From the

that is "part memoir,

and part call-to-
action—a plea to
readers to engage with

the water crisis in America because no one else is going to do the work for you" (InStyle Magazine). Clean water is as basic to life on planet Earth as hydrogen or oxygen. In her long-awaited book—her first to reckon with the condition of water on our planet—Erin Brockovich shows us what's at stake. She writes powerfully of the fraudulent science disguising our national water crisis: Cancer clusters are not being reported. People in Detroit and the state of New Jersey don't have clean water. The drinking water for more than six million Americans contains unsafe levels of industrial chemicals linked to cancer and other health issues. The saga of PG&E

continues to this day. Yet communities and people around the country are fighting to make an impact, and Brockovich tells us their stories. In Poughkeepsie, New York, a water operator responded to his customers' concerns and changed his system to create some of the safest water in the country. Local moms in Hannibal, Missouri, became the first citizens in the nation to file an ordinance prohibiting the use of ammonia in their public drinking water. Like them, we can each protect our right to clean water by fighting for better enforcement of laws, new legislation, and stronger regulations. **The Power of Habit** Princeton University Press

An expert in business turnaround shares his inspiring approach to problem-solving: “A fascinating read” (Mitt Romney). Visionary leader Greg Brenneman believes that true business success and personal fulfillment are two sides of the same coin. The techniques that will grow your business will also help you achieve a rich, purposeful, and integrated life. Here, Brenneman takes what he’s learned from turning around or tuning up many businesses—including Continental Airlines and Burger King—and distills it into a simple, clear, five-step roadmap that anyone can follow. He teaches you how to: *prepare a succinct Go Forward plan *build a fortress

balance sheet *grow your sales and profits *choose all-star servant leaders *empower your team For more than thirty years, Brenneman has seen these steps foster dramatic results in a variety of business environments. But he also came to realize that he could apply these same principles to improve his life and build a lasting moral legacy. He found he could make better decisions by carefully taking the most important facets of his life—faith, family, friendship, fitness, and finance—into consideration. Brenneman’s inspiring examples, from both his business and his life, demonstrate the astounding effects these steps can have when you apply

them—right away and all at once.

A clear, authoritative guide to the crisis of 2008, its continuing repercussions, and the needed reforms ahead. The U.S. economy lost the first decade of the twenty-first century to an ill-conceived boom and subsequent bust. It is in danger of losing another decade to the stagnation of an incomplete recovery. How did this happen? Read this lucid explanation of the origins and long-term effects of the recent financial crisis, drawn in historical and comparative perspective by two leading political economists. By 2008 the United States had

become the biggest international borrower in world history, with more than two-thirds of its \$6 trillion federal debt in foreign hands. The proportion of foreign loans to the size of the economy put the United States in league with Mexico, Indonesia, and other third-world debtor nations. The massive inflow of foreign funds financed the booms in housing prices and consumer spending that fueled the economy until the collapse of late 2008. This was the most serious international economic crisis since the Great Depression of the 1930s. Menzie Chinn and Jeffrey Frieden explain the political and economic roots of this crisis as well as its long-term effects. They explore

the political strategies behind the Bush administration's policy of funding massive deficits with foreign borrowing. They show that the crisis was foreseen by many and was avoidable through appropriate policy measures. They examine the continuing impact of our huge debt on the continuing slow recovery from the recession. Lost Decades will long be regarded as the standard account of the crisis and its aftermath.

Influenced by anarchism and especially by the anarcho-syndicalist Georges Sorel, the political praxis of Peruvian activist and scholar José Carlos Mariátegui

(1894–1930) deviated from the policies mandated by the Comintern. Mariátegui saw that new subjectivities would be required to bring about a revolution that would not recreate bourgeois or fascist structures. A new society, he argued, required a new culture. Thus, Mariátegui not only founded the Peruvian Socialist Party, but also created *Amauta*, a magazine that brought together the writings of the political and cultural avant-gardes. In the spirit of this approach, *Bread and Beauty* not only studies the political significance of cultural habits and products; it also looks at the cultural underpinnings of the political proposals found in Mariátegui's writings and actions.

The last couple of years have seen the eurozone lurch from crisis to calamity. With Greece, Portugal and Ireland already driven to the brink of economic catastrophe, and the threat that a number of other EU countries are soon to follow, the consequences for the global economy are potentially dire. In *The Great Eurozone Disaster*, Heikki Patomäki dissects the current crisis, revealing its origins lie in the instability that has driven the process of financialisation since the early 1970s. Furthermore, the public debt crises in the European deficit countries have been aggravated rather than

alleviated by the responses of the Commission and leaders of the surplus countries, especially Germany. Providing a captivating narrative about how Europe ended up in its present predicament, Patomäki presents a radical new vision for 'global economic democracy' as the only viable way out of the current crisis.

