At the center of this pioneering work in modern European history is the German word Heimat—the homeland, the local place. Translations barely penetrate the meaning of the word, which has provided the emotional and ideological common ground for a variety of associations and individuals devoted to the cause of local preservation. Celia Applegate examines at both the national and regional levels the cultural meaning of Heimat and why it may be pivotal to the troubled and very timely question of German identity. The ideas and activities clustered around Heimat shed new light particularly on problems of modernization. Instead of viewing the Germans as a dangerously anti-modern people, Applegate argues that they used the cultivation of Heimat to ground an abstract nationalism in their attachment to familiar places and to reconcile the modern industrial and urban world with the rural landscapes and customs they admired. Primarily a characteristic of the middle classes, love of Heimat constituted an alternative vision of German unity to the familiar aggressive, militaristic one. The Heimat vision of Germany emphasized cultural diversity and defined German identity by its internal members rather than its external enemies. Applegate asks that we re-examine the continuities of German history from the perspective of the local places that made up Germany, rather than from that of prominent intellectuals or national policymakers. The local patriotism of Heimat activists emerges as an element of German culture that persisted across the great divides of 1918, 1933, and 1945. She also suggests that this attachment to a particular place is a feature of Europeans in general and is deserving of further attention. This 2011 book is a history of religious life in the Ancient Near East from the beginnings of agriculture to Alexander the Great's invasion in the 300s BCE. Daniel C. Snell traces key developments in the history, daily life and religious beliefs of the people of Ancient Mesopotamia, Egypt, Israel and Iran. His research investigates the influence of those ideas on the West, with particular emphasis on how religious ideas from this historical and cultural milieu still influence the

way modern cultures and religions view the world. Designed to be accessible to students and readers with no prior knowledge of the period, the book uses fictional vignettes to add interest to its material, which is based on careful study of archaeological remains and preserved texts. The book will provide a thoughtful summary of the Ancient Near East and includes a comprehensive bibliography to guide readers in further study of related topics.

I watch for a moment, my heart explodes. This little girl, dressed in white, her face bright as she swirls and twirls, dancing in the sunshine. 'Mummy!' she says, running towards me. I catch her, no question. 'Mummy, you're here,' she says.' And I hold her tight. Imagine you get home one day... and waiting for you on your doorstep is a gift. It is wrapped beautifully, and inside is a notebook, its pages empty. There is no message. But its sender has a story to tell. About a secret. About the little girl you once were. About everything you know about your family. The gifts keep arriving. But when tragedy strikes – leaving your beloved only daughter fighting for her life – the person who has been sending the gifts will have no choice but to come forward. And to finally tell the truth. The pioneers of ecological architecture today are necessarily researchers as much as architects, in any conventional sense of the term. Sustainability is the key criterion in this field, and ecologically sound solutions for the designs of homes are the key challenge (homes the most commonly built structure). Ecological Living assesses a selection of some recently built ecological habitats, collecting several built examples from a variety of French architects, examining precursors such as Frank Lloyd Wright, Alvar Aalto and Pierre Lajus, plus proposals for European architects and architecture students and inquiries into the ecological viability of detached housing and tower blocks. The book is structured in thematic chapters, such as "Why is Action So Urgent," "The Precursors of Eco-Responsible," "An International Panorama of the State of the Art" and "Into Action!"

"I have seen yesterday. I know tomorrow." This inscription in Tutankhamun's tomb summarizes The Fifth Beginning. Here, archaeologist Robert L. Kelly explains how the study of our cultural past can predict the future of humanity. In an eminently readable style, Kelly identifies four key pivot points in the six-million-year history of human development: the emergence of technology, culture, agriculture, and the state. In each example, the author examines the long-term processes that resulted in a definitive, no-turning-back change for the organization of society. Kelly then looks ahead, giving us evidence for what he calls a fifth beginning, one that started about AD 1500. Some might call it "globalization," but the author places it in its larger context: a five-thousand-year arms race, capitalism's global reach, and the cultural effects of a worldwide communication network. Kelly predicts that the emergent phenomena of this fifth beginning will include the end of war as a viable way to resolve disputes, the end of capitalism as we know it, the widespread shift toward world citizenship, and the rise of forms of cooperation that will end the near-sacred status of nation-states. It's the end of life as we have known it. However, the author is cautiously optimistic: he dwells not on the coming chaos, but on humanity's great potential.

In January 2014 Henning Mankell was informed that he had cancer. However, Quicksand is not a book about death, but about what it means to be human. Mankell writes about love and jealousy, courage and fear, about what it is like to live with a fatal illness. This book is also about why the cave painters 40,000 years ago chose the very darkest places for their fascinating pictures. And about the dreadful troll that we are trying to lock away inside the bedrock of a Swedish mountain for the next 100,000 years. It is a book about how humanity has lived and continues to live, and about how Henning lived his own life. And, not least, about the great zest for life, which came back when he managed to drag himself out of the quicksand that threatened to suck him down into the abyss.

From bestselling poet Daniel Ladinsky, a rich collection that brings the great Sufi poet Hafiz to Western readers. To Persians, the poems of Hafiz are not "classical literature" from a remote past but cherished wisdom from a dear and intimate friend that continues to be quoted in daily life. With uncanny insight, Hafiz captures the many forms and stages of love. His poetry outlines the stages of the mystic's "path of love"—a journey in which love dissolves personal boundaries and limitations to join larger processes of growth and transformation. With this stunning collection, Ladinsky has succeeded brilliantly in capturing the essence of one of Islam's greatest poetic and spiritual voices. "If you haven't yet had the delight of dining with Daniel Ladinsky's sweet, playful renderings of the musings of the great saints, *I Heard God Laughing* is a perfect appetizer. . . . This newly released edition of his first playful foray into Hafiz's divinely inspired poetry is essential reading. . . . Ladinsky is a master who will be remembered for finally bringing Hafiz alive in the West." —Alexandra Marks, *The Christian Science Monitor*
