### JERAMIAH CORINNE

New Women's Writing in Russia, Central and Eastern Europe Random House  
 Russia possesses one of the richest and most admired literatures of Europe, reaching back to the eleventh century. A History of Russian Literature provides a comprehensive account of Russian writing from its earliest origins in the monastic works of Kiev up to the present day, still rife with the creative experiments of post-Soviet literary life. The volume proceeds chronologically in five parts, extending from Kievan Rus' in the 11th century to the present day. The coverage strikes a balance between extensive overview and in-depth thematic focus. Parts are organized thematically in chapters, which a number of keywords that are important

literary concepts that can serve as connecting motifs and 'case studies', in-depth discussions of writers, institutions, and texts that take the reader up close and. Visual material also underscores the interrelation of the word and image at a number of points, particularly significant in the medieval period and twentieth century. The History addresses major continuities and discontinuities in the history of Russian literature across all periods, and in particular bring out trans-historical features that contribute to the notion of a national literature. The volume's time-range has the merit of identifying from the early modern period a vital set of national stereotypes and popular folklore about boundaries, space, Holy Russia, and the charismatic king that offers culturally relevant material to later writers. This volume delivers a fresh view on a series of key questions about Russia's

literary history, by providing new mappings of literary history and a narrative that pursues key concepts (rather more than individual authorial careers). This holistic narrative underscores the ways in which context and text are densely woven in Russian literature, and demonstrates that the most exciting way to understand the canon and the development of tradition is through a discussion of the interrelation of major and minor figures, historical events and literary politics, literary theory and literary innovation.

Since the late 1980s, there has been an explosion of women's writing in Russia, Central and Eastern Europe greater than in any other cultural period. This book, which contains contributions by scholars and writers from many different countries, aims to address the gap in literature and debate that exists in relation to this subject. We investigate why women's writing has become so prominent in post-socialist countries, and enquire whether writers regard their gender as a burden, or, on the contrary, as empowering. We explore the relationship in contemporary women's writing between gender, class, and nationality, as well as issues of ethnicity and post-colonialism.

At the height of the Cold War, dozens of radical and progressive writers, illustrators, editors, librarians, booksellers, and teachers cooperated to create and disseminate children's books that challenged the status quo. Learning from

the Left provides the first historic overview of their work. Spanning from the 1920s, when both children's book publishing and American Communism were becoming significant on the American scene, to the late 1960s, when youth who had been raised on many of the books in this study unequivocally rejected the values of the Cold War, *Learning from the Left* shows how "radical" values and ideas that have now become mainstream (including cooperation, interracial friendship, critical thinking, the dignity of labor, feminism, and the history of marginalized people), were communicated to children in repressive times. A range of popular and critically acclaimed children's books, many by former teachers and others who had been blacklisted because of their political beliefs, made commonplace the ideas that McCarthyism tended to call "subversive." These books, about history, science, and contemporary social conditions—as well as imaginative works, science fiction, and popular girls' mystery series—were readily available to children: most could be found in public and school libraries, and some could even be purchased in classrooms through book clubs that catered to educational audiences. Drawing upon extensive interviews, archival research, and hundreds of children's books published from the 1920s through the 1970s, *Learning from the Left* offers a history of the children's book in light of the history of the Left, and a new perspective on the links between the Old Left of the 1930s and the New Left of the 1960s. Winner of the Grace Abbott Book Prize of the Society for the History of Children and Youth

*Still Waters Run Deep* Glas Publishing  
This book is intended to capture the interest of anyone who has been attracted to Russian culture through the greats of Russian literature, either through the texts themselves, or encountering them in the cinema, or opera. Rather than a

conventional chronology of Russian literature, the book will explore the place and importance of literature of all sorts in Russian culture. How and when did a Russian national literature come into being? What shaped its creation? How have the Russians regarded their literary language? The book will use the figure of Pushkin, 'the Russian Shakespeare' as a recurring example as his work influenced every Russian writer who came after him, whether poets or novelists. It will look at such questions as why Russian writers are venerated, how they've been interpreted inside Russia and beyond, and the influences of such things as the folk tale tradition, orthodox religion, and the West

Soviet literature in general and Soviet children's literature in particular have often been labeled by Western and post-Soviet Russian scholars and critics as propaganda. Below the surface, however, Soviet children's literature and culture allowed its creators greater experimental and creative freedom than did the socialist realist culture for adults. This volume explores the importance of children's culture, from literature to comics to theater to film, in the formation of Soviet social identity and in connection with broader Russian culture, history, and society.

Alexei Maximovich Peshkov, better known as Maxim Gorky, was a Russian author considered the father of Soviet revolutionary literature and founder of the doctrine of socialist realism. After having a difficult childhood, he roamed across the Russian empire, frequently changing jobs for about fifteen years before he became a successful writer. The experiences he had during those fifteen years deeply influenced his writing. Initially, he wrote stories mainly based on the lives of tramps and social outcasts, and he became known for his naturalistic style of writing. August Nemo selected seven important short stories from this author's vast work: Her Lover One Autumn Night Twenty Six Men and a Girl The Dead Man Waiting for the Ferry The Billionaire The Birth of a Man

This book explores a range of (mis)uses of the Russian classical literature canon and its symbolic capital by contemporary Russian literature, cinema, literary

scholarship, and mass culture. It outlines processes of current canon-formation in a situation of the expiration of a literature-centric culture that has been imbued with specific messianism and its doubles. The book implements Pierre Bourdieu's theory of the cultural field, focussing on a field's constitutive pursuit of autonomy and on its flexible resistance to the double pressure of the political field and the economic field. It provides material for elaborating this theory through postulating the principal presence of a third factor of heteronomy: the 'strong neighbour' within the cultural field. Furthermore, this volume demonstrates the heuristic of comparing the current Russian (mis)uses of classical literature to prior Russian and current foreign ones. As such, it also discusses such issues as the historical relativity of a literary field's (notion of) autonomy and the geo-cultural variability of the Russian literary canon.

In *A Swim in a Pond in the Rain*, he shares a version of that class with us, offering some of what he and his students have discovered together over the years. Paired with iconic short stories by Chekhov, Turgenev, Tolstoy, and Gogol, the seven essays in this book are intended for anyone interested in how fiction works and why it's more relevant than ever in these turbulent times. In his introduction, Saunders writes, “We’re going to enter seven fastidiously constructed scale models of the world, made for a specific purpose that our time maybe doesn’t fully endorse but that these writers accepted implicitly as the aim of art—namely, to ask the big questions, questions like, How are we supposed to be living down here? What were we put here to accomplish? What should we value? What is truth, anyway, and how might we recognize it?” He approaches the stories technically yet accessibly, and through them explains how narrative functions; why we stay immersed in a story and why we resist it; and the bedrock virtues a writer must foster. The process of writing, Saunders reminds us, is a technical craft, but also a way of training oneself to see the world with new openness and curiosity. *A Swim in a Pond in the Rain* is a deep exploration not just of how great writing works but of how the mind itself works while reading, and of how the reading and writing of stories make genuine connection possible. *Calligraphy Lesson* BRILL

A history of the translation, transmission and interpretation of modernist Russian literature in China during the first half of the 20th century, this book views modern Chinese literary culture from an original and revealing perspective. It is the first English-language study of the subject to draw on sources in both Russian and Chinese, and it also shows the crucial role of English, German and Japanese translations in mediating knowledge of Russian literature in China.