Random House

An anthology of long-read book reviews by one of the European left's foremost political economists From the acclaimed author of *How Will Capitalism End?* comes an omnibus of long-form critical essays engaging with leading economists and

thinkers. *Critical Encounters* draws on Wolfgang Streeck's inimitable writing for the *London Review of Books* and *New Left Review*, among other publications. It opens with treatments of two contrasting historical eras—factory capitalism and financialization—and three of the world's major economies: the United States, France and Germany. A middle section surveys the hollowing out of Western democracies and reviews Yanis Varoufakis's "strange but indispensable" memoir of the eurozone crisis. Delving into the world of ideas, Streeck discusses the work of Quinn Slobodian, Mark Blyth, Jürgen Habermas and Perry Anderson. Finally, he

zooms out to compare his home discipline of sociology to natural history, giving a remarkable and non-deterministic reading of Charles Darwin. In the preface, Streeck reflects on the art (or craft) of book reviewing and the continuing merits of the book form. *Critical Encounters* also includes a series of "Letters from Europe," penned as the coronavirus descended upon the Continent. Following his timely and well-received *A Failure of Capitalism*,

Richard Posner steps back to take a longer view of the continuing crisis of democratic capitalism as the American and world economies crawl gradually back from the depths to which they had fallen in the autumn of 2008 and the winter of 2009. By means of a lucid narrative of the crisis and a series of analytical chapters pinpointing critical issues of economic collapse and gradual recovery, Posner helps non-technical readers understand business-cycle and financial economics, and financial and governmental institutions, practices, and transactions, while maintaining a neutrality impossible for persons professionally

committed to one theory or another. He calls for fresh thinking about the business cycle that would build on the original ideas of Keynes. Central to these ideas is that of uncertainty as opposed to risk. Risk can be quantified and measured. Uncertainty cannot, and in this lies the inherent instability of a capitalist economy. As we emerge from the financial earthquake, a deficit aftershock rumbles. It is in reference to that potential aftershock, as well as to the government's stumbling efforts at financial regulatory reform, that Posner raises the question of the adequacy of our democratic institutions to the economic challenges heightened

by the greatest economic crisis since the Great Depression. The crisis and the government's energetic response to it have enormously increased the national debt at the same time that structural defects in the American political system may make it impossible to pay down the debt by any means other than inflation or devaluation.

FINALIST An epic, riveting history of New York City on the edge of disaster—and an anatomy of the austerity politics that continue to shape the world today When the news broke in 1975 that New York City was on the brink of fiscal collapse, few believed

it was possible. How could the country's largest metropolis fail? How could the capital of the financial world go bankrupt? Yet the city was indeed billions of dollars in the red, with no way to pay back its debts. Bankers and politicians alike seized upon the situation as evidence that social liberalism, which New York famously exemplified, was unworkable. The city had to slash services, freeze wages, and fire thousands of workers, they insisted, or financial apocalypse would ensue. In this vivid account, historian Kim Phillips-Fein tells the remarkable story of the crisis that engulfed the city. With unions and ordinary citizens refusing to accept retrenchment, the budget crunch became

a struggle over the soul of New York, pitting fundamentally opposing visions of the city against each other. Drawing on never-before-used archival sources and interviews with key players in the crisis, *Fear City* shows how the brush with bankruptcy permanently transformed New York—and reshaped ideas about government across America. At once a sweeping history of some of the most tumultuous times in New York's past, a gripping narrative of last-minute machinations and backroom deals, and an origin story of the politics of austerity, *Fear City* is essential reading for anyone seeking to understand the resurgent fiscal

conservatism of today. Abolitionist Socialist Feminism Simon and Schuster

Before the Storm W. W. Norton & Company
A cautionary but optimistic book about the world's changing climate and the fate of humanity, from two of the architects of the 2015 Paris Agreement.
• "One of the most

inspiring books I've ever read." —Yuval Harari Christiana Figueres and Tom Rivett-Carnac outline two possible scenarios for our planet. In one, they describe what life on Earth will be like by 2050 if we fail to meet the Paris Agreement's climate targets. In the other, they lay out what it will be like to live in a regenerative world that has net-zero emissions. They argue for confronting the climate crisis head-on, with determination and optimism. *The Future We Choose* presents our options and tells us what governments, corporations, and each of us can, and must, do to fend off disaster. *The End of October* Penguin Includes a new afterword to mark the 10th anniversary of the

financial crisis The brilliantly reported New York Times bestseller that goes behind the scenes of the financial crisis on Wall Street and in Washington to give the definitive account of the crisis, the basis for the HBO film "Too Big To Fail is too good to put down. . . . It is the story of the actors in the most extraordinary financial spectacle in 80 years, and it is told brilliantly." —The Economist In one of the most gripping financial narratives in decades, Andrew Ross Sorkin—a New York Times columnist and one of the country's most respected financial reporters—delivers the first definitive blow-by-blow account of the epochal economic crisis that brought the world to the brink.

