Learn how to end the self-destructive behaviors that stop you from living your best life with this breakthrough program. Do you... • Put the needs of others above your own? • Start to panic when someone you love leaves—or threatens to? • Often feel anxious about natural disasters, losing all your money, or getting seriously ill? • Find that no matter how successful you are, you still feel unhappy, unfulfilled, or undeserving? Unsatisfactory relationships, irrational lack of self-esteem, feelings of being unfulfilled—these are all problems that can be solved by changing the types of messages that people internalize. These self-defeating behavior patterns are called “lifetraps,” and Reinventing Your Life shows you how to stop the cycle that keeps you from attaining happiness. Two of America's leading psychologists, Jeffrey E. Young, Ph.D., and Janet S. Klosko, Ph.D., draw on the breakthrough principles of cognitive therapy to help you recognize and change negative thought patterns, without the aid of drugs or long-term traditional therapy. They describe eleven of the most common lifetraps, provide a diagnostic test for each, and offer step-by-step suggestions to help you break free of the traps. Thousands of men and women have seen the immediate and long-term results of the extraordinary program outlined in this clear, compassionate, liberating book. Its innovative approach to solving ongoing emotional problems will help you create a more fulfilling, productive life.

In this New York Times–bestselling book, Dr. Daniel Siegel shows parents how to turn one of the most challenging developmental periods in their children's lives into one of the most rewarding. Between the ages of twelve and twenty-four, the brain changes in important and, at times, challenging ways. In Brainstorm, Dr. Daniel Siegel busts a number of commonly held myths about adolescence—for example, that it is merely a stage of “immaturity” filled with often “crazy” behavior. According to Siegel, during adolescence we learn vital skills, such as how to leave home and enter the larger world, connect deeply with others, and safely experiment and take risks. Drawing on important new research in the field of interpersonal neurobiology, Siegel explores exciting ways in which understanding how the brain functions can improve the lives of adolescents, making their relationships more fulfilling and less lonely and distressing on both sides of the generational divide.

INTERNATIONAL BESTSELLER • 1.5 MILLION+ COPIES SOLD WORLDWIDE “Workers looking for more fulfilling positions should start by identifying their ikigai.” —Business Insider “One of the unintended—yet positive—consequences of the [pandemic] is that it is forcing people to reevaluate their jobs, careers, and

lives. Use this time wisely, find your personal ikigai, and live your best life.” —Forbes Find your ikigai (pronounced ee-key-guy) to live longer and bring more meaning and joy to all your days. “Only staying active will make you want to live a hundred years.” —Japanese proverb According to the Japanese, everyone has an ikigai—a reason for living. And according to the residents of the Japanese village with the world’s longest-living people, finding it is the key to a happier and longer life. Having a strong sense of ikigai—where what you love, what you’re good at, what you can get paid for, and what the world needs all overlap—means that each day is infused with meaning. It’s the reason we get up in the morning. It’s also the reason many Japanese never really retire (in fact there’s no word in Japanese that means retire in the sense it does in English): They remain active and work at what they enjoy, because they’ve found a real purpose in life—the happiness of always being busy. In researching this book, the authors interviewed the residents of the Japanese village with the highest percentage of 100-year-olds—one of the world’s Blue Zones. Ikigai reveals the secrets to their longevity and happiness: how they eat, how they move, how they work, how they foster collaboration and community, and—their best-kept secret—how they find the ikigai that brings satisfaction to their lives. And it provides practical tools to help you discover your own ikigai. Because who doesn’t want to find happiness in every day?

Forty years after Tom Wolfe, Hunter S. Thompson, and Gay Talese launched the New Journalism movement, Robert S. Boynton sits down with nineteen practitioners of what he calls the New New Journalism to discuss their methods, writings and careers. The New New Journalists are first and foremost brilliant reporters who immerse themselves completely in their subjects. Jon Krakauer accompanies a mountaineering expedition to Everest. Ted Conover works for nearly a year as a prison guard. Susan Orlean follows orchid fanciers to reveal an obsessive subculture few knew existed. Adrian Nicole LeBlanc spends nearly a decade reporting on a family in the South Bronx. And like their muckraking early twentieth-century precursors, they are drawn to the most pressing issues of the day: Alex Kotlowitz, Leon Dash, and William Finnegan to race and class; Ron Rosenbaum to the problem of evil; Michael Lewis to boom-and-bust economies; Richard Ben Cramer to the nitty gritty of politics. How do they do it? In these interviews, they reveal the techniques and inspirations behind their acclaimed works, from their felt-tip pens, tape recorders, long car rides, and assumed identities; to their intimate understanding of the way a truly great story unfolds. Interviews with: Gay Talese Jane Kramer Calvin Trillin Richard Ben Cramer Ted Conover Alex Kotlowitz Richard Preston William Langewiesche Eric Schlosser Leon Dash William Finnegan Jonathan Harr Jon Krakauer Adrian Nicole LeBlanc Michael Lewis Susan Orlean Ron Rosenbaum Lawrence Weschler Lawrence Wright

