caribbean Open Books Series is made possible through a grant from the National Endowment for the Humanities and the Andrew W. Mellon Foundation, under the Humanities Open Books program.

In this visual complement to *The Andy Warhol Diaries*—a snake who might be Warhol himself chronicles his attempts to scale the social ladder. This is the never-before-published story of a snake trying to make it in the world of sixties high society, strongly suggested to be a stand-in for Warhol himself. The snake's tongue-in-cheek observations as he slithers from adorning Jackie Kennedy's boots to embellishing Coco Chanel's shirt will delight the sophisticated fashion crowd. But the stars of the show are Warhol's whimsical illustrations, revived with a color scheme inspired by his iconic Pop Art. Before he achieved his dream of making it big in New York, Andy Warhol worked in advertising for a leather goods company, Fleming-Joffe, alongside Ogden Nash and Piero Fornasetti. It was for Fleming-Joffe that he created these images, held by the Warhol Museum in Pittsburgh, Pennsylvania, and rarely seen until this deluxe publication. *The Autobiography of a Snake* is a brilliant portrait of Warhol's obsessions, his talent, and the world he would one day conquer.

Pastoral Quechua explores the story of how the Spanish priests and missionaries of the Catholic church in post-conquest Peru systematically attempted to "incarnate" Christianity in Quechua, a large family of languages and dialects spoken by the dense Andes populations once united under the Inca empire. By codifying (and imposing) a single written standard, based on a variety of Quechua spoken in the former Inca capital of Cuzco, and through their translations of devotional, catechetical, and liturgical texts for everyday use in parishes, the missionary translators were on the front lines of Spanish colonialism in the Andes. The Christian pastoral texts in Quechua are important witnesses to colonial interactions and power relations.

Durston examines the broad historical contexts of Christian writing in Quechua; the role that Andean religious images and motifs were given by the Spanish translators in creating a syncretic Christian-Andean iconography of God, Christ, and Mary; the colonial linguistic ideologies and policies in play; and the mechanisms of control of the subjugated population that can be found in the performance practices of Christian liturgy, the organization of the texts, and even in certain aspects of grammar.

"IN THE FUTURE EVERYBODY will be world famous for 15 minutes." The Campbell's Soup Cans. The Marilyns. The Electric Chairs. The Flowers. The work created by Andy Warhol elevated everyday images to art, ensuring Warhol a fame that has far outlasted the 15 minutes he predicted for everyone else. His very name is synonymous with the 1960s American art movement known as Pop. But Warhol's oeuvre was the sum of many parts. He not only produced iconic art that blended high and popular culture; he also made controversial films, starring his entourage of the beautiful and outrageous; he launched *Interview*, a slick magazine that continues to sell today; and he reveled in leading the vanguard of New York's hipster lifestyle. The Factory, Warhol's studio and den of social happenings, was the place to be. Who would have predicted that this eccentric boy, the Pittsburgh-bred son of Eastern European immigrants, would catapult himself into media superstardom? Warhol's rise, from poverty to wealth, from obscurity to status as a Pop icon, is an absorbing tale—one in which the American dream of fame and fortune is played out in all of its success and its excess. No artist of the late 20th century took the pulse of his time—and ours—better than Andy Warhol. Since its creation in 1963, United States Southern Command has been led by 30 senior officers representing all four of the armed forces. None has undertaken his leadership responsibilities with the cultural sensitivity and creativity demonstrated by Admiral Jim Stavridis during his tenure in command. Breaking with tradition, Admiral Stavridis discarded the customary military model as he organized the Southern Command Headquarters. In its place he created an organization designed not to subdue adversaries, but instead to build durable and enduring partnerships with friends. His observation that it is the business of Southern Command to launch "ideas not missiles" into the command's area of responsibility gained strategic resonance throughout the Caribbean and Central and South America, and at the highest levels in Washington, DC.

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

Despite being the female patron saint of Ireland and one of the most remarkable women in Irish history, St. Brigid has always been an elusive figure. Some scholars have argued that she never existed as a real person but was merely the Christian personification of the cult of a pagan goddess of the same name. This book reviews all the evidence—history, legend and folklore—and concludes that while she has many of the attributes of the goddess Brigit, she was certainly a real person. The book also reviews her cult and veneration in Ireland and overseas, from her lifetime down to the present day, as attested by place-names, holy wells, and folklore, and also by the large numbers of churches (Roman Catholic and Church of Ireland), schools, and GAA clubs dedicated to her.