Through unprecedented access to the players involved, he re-creates all the drama and turmoil of these turbulent days, revealing never-before-disclosed details and recounting how, motivated as often by ego and greed as by fear and self-preservation, the most powerful men and women in finance and politics decided the fate of the world's economy.

This volume examines the interrelationship between democratic legitimacy at the European level and the ongoing Eurozone crisis that began in 2010. Europe's crisis of legitimacy stems from 'governing by rules and ruling by numbers' in the sovereign debt

crisis, which played havoc with the eurozone economy while fueling political discontent. Using the lens of democratic theory, the book assesses the legitimacy of EU governing activities first in terms of their procedural quality ('throughput'), by charting EU actors' different pathways to legitimacy, and then evaluates their policy effectiveness ('output') and political responsiveness ('input'). In addition to an engaging and distinctive analysis of Eurozone crisis governance and its impact on democratic legitimacy, the book offers a number of theoretical insights into the broader question of the functioning of the EU and supranational

governance more generally. It concludes with proposals for how to remedy the EU's problems of legitimacy, reinvigorate its national democracies, and rethink its future.

Europe's Crisis of Legitimacy Verso Books

In 1999, Texas passed a landmark clean energy law, beginning a groundswell of new policies that promised to make the US a world leader in renewable energy. As Leah Stokes shows in *Short Circuiting Policy*, however, that policy did not lead to momentum in Texas, which failed to implement its solar laws or clean up its electricity system. Examining clean energy laws in Texas, Kansas, Arizona, and Ohio over a thirty-year

time frame, Stokes argues that organized combat between advocate and opponent interest groups is central to explaining why states are not on track to address the climate crisis. She tells the political history of our energy institutions, explaining how fossil fuel companies and electric utilities have promoted climate denial and delay. Stokes further explains the limits of policy feedback theory, showing the ways that interest groups drive retrenchment through lobbying, public opinion, political parties and the courts. More than a history of renewable energy policy in modern America, *Short Circuiting Policy* offers a bold new argument

about how the policy process works, and why seeming victories can turn into losses when the opposition has enough resources to roll back laws.

“Lewis shows again why he is the leading journalist of his generation.”—Kyle Smith, Forbes The tsunami of cheap credit that rolled across the planet between 2002 and 2008 was more than a simple financial phenomenon: it was temptation, offering entire societies the chance to reveal aspects of their characters they could not normally afford to indulge. Icelanders wanted to stop fishing and become investment bankers. The Greeks wanted to turn their country into

a pinata stuffed with cash and allow as many citizens as possible to take a whack at it. The Germans wanted to be even more German; the Irish wanted to stop being Irish. Michael Lewis's investigation of bubbles beyond our shores is so brilliantly, sadly hilarious that it leads the American reader to a comfortable complacency: oh, those foolish foreigners. But when he turns a merciless eye on California and Washington, DC, we see that the narrative is a trap baited with humor, and we understand the reckoning that awaits the greatest and greediest of debtor nations.

 NEW YORK TIMES
 BESTSELLER • This instant classic explores how we can change our lives by changing our habits. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Wall Street Journal • Financial Times In The Power of Habit, award-winning business reporter Charles Duhigg takes us to the thrilling edge of scientific discoveries that explain why habits exist and how they can be changed. Distilling vast amounts of information into engrossing narratives that take us from the boardrooms of Procter & Gamble to the sidelines of the NFL to the front lines of the civil rights movement, Duhigg presents a whole new

understanding of human nature and its potential. At its core, The Power of Habit contains an exhilarating argument: The key to exercising regularly, losing weight, being more productive, and achieving success is understanding how habits work. As Duhigg shows, by harnessing this new science, we can transform our businesses, our communities, and our lives. With a new Afterword by the author “Sharp, provocative, and useful.”—Jim Collins “Few [books] become essential manuals for business and living. The Power of Habit is an exception. Charles Duhigg not only explains how habits are formed but how to kick bad ones and

