A bold look at the creative, controversial, and vibrant history of skateboarding, and the amazing skaters who continually reinvent it. Skateboarding isn't just a recreational activity, but a professional sport, lifestyle, art form, and cultural phenomenon. The striking book *Four Wheels* and *A Board* captures its spirited history, iconic

skateboarders, diverse community, and the palpable passion of the people who love it. It includes contributions from the most influential names in the game, including Rodney Mullen, Tony Hawk, Mimi Knoop, and more. The gorgeously designed book presents objects, artifacts, and photographs from the Smithsonian's collections that exemplify the vitality and innovation of skate culture. Book chapters are organized chronologically by decade from the '60s to present day, starting

with 20th-century surfboards, moving through technological changes, the disappearance of skate parks, the rise of social media and collaborations, and ending with never-before-seen objects from the 2020 Summer Olympics, where skateboarding made its historic Olympic debut. Largely invented by youth, skateboarding has attracted punks, misfits, and dreamers looking for somewhere to belong. The book features skateboards and skaters

who open dialogues about race, the gender binary, queerness, the displacement of Native people, and so much more, shining a light on people and places not often represented in traditional skateboard history. *Four Wheels and a Board* is a fresh look at a transformative culture, and one hell of a ride. *Popular Mechanics Magazine* Jack Smith In this Pulitzer Prize-winning classic, a convicted killer becomes the first prisoner to be executed in the United

States. The Executioner's Song follows the true story of cold-blooded murderer Gary Gilmore, who, after being tried and convicted, insisted on being executed for his crimes. To do so, he fought a system intent on keeping him alive long after it sentenced him to death. Norman Mailer tells Gilmore's story with impressive authority and compassion. The Executioner's Song is a trip down the wrong side of the tracks, right into the heart of American loneliness and violence—it

is impossible to put down and difficult to forget.

"Building Resilience highlights the critical role of social capital in the ability of a community to withstand disaster and rebuild both the infrastructure and the ties that are at the foundation of any community. Aldrich examines the post-disaster responses of four distinct communities - Tokyo following the 1923

earthquake, Kobe after the 1995 earthquake, Tamil Nadu after the 2004 Indian Ocean Tsunami, and New Orleans post-Katrina - and finds that those with robust social networks were better able to coordinate recovery. In addition to quickly disseminating information and financial and physical assistance, communities with an abundance of social capital were able to minimize the migration of people and valuable resources out of the area.

During the final months of his life, Walt Disney was consumed with the world-wide problems of cities. His development concept at the time of his death on December 15th, 1966 would be his team’s conceptual response to the ills of the inner cities

and the sprawl of the megalopolis: the “Experimental Prototype Community of Tomorrow” or, as it became known, EPCOT. This beautifully written, instantly engrossing volume focuses on the original concept of EPCOT, which was conceived by Disney as an experimental community of about 20,000 people on the Disney World property in central Florida. With its radial plan, 50-acre town center enclosed by a dome, themed international shopping

area, greenbelt, high-density apartments, satellite communities, monorail and underground roads, the original EPCOT plan is reminiscent of post-war Stockholm and the British New Towns, as well as today's transit-oriented development theory. Unfortunately, Disney himself did not live long enough to witness the realization of his "model city." However, EPCOT's evolution into projects such as the EPCOT Center and the town of Celebration displays a

remarkable commitment by the Disney organization to the original EPCOT philosophy, one which continues to have relevance in the fields of planning and development.

Fresh on the heels of the best-selling book *Lost Drag Strips* comes a new look at other long-lost and forgotten drag racing facilities from the 1950s, 1960s, and 1970s. In the first volume, the author

examined the birth of drag racing and its subsequent popularity that invaded every city and community across America. Unfortunately, after the initial explosion of popularity, it waned, and various drag strips closed for a myriad of reasons. Financial pressure for the real estate they occupied, suburban sprawl, and waning participation were all reasons for the change in fortunes for the small, and even not-so-small, racetracks. The first volume was great, but

readers demanded more! *Lost Drag Strips II* picks up where the first volume left off, covering even more tracks with archival photos of racing in the tracks' heyday, the cars that ran there, and coverage of the tracks as they exist today. This volume also includes some of the tracks that survived, those that fought off the economic demons and the urban sprawl and continue to run today. Tracks in this volume include: Fort Wainwright/Racing Lions Motorsports Park, Avenue

G Drag Strip, Fremont/Baylands Drag Strip, San Fernando Drag Strip, Fontana Drag City, Inyokern Drag Strip, Kahuku Air Strip, Las Vegas Speedrome, Continental Divide Raceways, SRCA Drag Strip, Southwest Raceway, Willow Run Raceway, Minnesota Dragways, KCTA Drag Strip, Detroit Dragway, Niagara Airport Dragstrip, New York National Speedway, York US 30 Drag-O-Way, South Mountain Raceway, La Place Dragway, Yellow

River Drag Strip,
Thunderbolt Dragway,
and more.

