The term 'Administration' doesn't refer to any single process or act. It is like a broad umbrella encompassing a number of processes such as: planning, organizing, directing, coordinating, controlling and evaluating the performance. The same situation occurs in the field of educational administration. The concept of educational administration is applicable in case of an educational organisation which has certain purposes or goals to fulfill.

This book acquaints the reader to the often invisible-ized practices and policies under the rhetoric of 'inclusion', through theoretical and empirical analysis. It emphasizes on the complexities of education policies in a multicultural state by identifying the challenges to the idea of 'inclusion' illuminated through judicial interventions, policy-frameworks and everyday experiences of individuals. Higher education is imperative to empowerment in socially stratified societies marred with deep inequalities like India and many other multicultural countries. Disputes over inclusion remains a critical feature in Indian higher education sector, as it is viewed as facilitating access to economic opportunities and providing vertical mobility for individuals belonging to marginalized communities. Higher education empowers, and expands individual horizons of thought and ideas of freedom, dignity, equality, enabling individuals to participate actively in the political-sociological discourses in democratic polity. Therefore, policy makers, political theorists and educationists have been examining the question of inclusion and education as public-good. Contemporary India has witnessed an unprecedented attack on academic freedom, free exchange of ideas and expressions, challenging the very idea of inclusion and inclusiveness.

Commerce Education in North-East India IAP

In this comprehensive and extensively researched history, John Roach argues for a reassessment of the relative importance of State regulation and private provision. Although the public schools enjoyed their greatest prestige during this period, in terms of educational reform and progress their importance has been exaggerated. The role of the public school, he suggests, was social rather than academic, and as such their power and influence is to be interpreted principally in relation to the growth of new social elites, the concept of public service and the needs of the empire for a bureaucratic ruling class. Only in the modern progressive movement, launched by Cecil Reddie, and the private provision for young women, was lasting progress made. Even before the 1902 Education Act however the State had spent much time and effort regulating and reforming the old educational endowments, and it is in these initiatives that the foundations for the public provision of secondary educational reform are to be found.
