The Nursing Associate's
 Handbook of Clinical Skills

The Nursing Associate's
 Handbook of Clinical Skills

provides evidence-based
 guidance for those

undertaking the newly
 developed Nursing

Associate (NA) role that
 bridges the gap between

the Health Care Assistant
 (HCA) and the Registered

Nurse (RN). Structured
 around the latest Nursing

and Midwifery Council (NMC) Proficiencies, this invaluable handbook helps the prospective Nursing Associates develop the skills and core competencies required to succeed in a broad range of healthcare contexts—covering more than 90 procedures, and communication and relationship management skills. This timely resource features contributions from a team of experienced clinicians and academics, addressing clinical procedures on topics including skin

integrity, nutrition and hydration, mobility and safety, respiratory care, managing infection, administering medicine, and end of life care. Clear, accessible chapters contain a wealth of effective learning tools, including self-assessment tests, review questions, links to electronic resources, supporting evidence, and more. This must-have textbook: Helps trainee Nursing Associates to develop and refine their skills, and demonstrate proficiency in offering care and

support Reflects current NMC annexes, providing practical guidance on a diverse range of communication skills, strategies and procedures Covers the central elements of Nursing Associate care provision, including delivery, monitoring, and reviewing Includes colour illustrations, photographs, tables, charts, graphs, and algorithms designed to develop skills and demonstrate the links between theory and practice Presenting the principles of care

essential for meeting the needs of patients in dynamic health and social care environments, The Nursing Associate's Handbook of Clinical Skills is an indispensable guide for trainee Nursing Associates, as well as for health and social care assistants and those returning to practice.

McGraw Hill Professional Carers and teachers need to know what to do when a child is injured or becomes suddenly ill. Most injuries that require first aid are not life-

threatening. Usually, first aid involves simple, common sense procedures. However, first aid can sometimes mean the difference between life and death. All carers and teachers should have paediatric first aid training. Paediatric First Aid for Carers and Teachers (PaedFACTs) can be read either as a stand alone manual or as part of the very successful PaedFACTs course, designed to give carers and teachers the education and confidence that they need to

effectively care for children. The PaedFACTs course and manual have been carefully written to align with the advice and guidance issued by prominent United Kingdom (UK) bodies. Endorsed by the College of Paramedics in the UK and the American Academy of Pediatrics internationally, any parent, carer, or teacher can be assured of up-to-date and relevant first aid information, approved by professional organisations.

Thomas Nelson Inc What English Teachers Need to Know, a set of companion texts designed for pre-service teachers and teachers new to the field of ELT, addresses the key question: What do English language teachers need to know and be able to do in order for their students to learn English? These texts work for teachers across different contexts (countries where

English is the dominant language, one of the official languages, or taught as a foreign language); different levels (elementary/primary, secondary, college or university, or adult education); and different learning purposes (general English, workplace English, English for academic purposes, or English for specific purposes). Volume I, on understanding learning, provides the background information that teachers need to know and be able to use in their classroom.

Volume II, on facilitating learning, covers the three main facets of teaching: planning, instructing, and assessing. Volume III, on designing curriculum, covers the contexts for, processes in, and types of ELT curricula—linguistic based, content-based, learner-centered, and learning-centered. Throughout the three volumes, the focus is on outcomes, that is, student learning. Features • Situated in current research in the field of English language teaching and other disciplines that