A field-defining work that demonstrates how architects are breaking with professional conventions to advance spatial justice and design more equitable buildings and cities. As state violence, the pandemic, and environmental collapse have exposed systemic inequities, architects and urbanists have been pushed to confront how their actions

contribute to racism and climate crisis—and how they can effect change.

Establishing an ethics of spatial justice to lead architecture forward, Dana Cuff shows why the discipline requires critical examination—in relation to not only buildings and the capital required to realize them but privilege, power, aesthetics, and sociality. That is, it requires a reevaluation of architecture’s fundamental tenets.

Organized around projects and topics, Architectures of Spatial Justice is a

compelling blend of theory, history, and applied practice that focuses on two foundational conditions of architecture: its relation to the public and its dependence on capital. The book draws on studies of architectural projects from around the world, with instructive case studies from Chile, Mexico, Japan, and the United States that focus in particular on urban centers, where architecture is most directly engaged with social justice issues.

Emerging from more than two decades of the author's own project-based research, *Architectures of Spatial Justice* examines ethically driven practices that break with professional conventions to correct long-standing inequities in the built environment, uncovering architecture's limits—and its potential.

In *The Secrets of Happy Families*, New York Times bestselling author Bruce Feiler has drawn up a blueprint for modern families — a new approach to family dynamics, inspired by cutting-edge techniques gathered from experts in the disciplines of science,

business, sports, and the military. Don't worry about family dinner. Let your kids pick their punishments. Ditch the sex talk. Cancel date night. These are just a few of the surprising innovations in this bold first-of-its-kind playbook for today's families. Bestselling author and New York Times family columnist Bruce Feiler found himself squeezed between caring for aging parents and raising his children. So he set out on a three-year journey to find the smartest

solutions and the most cutting-edge research about families. Instead of the usual family "experts," he sought out the most creative minds—from Silicon Valley to the set of *Modern Family*, from the country's top negotiators to the Green Berets—and asked them what team-building exercises and problem-solving techniques they use with their families. Feiler then tested these ideas with his wife and kids. The result is a fun, original look at how families can draw closer

together, complete with 200 never-before-seen best practices. Feiler's life-changing discoveries include a radical plan to reshape your family in twenty minutes a week, Warren Buffett's guide for setting an allowance, and the Harvard handbook for resolving conflict. The *Secrets of Happy Families* is a timely, counterintuitive book that answers the questions countless parents are asking: How do we manage the chaos of our lives? How do we teach our kids values? How do

we make our family happier? Written in a charming, accessible style, *The Secrets of Happy Families* is smart, funny, and fresh, and will forever change how your family lives every day. *Four Wheels and a Board* Doubleday Books for Young Readers Includes specific pointers on shelf layouts. Uses examples for N scale, HO scale, and ON30 scale trains. Covers a variety of scales, modeling eras, and room applications. [Architectures of Spatial Justice](#) Clash Books

Building a Grouse Dog: From Puppy to Polished Performer by Craig Doherty, is the most comprehensive, how-to manual there is for taking an eight-week-old little squirmer of any pointing breed and turning him or her into that most coveted game bird finder there is: a finished grouse dog. Unlike many general pointing-dog training books, this one concentrates on one species – the ruffed grouse. Grouse are notorious for their caginess, their wariness,

and their difficulty in being pinned down so a hunter can get close enough to flush and shoot. It takes a dog that has been trained nearly from birth to handle that task, and no one knows how to do it better than Craig Doherty. Craig was the driving force behind Field Trial Magazine, is a columnist for The Pointing Dog Journal, regularly competes in grouse trials throughout the Northeast, professionally trains grouse dogs for clients from all over the country, and – this is important –

guides grouse hunters using his own dogs trained in his outstanding methods; important because paying clients need results, and those results can only come by following dogs that know the game. A number of how-to training books tell you what to do from beginning to end; but if you have started your own training, run into problems, and consult the literature, many times you'll find that the advice is something along the lines of, "Well, you messed up because you

didn't do X, Y, and Z. Remember that so you won't ruin your next dog." Not Craig – if you have run into a snag with your current dog, Craig tells you what to do to get past it and on with the dog's completed training. So if your aim, your goal, is to own and hunt behind a finished grouse dog that knows what's what in the coverts, Building a Grouse Dog is the best guide you'll ever have. *The President's National Urban Policy Report* Reedy Press LLC This is not just a travel