The challenges to humanity posed by the digital future, the first detailed examination of the unprecedented form of power called “surveillance capitalism,” and the quest by powerful corporations to predict and control our behavior. In this masterwork of original thinking and research, Shoshana Zuboff provides startling insights into the phenomenon that she has named surveillance capitalism. The stakes could not be higher: a global architecture of behavior modification threatens human nature in the twenty-first century just as industrial capitalism disfigured the natural world in the twentieth. Zuboff vividly brings to life the consequences as surveillance capitalism advances from Silicon Valley into every economic sector. Vast wealth and power are accumulated in ominous new “behavioral futures markets,” where predictions about our behavior are bought and sold, and the production of goods and services is subordinated to a new “means of behavioral modification.” The threat has shifted from a totalitarian Big Brother state to a ubiquitous digital architecture: a “Big Other” operating in the interests of surveillance capital. Here is the crucible of an unprecedented form of power marked by extreme concentrations of knowledge and free from democratic oversight. Zuboff’s comprehensive and moving analysis lays bare the

threats to twenty-first century society: a controlled “hive” of total connection that seduces with promises of total certainty for maximum profit -- at the expense of democracy, freedom, and our human future. With little resistance from law or society, surveillance capitalism is on the verge of dominating the social order and shaping the digital future -- if we let it.

“The day I died was the day when I nearly lost the little humanity that was left inside me. The eternal promise of leaving as a peaceful spirit was never fulfilled; instead, I became a wandering soul, rooted to the entrails of this wasteland. You might think that smiling in the face of death should be something glorious, but there’s nothing glorious about this. There’s only a deep and sinister emptiness inside. Destiny made me walk among demons I didn’t need to be scared of. It allowed me to stare at the sun without looking away from dawn to dusk. It placed the burden of this world on my back and also forced me to remember the meaning of love...and of giving human beings a second chance. Was there ever a reason for so many broken laws? Who knows...Let me tell you about a fascinating journey and faraway lands, about unswerving loyalty and unimaginable creatures. My name is Erico Lombardo and I am doomed to be aware of myself. Maybe, after my death, I still had one last thing to do...” “Diary of a Zombie” transports us to a desolate world, a planet wiped out by a massive pandemic where human beings have almost

become extinct. But what makes this story different from the rest is the fact that it is told from a very unusual point of view: that of a zombie who, for unknown reasons, keeps his human consciousness and free will after being transformed. This is a unique case. After a few chapters in which the character is introduced, we will witness a story of redemption, full of human values, that is centered around a peculiar friendship. Erico’s cold, cynical and unsociable behavior will gradually change as he meets a lonely and mysterious 8-year-old girl on whom humankind’s scarce chances of survival depend. During the whole of his epic adventure, Erico will be linked to his most human side again, as he recovers memories and feelings he had not experienced since the times when warm blood still coursed through his veins. “Diary of a Zombie”, mostly set in a post-apocalyptic Barcelona, presents a pleasant story which will bring the reader both tears and laughter. It is a breath of fresh air that reinvents a genre which apparently had nothing new to offer.

Staying true to his trademark journalistic approach, Andrés Oppenheimer takes his readers on yet another journey, this time across the globe, in a thought-provoking search to understand what the future holds for today’s jobs in the foreseeable age of automation. The Robots Are Coming! centers around the issue of jobs and their future in the context of rapid automation and the growth of online products and services. As two of Oppenheimer’s interviewees -- both experts in technology and economics from Oxford University -- indicate, forty-seven percent of existing jobs are at risk of becoming automated or rendered obsolete by other technological changes in the next twenty years. Oppenheimer examines current changes in several fields, including the food business, legal work, banking, and medicine, speaking with experts in the field, and citing articles and literature on automation in various areas of the workforce. He contrasts the perspectives of “techno-optimists” with those of “techno-negativists” and generally attempts to find a middle ground between an alarmist vision of the future, and one that is too uncritical. A self-described “cautious optimist”, Oppenheimer believes that technology will not create massive unemployment, but rather will drastically change what work looks like.