Pink, bestselling author of *Drive* and *A Whole New Mind* “Entertaining . . . enjoyable . . . fascinating . . . a serious look at the science of habit formation and change.”—The New York Times Book Review *Apocalypse Delayed* Penguin The #1 Wall Street Journal Bestseller “Required reading. . . . Shows how our economic crisis was a failure, not of the free

market, but of government.” —Charles Koch, Chairman and CEO, Koch Industries, Inc. Did Wall Street cause the mess we are in? Should Washington place stronger regulations on the entire financial industry? Can we lower unemployment rates by controlling the free market? The answer is NO. Not only is free market capitalism good for the economy, says industry expert John Allison, it is our only hope for recovery. As the nation’s longest-serving CEO of a top-25 financial institution, Allison has had a unique inside view of the events leading up to the financial crisis. He has seen the direct effect of government incentives on the real

estate market. He has seen how government regulations only make matters worse. And now, in this controversial wake-up call of a book, he has given us a solution. The national bestselling *The Financial Crisis and the Free Market Cure* reveals: Why regulation is bad for the market—and for the world What we can do to promote a healthy free market How we can help end unemployment in America The truth about TARP and the bailouts How Washington can help Wall Street build a better future for everyone With shrewd insight, alarming insider details, and practical advice for today's leaders, this electrifying analysis is

nothing less than a call to arms for a nation on the brink. You'll learn how government incentives helped blow up the real estate bubble to unsustainable proportions, how financial tools such as derivatives have been wrongly blamed for the crash, and how Congress fails to understand it should not try to control the market—and then completely mismanages it when it tries. In the end, you'll understand why it's so important to put "free" back in free market. It's time for America to accept the truth: the government can't fix the economy because the government wrecked the economy. This book gives us the tools, the inspiration—and the

cure.
Superman's Not Coming Oxford University Press Named a Best Book of 2019 by NPR “How might we mitigate losses caused by shortsightedness? Bina Venkataraman, a former climate adviser to the Obama administration, brings a storyteller’s eye to this question. . . . She is also deeply informed about the relevant science.” —The New York Times Book Review A trailblazing exploration of how we can plan better for the future: our own, our families’, and our society’s. Instant gratification is the norm today—in our lives, our culture, our economy, and our politics. Many of us have forgotten (if we ever learned) how to

make smart decisions for the long run. Whether it comes to our finances, our health, our communities, or our planet, it’s easy to avoid thinking ahead. The consequences of this immediacy are stark: Deadly outbreaks spread because leaders failed to act on early warning signs. Companies that fail to invest stagnate and fall behind. Hurricanes and wildfires turn deadly for communities that could have taken more precaution. Today more than ever, all of us need to know how we can make better long-term decisions in our lives, businesses, and society. Bina Venkataraman sees the way forward. A journalist and former adviser in the Obama

White House, she helped communities and businesses prepare for climate change, and she learned firsthand why people don't think ahead—and what can be done to change that. In *The Optimist's Telescope*, she draws from stories she has reported around the world and new research in biology, psychology, and economics to explain how we can make decisions that benefit us over time. With examples from ancient Pompeii to modern-day Fukushima, she dispels the myth that human nature is impossibly reckless and highlights the surprising practices each of us can adopt in our own lives—and the ones we must fight for as a society. The result is a book brimming

with the ideas and insights all of us need in order to forge a better future.

Right Away & All at Once
Little, Brown
Books for Young

A brutal, bloody, and at times hopeful history of the vote; a primer on the opponents fighting to take it away; and a playbook for how we can save our democracy before it's too late—from the former U.S. Attorney General on the front lines of this fight. Voting is our most important right as Americans—"the right that protects all the others," as Lyndon Johnson famously said when he signed the Voting Rights Act—but it's also the one most violently contested throughout U.S. history. Since the

gutting of the act in the landmark Shelby County v. Holder case in 2013, many states have passed laws restricting the vote. After the 2020 election, President Trump's effort to overturn the vote has evolved into a slow-motion coup, with many Republicans launching an all-out assault on our democracy. The vote seems to be in unprecedented peril. But the peril is not at all unprecedented. America is a fragile democracy, Eric Holder argues, whose citizens have only had unfettered access to the ballot since the 1960s. He takes readers through three dramatic stories of how the vote was won: first by white men, through violence and

insurrection; then by white women, through protests and mass imprisonments; and finally by African Americans, in the face of lynchings and terrorism. Next, he dives into how the vote has been stripped away since Shelby—a case in which Holder was one of the parties. He ends with visionary chapters on how we can reverse this tide of voter suppression and become a true democracy where every voice is heard and every vote is counted. Full of surprising history, intensive analysis, and actionable plans for the future, this is a powerful primer on our most urgent political struggle from one of the country's leading advocates.
