 Formats, modalities, and trends in group exercise are constantly evolving. *Methods of Group Exercise Instruction, Third Edition With Online Video*, explores the most common group exercise modalities, enhancing readers' marketability by giving them the skills to lead dynamic, safe, and effective classes. This text highlights the commonalities of a variety of group exercise formats through training principles, correction and progression techniques, and safety tips to enhance the skills of both group exercise leaders and program directors. *Methods of Group Exercise Instruction, Third Edition*, moves from theory to practice in a logical progression. Rather than simply providing routines, this book helps instructors develop the core skills needed for creating routines, use proper cueing, and adapt their teaching to new modalities. Teaching techniques convey appropriate training for each muscle group and methods for warm-up, cardiorespiratory training, muscular conditioning, neuromotor training, and flexibility. In addition, starter routines, modification strategies, and instructor assessment criteria are presented for seven class formats: kickboxing, step training, stationary indoor cycling, sport conditioning and boot camp, water exercise, yoga, and mat-based Pilates. The text also touches on alternative modalities, including dance-based classes, fusion, and mind-body training. Thoroughly revised and reorganized based on industry standards, the third edition of *Methods of Group Exercise Instruction* offers expanded content to help readers become better instructors. Updates to the third edition include the following: • Online video, totaling over 100 minutes, demonstrates key content in the text. • New chapters cover social aspects of group exercise, coaching-based instructional models, and neuromotor and functional training. • Callout boxes highlight important topics, research findings, technique and safety checks, and practice drills, which facilitate quick learning. • Short assignments at the close of each chapter encourage readers to look beyond the text to gain practical experience. • Evaluation forms and evaluation key points allow instructors to gauge their teaching success and adapt the key criteria of a successful class to each exercise modality. The three-part structure of this book is retained from the previous edition, but the content is reorganized to better reflect industry standards and guidelines. Part I provides a general overview of group exercise: the evolution and advantages of group exercise; the strategies for creating group cohesion in a class; the core concepts in class design; and the use of music, choreography, and cueing methods in designing and

leading a class. Part II offers guidelines for leading the four major segments of a group exercise class: warm-up, cardiorespiratory training, muscular conditioning, and flexibility training, and includes a new chapter on neuromotor and functional training. These basic concepts pertain to all modalities covered in part III, which focuses on practical teaching skills. Basic moves, choreography, and training systems are covered for each type of class. Sample routines and class formats for each modality offer a confident starting point for novice instructors and fresh material for veterans. The final chapter discusses customized or hybrid classes such as lifestyle physical activity-based classes, equipment-based cardio classes, and mind and body classes. When used as a course text, *Methods of Group Exercise Instruction, Third Edition*, includes instructor ancillaries, which offer suggestions for effective use of the book and online video, lesson plan outlines, a sample week-by-week syllabus, lab activities, and test questions. The third edition also features a newly added image bank containing all the figures and photos from the text to use in presentations.

This guide presents the latest scientifically-proven ways of increasing strength using highly-effective methods and optimal nutrition.

### 15 Minutes to Fit Macmillan

This book examines the phenomenon of 'digital guru media' (DGM), the self-styled online influencers, life coaches, experts and entrepreneurs who post on the themes of wellness, health and fitness. It opens up new perspectives on digital leisure and internet celebrity culture, and asks important questions about the social, cultural and psychological implications of our contemporary relationship with digital media. Drawing on cutting-edge social theory, the book explores a wide range of contexts in which DGM intersects with digital leisure, from the health-related learning of young people to the 'clean eating' movement, to the online lives of fitness professionals. It asks if digital and social media are problematic per se and explores the problems a turn to the Internet could be revealing about the lack of real-world or analogue support, as well as potential solutions, for our wellness, health and fitness needs and wants. Bringing together innovative, multi-disciplinary perspectives, this book is fascinating reading for anybody with an interest in leisure studies, media studies, cultural studies, sociology, or health and society.

YouTube workout video star Zuzka Light presents her long-awaited debut fitness book, with a 30-day fitness regime of powerful, effective 15-minute workouts. Filming first from a tiny basement in Prague, and eventually settling in Los Angeles, Zuzka Light has single-handedly ushered in the YouTube fitness revolution. Viewers love Light for her short, ferociously effective workouts and her in-the-trenches, never-give-up positive attitude—and she's racked up more than half a billion views to prove it. Now, finally, comes 15 Minutes to Fit, Light's hotly anticipated debut, with a 30-day fitness plan guaranteed to burn fat and build ripped muscles. Based on innovative high-intensity

interval training, the workouts in 15 Minutes to Fit are designed to be done anywhere, anytime (no fancy gym equipment necessary), in just 15 minutes a day. This book takes the guesswork out of the workout, providing:

- A 30-day workout plan to whip your body into shape—in 15 minutes a day or less
- A companion meal plan, with delicious and healthful recipes for each day
- Step-by-step photographs throughout to illustrate proper form for the workouts
- Quick facts on health and nutrition to help readers separate fact from fiction
- Support and motivation from Light, who overcame many obstacles to become the female face of fitness

As Light says, “Give me 15 minutes a day and I’ll give you a badass body.” Coauthored by New York Times–bestselling author Jeff O’Connell, 15 Minutes to Fit is the book legions of fans have been waiting for.

