ELLIS BRYSON

2nd Edition 2018 Lippincott Williams & Wilkins

The ultimate ophthalmic dispensing reference, this book provides a step-by-step system for properly fitting and adjusting eyewear. It covers every aspect of dispensing — from basic terminology to frame selection to eyewear fitting, adjusting, and repairing. Perfect for both students who are just learning about dispensing and practitioners who want to keep their skills up to date, this resource offers in-depth discussions of all types of lenses, including multifocal, progressive, absorptive, safety, recreational, aspheric, and high index. Plus, it goes beyond the basics to explore the "how" and "why" behind lens selection, to help you better understand and meet your patients' vision needs. A glossary of key terms provides easy access to definitions. Proficiency tests at the end of each chapter reinforce your understanding of the material through multiple-choice, fill-in-the-blank, matching, and true/false questions. A new full-color design with hundreds of illustrations that clearly demonstrate key procedures, concepts, and techniques. Updated coverage of the latest dispensing procedures and equipment. Detailed information on the newest types of lenses, including progressive, absorptive, aspheric, and atoric. Updated photos feature more current frames and lenses, keeping the book up to date with today's eye care trends.

Liberally illustrated throughout with over 400 photographs (300 in full colour), this reference provides a practical and clinically oriented approach to the diagnosis and management of macular disorders. It covers not only diseases that primarily affect the macula, such as age-related macular degeneration, but also those that might have an indirect but never-the-less significant effect on macular function, such as vascular and inflammatory diseases. Many diseases in this book are illustrated with brief case studies, to help bring them to life and facilitate learning. With over 400 top

quality clinical pictures, this book enables easy visual recognition of macular diseases. Covers all disorders associated with macular degeneration not only age-related macular degeneration. Includes case histories which is an invaluable and unique diagnostic tool that facilitates learning. Each chapter covers the most common disease first, followed by less common conditions which guides the reader towards an accurate diagnosis. Written as a quick and easy reference.

Synopsis of Ophthalmology Slack

In Focus Ophthalmology is aimed at all medical and health science students who require an introductory, low cost and highly illustrated guide to this specialty. The material is presented in double page spreads. The left-hand page has a synoptic and highly structured text (normally under the following headings: incidence; clinical features; differential

diagnosis; management; prognosis). The right-hand page has a selection of four to six clinical photographs. Ophthalmology In Focus is a convenient pocket size and therefore ideal for quick preparation before ward rounds. Each volume also includes self-assessment material, which is extremely helpful for preparation for examinations. Because of shorter hospital stays and more outpatient treatment, students are less likely to be able to see the full range of conditions on the ward - the books in this series help supply that deficit. Invaluable source of clinical photographs - students are now less able to have the opportunity to see - in real life - the full range of conditions that they are expected to know about and that they may be tested on Synoptic structured text - ideal for quick preparation before ward rounds Includes self-assessment material - picture tests - handy for revision, especially for the all-important 'OSCE' New series name: In Focus New series design Test revised to include more on management Picture tests included in each volume for first time
