In Days to Celebrate Lee Bennett Hopkins has collected an astounding array of information to show us that each day of the year gives us a reason to celebrate. For every month he has compiled a calendar of birthdays, holidays, historic events, inventions, world records, thrilling firsts, and more. And for every month he has selected surprising poems in honor of some of the people and events commemorated in the calendar. There are poems about the seasons and holidays, of course, but there are also poems about a "Flying-Man" (for February 4, Charles Lindbergh's birthday), birds (for April 26, John James Audubon's birthday), windshield wipers (patented November 10), and earmuffs (patented December 21). Beloved poets, such as Walt Whitman, Langston Hughes, Gwendolyn Brooks, and Christina Rossetti, are joined by new voices in sixty poems that take us on a remarkable journey through a year -- and through the years. Stephen Alcorn's illustrations, based on the style of art found in old almanacs, are airy, whimsical, and thought provoking. They perfectly match the breadth and depth of this volume. Brilliantly conceived and elegantly illustrated, Days to Celebrate is a book that pays tribute to the people, events, and poetry that make up our past and will inspire our future.

Alan Grant, Scotland Yard Inspector is feeling bored while confined to bed in hospital with a broken leg. Marta Hallard, an actress friend of his, suggests that he should amuse himself by researching a historical mystery. She brings him some pictures of historical characters, aware of Grant's interest in human faces. He becomes intrigued by a portrait of King Richard III. He prides himself on being able to read a person's character from his appearance, and King Richard seems to him a gentle, kind and wise man. Why is everyone so sure that he was a cruel murderer? With the help of other friends and acquaintances, Grant investigates Richard's life and the case of the Princes in the Tower, testing out his theories on the doctors and nurses who attend to him. Grant spends weeks pondering historical information and documents with the help of Brent Carradine, a likable young American researcher working in the British Museum. Using his detective's logic, he tries to come to the conclusion whether the claim of Richard being a murderer is a fabrication of Tudor propaganda, or was he really a monstrous hunchback. The Daughter of Time was voted greatest mystery novel of all time by the Crime Writers' Association in 1990.
