Drug Information Handbook for Psychiatry 1999-2000 Elsevier Health Sciences

Increasing demands on acute hospital resources, together with a reduction in the number of available beds, has placed a greater emphasis on the need for rapid and effective assessment of patients in order to determine their need for hospital admission. This has led to the widespread emergence of the specialist Medical Assessment Unit (MAU). This timely book provides an up-to-date guide to the assessment and immediate management of patients with acute medical conditions. It presents a structured approach based on common presenting features and focuses on the first twenty four hours of the patient's stay in hospital. In writing this book, the editors have been able to draw on their own clinical experiences as a charge nurse in Accident and Emergency nursing and a sister in acute cardiology and respectively.

Nursing Pharmacology Elsevier Health Sciences

Medical-Surgical Nursing: An Integrated Approach, 2E examines all aspects of this nursing field, from how and where the health care delivery system is set up, to the nurse's role in care related to IV therapy and diagnostic testing, to legal and ethical responsibilities, communication, and cultural diversity. This revised edition also includes new chapters covering alternative therapies, and responding to emergencies. Case studies, critical thinking questions, and exercises developing care plans encourage students to think beyond the classroom. Full color illustrations, cross-referencing between chapters, and suggested resources are among the many features that will appeal to students. Diagnostic tests are listed alphabetically in chart form making important information about the test, normal values and nursing responsibilities easy to find. Chapter end critical thinking questions help students apply chapter content. "Web Flash" box suggests Internet sites students can consult for additional information. Text includes a glossary, a list of abbreviations and acronyms, a listing of the latest NANDA nursing diagnoses and Standard Precautions

Drug Information Handbook 1999-2000 CRC Press

Adult Health Nursing, the full-color companion text to Foundations of Nursing by the same author team gives LPN/LVNs the basic anatomy and physiology and medical-surgical content they need. Available separately or packaged, these two texts taken together provides all the content covered in the entire LPN/LVN curriculum. The nursing process is applied consistently and logically to the discussion of disorders and appears in complete summary form at the end of every chapter. Full-color art, photography, and design add visual appeal to text content. An Overview of Anatomy and Physiology opens all body systems chapters. Objectives are divided into Anatomy & Physiology and Medical-Surgical categories. Nursing Care Plans are developed around specific case studies with an emphasis on patient goals, outcomes, and questions to promote critical thinking. Clinical Pathways reflect collaborative care. Assessment is separated out into Subjective and Objective Data. Nursing Diagnoses paired with disorder-appropriate Nursing Interventions are screened and highlighted in the text. Critical Thinking Questions are found at the end of every Nursing Care Plan. Therapeutic Dialogue boxes focus on communication through real-life examples of nurse-patient dialogue. Patient Teaching boxes examine discharge instructions and health promotion for patients and families. Home Health Considerations boxes discuss issues facing patients and caregivers in the home care setting. Older Adult Considerations boxes bring a gerontologic perspective to the analysis of specific disorders. Cultural and Ethnic Considerations boxes teach students about specific cultural preferences and how to address the needs of cultural diversity when planning nursing care. Medications tables provide quick access to action, dosage, precautions, and nursing considerations for commonly used drugs. Key Terms appear with phonetic pronunciations at the beginning of the chapter, are in color at first mention, and are defined in the Glossary. Pronunciations have been reviewed by an English as a Second Language (ESL) consultant. TOC reorganized based on reviewers' suggestions to improve accessibility of content. Complementary and Alternative Therapy boxes in nearly every chapter give a breakdown of specific therapies, along with precautions and possible side effects. End-of-chapter pedagogy is reorganized, with Key Points and Chapter Challenge (Study

Questions) immediately following the end of the narrative. Chapter Challenge ends the chapter with NCLEX-style multiple-choice Study Questions. References and Suggested Readings are revised and updated and, where applicable, are followed by Additional Resources such as agencies and websites. Grouped by chapter at the end of the book. Enhanced and upgraded ancillary package *Medical Assessment Units* Elsevier Health Sciences. This vast, comprehensive reference book provides the most current and reliable drug information available. Now updated for 2006, it contains approximately 1,000 generic drugs and many more prescription drug products indexed by generic and brand names. The CD-ROM provides instant access to the entire database, along with customizable patient information handouts in English and Spanish and evidence-based herbal and supplement information.

This convenient chair-side drug reference for dentists, dental hygienists, and dental assistants offers essential drug information in a succinct, accessible format. The user-friendly design provides easy access to essential information on drugs commonly taken by patients. Drugs are presented alphabetically by generic name in a logical and consistent format. An easy-to-use alphabetic cross-index offers quick access to both brand and generic name drugs. A second index, based on a therapeutic and pharmacologic classification, can also be used to quickly locate drug monographs. Useful fact tables are located on the inside covers and in the appendices. Offers information on drug, food, and herbal interactions. A "Do Not Confuse With" appendix includes a listing of similar sounding generic and trade names that could be confused, thus resulting in medication errors. Includes a section on Medically Compromised Patients. Dental alert icons highlight oral side effects. Drug interaction icons designate interactions of concern to dentistry. Maple leaf icons indicate common brand names for the generic drug sold only in Canada. Provides information on the top 200 prescription drugs in the United States. Provides complete monographs for 50 herbal and nonherbal remedies. Includes complete and consistent monographs of more than 850 commonly used drug products. Focuses on drug interactions of clinical interest. Offers pregnancy risk category, controlled substance schedule, and over-the-counter status. Alphabetic index. Therapeutic/pharmacologic index. The Dental Considerations section in individual drug monographs includes dental treatment warnings related to medical indications for the drug. It also offers treatment plan modifications related to drug side effects. A CD-ROM bound in the back of each book contains 30 full-color pathologic conditions that may result from drugs patients are taking. Each drug is cross-referenced to the page in the book where the drug is discussed. The CD also contains 950 patient education sheets (customizable to include specific practice information). These sheets provide patients with invaluable drug information and specific instructions, and all are available in both English and Spanish.
