Camps and retreats are an essential part of every youth ministry. But could your camping ministry use a new perspective, a fresh sense of creativity, and practical ideas that will help your kids see that God is relevant to their lives today? In 'The Youth Specialties Handbook for Great Camps and Retreats', veteran youth minister and camp director Chap Clark opens his comprehensive tool kit of camp and retreat concepts and ideas as he shows you how to build an effective, exciting camping program from the ground up. First, Clark calls for a rethinking of camping ministry that puts the

needs of kids first. He then offers seasoned advice on how to use the basic tools of camping ministry - group-building activities, music, speaking, small groups, and more - in relevant new ways. He covers topics such as developing a camping strategy, how to train your camp staff, taking a fresh look at music, and the strengths and dangers of humor. You'll find everything you need in 'The Youth Specialties Handbook for Great Camps and Retreats' - how to plan a budget, how to deal with problem kids, how to work with property managers, and much more. Clark also includes complete plans for specialized camps such as discipleship camping, service retreats, outreach camping, planning retreats, and recreation retreats.

In *The Simple Living Guide* Janet Luhrs demonstrates how to live a deliberate, simpler life--and savor it. As Janet Luhrs says, "Simple living is about living deliberately. Simple living is not about austerity, or frugality, or income level. It's about being fully aware of why you are living your particular life, and knowing that life is one you have chosen thoughtfully. Simple living is about designing our lives to coincide with our ideals." Whether you are looking at small solutions for cutting down the stress in your life or taking the big leap toward the simpler life, this book can be your guide. Janet Luhrs, the nationally recognized founder and editor of the *Simple Living Journal*, brings together strategies, inspiration, resources, and real-life profiles of people who have slowed down, overcome obstacles, and created richer lives. Discover Simple Living approaches to: money, work, holidays, cooking and nutrition, health and exercise, clutter, gardening, travel, and more!

Igor Aleksander heads a major British team that has applied engineering principles to the understanding of the human brain and has built several pioneering machines, culminating in *MAGNUS*, which he calls a machine with imagination. When he asks it (in words) to produce an image of a banana that is blue with red spots, the image appears on the screen in seconds. The idea of such an apparently imaginative, even conscious, machine seems heretical, and its advocates are often accused of sensationalism, arrogance, or philosophical ignorance. Part of the problem, according to Aleksander, is that consciousness remains ill defined. Interweaving anecdotes from his own life and research with imagined dialogues between historical figures -- including Descartes, Locke, Hume, Kant, Wittgenstein, Francis Crick, and Steven Pinker -- Aleksander leads readers toward an understanding of consciousness. He shows not only how the latest work with artificial neural systems suggests that an artificial form of consciousness is possible but also that its design would clarify many of the puzzles surrounding the murky concept of consciousness itself. *How to Build a Mind* also examines the presentation of "self" in robots, the learning of language, and the nature of emotion, will, instinct, and feelings.
