The Leader in Me Charlesbridge

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for

Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Like no book before it, Preachers of Hate uncovers an ancient hatred that threatens the life and livelihood of every American. The "new" anti-Semitism targets not only Jews, but Americans specifically and the West in general. It targets our values, our lifestyle, and our freedoms. It is the single most important issue we face when trying to make sense of the Arab world. Most Americans

will be stunned to discover the depth and extent of anti-Semitic hatred in today's Middle East and Europe, and that many Muslim leaders are not just encouraging it, but spending a great deal of money to spread the lies that spawned the terrorists responsible for the September 11 attack on America. In Preachers of Hate, bestselling author Kenneth R. Timmerman (who is not Jewish) contends that, besides Islam itself, the core unifying force in the Muslim world is a virulent strain of anti-Semitism that postulates the existence of a Jewish conspiracy to take over the world. From the pulpits of fiery Muslim clerics to the Arab street, and to the highest reaches of government and state-sponsored media, there is a belief that this thousand-year-old conspiracy has already taken hold in America and is now, especially after the war in Iraq, about to do the same in the Middle East and beyond. It is seen as no less than Muslims' historical destiny to prevent such a takeover, and to do so by any means possible. To misunderstand the ferocity of that belief is to vastly underestimate the resolve of many Muslims to repel America, Israel, and all things Western. Timmerman explores the roots of this hatred, examining its history, the religious sources upon which it draws, and how it is being transmitted to young people growing up in Arab societies by their leaders, their teachers, and their mosques. He documents how U.S. and European Union money has been used to finance hatred in Palestinian schools. He exposes the double-talk of Arab leaders and their supporters in the West. As it so often was throughout history, this new strain of Jew hatred is really about much more than Jews. They get attacked first, when the enemies of America can't attack Americans. However, what begins with the Jews never ends with the Jews. "Is there a conspiracy between America and the Jews?" asks Timmerman. "Indeed there is: A common heritage, a dedication to improving the human condition through compassion and tolerance of differences—a conspiracy of freedom. And that is why they hate us." As with the Jews throughout history, America has been "unfairly successful." As have the Jews, Americans have "profited" from the misery and poverty of others. If you hate Jews, you must also hate America. Such is the simple logic of the anti-Semite. Such, increasingly, is the logic of the Middle East. It is a message that is reinforced day in and day out by the official government-sanctioned Arab media, from the streets of Egypt, London, Lebanon, Saudi Arabia, Paris, and Gaza, and in the mosques where impassioned clerics quote verbatim texts like the Protocols of the Elders of Zion, a pillar of anti-Semitic hatred that originated in czarist Russia. As America reasserts her role in the Middle East and attempts to bring peace between Jews and Arabs, Preachers of Hate is an essential book that reframes a very complicated issue as a matter of life and death.

Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.