Adulthood is hard! But “kidulting”—engaging in nostalgic childhood activities to relieve stress, like playing with your old favorite toys, participating in games and activities from your youth, and even snacking on the foods you enjoyed as a kid— isn’t. Let this book be your guide to indulging your inner child. “Kidulting” is a thing, and it’s growing! Especially popular among millennials, the term “kidulting” refers to engaging in activities from your childhood, sometimes with a grown-up twist. Psychology Today points out that playing like a kid helps you look at the world with fresh eyes—or “beginner’s mind”—which allows you to slow down and focus. The Kidult Handbook is a fun and informative guide to healthy escapism through play. Much like adult coloring books, kidulting is a way of focusing your mind on something fun and creative to relieve stress. But this book goes way beyond just coloring—it includes 160 ideas for fun, from timeless classics like building blanket and pillow forts, to generation-specific ideas, from millennials to boomers. Interspersed throughout are fun facts and trivia about games through the ages. Most activities are unplugged and screen-free, and range from solitary pursuits to ones you can share with a friend or two. Feeling young again has never been so easy!

This is the fourth volume in an operational and chronological series covering the U.S. Marine Corps’ participation in the Vietnam War. This volume details the change in focus of the III Marine Amphibious Force (III MAF), which fought in South Vietnam’s northernmost corps area, I Corps. This volume, like its predecessors, concentrates on the ground war in I Corps and III MAF’s perspective of the Vietnam War as an entity. It also covers the Marine Corps participation in the advisory effort, the operations of the two Special Landing Forces of the U.S. Navy’s Seventh Fleet, and the services of Marines with the staff of the U.S. Military Assistance Command, Vietnam. There are additional

chapters on supporting arms and logistics, and a discussion of the Marine role in Vietnam in relation to the overall American effort.

One of the most significant books to have been written by a New Zealand business leader. Phillip Mills, the Ernst and Young Entrepreneur of the Year and a global exporter of fitness programmes to 71 countries, has spent the last year forming his views on health and fitness and sustainability into an engaging and challenging book, *Fighting Globesity*. All New Zealanders should read it. As Phillip jokes, “What would a couple of gym bunnies know about climate change and sustainability?” As it turns out, rather a lot. Phillip has done wide reading and research in this area over the last few years. From that he has distilled a carefully argued message: we need to get fit and stay fit, we need to consume fewer resources, we need to urgently engage with health and climate change issues - and we can make a difference. In this he may well be a step ahead of many other business thinkers. Accompanied by exercise and training programmes, nutritional information, recipes and more, *FIGHTING GLOBESITY* is a perfect health, fitness and philosophy package. *FIGHTING GLOBESITY* - A Practical Guide To Personal Health And Global Sustainability combines the Mills’s experience to create a cutting-edge lifestyle prescription which will be sustainable for both the individual and the planet.

This book is a strategic plan and resource manual covering bodybuilding from A-Z: In-depth and perspective on goal setting, dietary manipulations, nutritional supplementation, posing/presentation, and dozens of other topics including peak week, “metabolic damage,” training after 40 and being a critical-thinking bodybuilder. >2000 scientific references.

*The Kissing Bridge* HarperChristian + ORM

This book explores common representations and experiences of American fitness. It takes women’s experiences as the center of inquiry toward an understanding of the function of fitness in our lives and in our culture-at-large. Ranging from 1968 to the present, from Jane Fonda to WiiFit, from revolution to institutionalization, from personal to political, and beyond, this book considers a broad range of topics from an interdisciplinary perspective: generations, cultural appropriation, community development, choreography, methodology, healing, and social justice. Drawing on her experience as a cultural theorist, educator and fitness instructor, the author offers critical and creative approaches that reveal the limitations and possibilities of fitness. The book enables readers to think about their own relationship to fitness as well as the more abstract meanings of the term, and suggests the idea that fitness has some potential to transform our worlds—if we’re willing to do the work(out).

If there’s one obstacle to selling wellness books to guys, it’s this: none of them are written by professional wrestlers. In the nick of time, the one and only DDP-Diamond Dallas Page-steps out of the ring and onto the mat to offer Yoga for Regular Guys. Most yoga books marketed to men are earnest and straightforward. Yoga for Regular Guys brims with guy humour and an extremely irreverent attitude but still manages to pack in a legitimate, comprehensive and rigorous introduction to real yoga practice. The foreword is written by Rob Zombie of the band White Zombie.
