Critically acclaimed
author Robert Klara's
The Devil's Mercedes
chases down one of
the most improbable
stories of the postwar
era: the national drama
that erupted when
Hitler's armored
limousine surfaced in
the US. In 1938,
Mercedes-Benz began
production of the
largest, most luxurious
limousine in the world.
A machine of

frightening power and
sinister beauty, the
Grosser 770K Model
150 Offener
Tourenwagen was 20
feet long, seven feet
wide, and tipped the
scales at 5 tons. Its
supercharged, 230-
horsepower engine
propelled the beast to
speeds over 100 m.p.h.
while its occupants
reclined on glove-
leather seats stuffed
with goose down.
Armor plated and
equipped with hidden
compartments for
Luger pistols, the 770K
was a sumptuous
monster with a
monstrous patron:
Adolph Hitler and the
Nazi party. Deployed
mainly for propaganda
purposes before the

war, the hand-built limousines—in which Hitler rode standing in the front seat—motored through elaborate rallies and appeared in countless newsreels, swiftly becoming the Nazi party’s most durable symbol of wealth and power. Had Hitler not so thoroughly dominated the scene with his own megalomania, his opulent limousine could easily have eclipsed him. Most of the 770Ks didn’t make it out of the rubble of World War II. But several of them did. And two of them found their way, secretly and separately, to the United States. In *The Devil’s Mercedes*, author Robert Klara uncovers the forgotten story of how Americans responded to these

rolling relics of fascism on their soil. The limousines made headlines, drew crowds, made fortunes and ruined lives. What never became public was how both of the cars would ultimately become tangled in a web of confusion, mania, and opportunism, fully entwined in a story of mistaken identity. Nobody knew that the limousine touted as Hitler’s had in fact never belonged to him, while the Mercedes shrugged off as an ordinary staff car—one later abandoned in a warehouse and sold off as government surplus—turned out to be none other than Hitler’s personal automobile. It would take 40 years, a cast of carnies and millionaires, the United

States Army, and the sleuthing efforts of an obscure Canadian librarian to bring the entire truth to light. As he recounts this remarkable drama, Klara probes the meaning of these haunting hulks and their power to attract, excite and disgust. The limousines' appearance collided with an American populous celebrating a victory even as it sought to stay a step ahead of the war's ghosts. Ultimately, *The Devil's Mercedes* isn't only the story of a rare and notorious car, but what that car taught postwar America about itself.

They love nothing better than sipping

free-trade gourmet coffee, leafing through the Sunday New York Times, and listening to David Sedaris on NPR (ideally all at the same time). Apple products, indie music, food co-ops, and vintage T-shirts make them weak in the knees. They believe they're unique, yet somehow they're all exactly the same, talking about how they "get" Sarah Silverman's "subversive" comedy and Wes Anderson's "droll" films. They're also down with diversity and up on all the best microbrews, breakfast spots, foreign cinema, and authentic sushi. They're organic, ironic, and do not own TVs. You know who they are: They're white people. And they're here, and you're gonna

have to deal. Fortunately, here's a book that investigates, explains, and offers advice for finding social success with the Caucasian persuasion. So kick back on your IKEA couch and lose yourself in the ultimate guide to the unbearable whiteness of being. Praise for STUFF WHITE PEOPLE LIKE: "The best of a hilarious Web site: an uncannily accurate catalog of dead-on predilections. The Criterion Collection of classic films? Haircuts with bangs? Expensive fruit juice? 'Blonde on Blonde' on the iPod? The author knows who reads The New Yorker and who wears plaid." -Janet Maslin's summer picks, CBS.com "The author of "Stuff White People Like" skewers the sacred cows of

lefty Caucasian culture, from the Prius to David Sedaris. . . . It gently mocks the habits and pretensions of urbane, educated, left-leaning whites, skewering their passion for Barack Obama and public transportation (as long as it's not a bus), their idle threats to move to Canada, and joy in playing children's games as adults. Kickball, anyone?" -Salon.com "A handy reference guide with which you can check just how white you are. Hint: If you like only documentaries and think your child is gifted, you glow in the dark, buddy." -NY Daily News

'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson

Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept

their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt

the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and

must respect her cultures and traditions as an AFRICAN AUTHOR.

Corinthian After World War II, structures, practices and the culture of retailing in most West European countries went through a period of rapid change. The post-war economic boom, the emergence of a mass consumer society, and the adaptation of innovations which already had been implemented in the USA during the interwar period, revolutionized the world of getting and spending. But the implementation of self-service and the supermarket, the

spread of the department store and the mail order business were not only elements of a transatlantic catch up process of 'Americanization' of retailing. National patterns of the retail trade and specific cultures of consumption remained crucial, and long term processes of change, starting in the 1920s or 1930s, also had an impact on the transformation of retailing in post-war Europe. This volume presents a series of case-studies looking at transformations of retailing in several European countries, offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences

consumerism had on the practices of retailing. *A Bid for Love* Lulu.com
By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the

Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious

time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom. Crashed and Byrned iUniverse
Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may

be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of

the structure of the universe in terms of our own consciousness; it behoves the reader to consider the Social Psychology Signet Book "Fairies Afield" is a children's fantasy story written by Mary Louisa Molesworth, a well-known English children's author in the late nineteenth and early twentieth century. The book, published in 1902, is part of Molesworth's wide body of work, which includes a number of novels and stories for children. The story follows two siblings, Tottie and Tittie, as they go on a fantastic journey into the world of fairies. The children discover a secret road in the woods that leads them to the world of the

fairies, where they meet a variety of wonderful creatures and participate in quirky and enchanting adventures. The kids become friends with fairies, elves, and other mystical creatures as they explore this magical realm. Like children's books from the Victorian and Edwardian eras, the story is full with endearing moments and soft moral messages. The narratives of Molesworth highlight kindness, amazement, and inventiveness. "Fairies Afield" perfectly encapsulates the essence of beloved children's books with its themes of friendship, magic, and youthful innocence. For those who appreciate classic stories of magic and adventure, the

novel is still enjoyable. *Dearest Debbie* Evergreen Press (AL) Compiled from ancient as well as modern sources, this is a unique guide to the practice of witchcraft around the world.
