Identifying and

Managing Project Risk Wiley

JavaServer Pages (JSP) is a multipurpose language based on Java technology that provides a simplified, fast way to create dynamic Web content. JSP is specific to Web page creation and rendering, and is a key Web technology for developers and administrators working with Java. Explains how JSP can be used to simplify tasks, shorten the development cycle, and integrate Web content with other elements of J2EE Shows how JSP enables Web designers and other nonprogrammers to quickly gain essential abilities for the creation of dynamic Web pages

Towards Smart World Springer
ProjectX India | 15th

October 2020 edition provides you with power -packed information on 172 projects from 51 sectors of the Indian economy. In this issue we have covered 33 projects in Conceptual/Planning Stage, 23 Contract Awards, 37 Projects Under Implementation, 58 Tenders, and 21 other projects. The project information is provided along with nearest contacts to facilitate B2B exchange. This issue covers projects from sectors such as Access Control System, Airports/Aviation, Automotive Components, Battery, Breweries/Distilleries, Canal/Dam/Irrigation, Cement, Concrete Block, Construction, Consultancy Services, Convention Centre,

Data Centre, Effluent Treatment, Electricals/Electronics, EV Batteries, FMCG, Garments, Healthcare, Helmets, High Speed Rail, Industrial, Industrial Parks, Iron and Steel, IT/ITES, Material Handling, Medical Equipment, Metro Rail, Mining & Metallurgy, Petroleum, Pipes, Polymers, Power, Prefabricated Structures, Pumps, Railways, Real Estate, Research Centre, Roads/Highways/Bridges, Safety and Surveillance System, Solar Energy, Solid Waste, Sports Infrastructure, Textiles, Tyres, Urban Development, Waste Management, Waste-to-Energy, Wastewater Treatment, Water Sector, Water Treatment, and Wind Energy.

Introducing

Microsoft .NET CRC Press

A major new professional reference work on fingerprint security systems and technology from leading international researchers in the field. Handbook provides authoritative and comprehensive coverage of all major topics, concepts, and methods for fingerprint security systems. This unique reference work is an absolutely essential resource for all biometric security professionals, researchers, and systems administrators.

Handbook of Fingerprint Recognition
Springer

Towards Smart World: Homes to Cities Using Internet of Things provides an overview

of basic concepts from the rising of machines and communication to IoT for making cities smart, real-time applications domains, related technologies, and their possible solutions for handling relevant challenges. This book highlights the utilization of IoT for making cities smart and its underlying technologies in real-time application areas such as emergency departments, intelligent traffic systems, indoor and outdoor securities, automotive industries, environmental monitoring, business entrepreneurship, facial recognition, and motion-based object detection. Features The book covers the challenging issues related to sensors, detection, and tracking

of moving objects, and solutions to handle relevant challenges. It contains the most recent research analysis in the domain of communications, signal processing, and computing sciences for facilitating smart homes, buildings, environmental conditions, and cities. It presents the readers with practical approaches and future direction for using IoT in smart cities and discusses how it deals with human dynamics, the ecosystem, and social objects and their relation. It describes the latest technological advances in IoT and visual surveillance with their implementations. This book is an ideal resource for IT professionals, researchers, undergraduate or

postgraduate students, practitioners, and technology developers who are interested in gaining deeper knowledge and implementing IoT for smart cities, real-time applications areas, and technologies, and a possible set of solutions to handle relevant challenges.

Dr. Lavanya Sharma is an Assistant Professor in the Amity Institute of Information

Technology at Amity University UP, Noida, India. She has been a recipient of several prestigious awards during her academic career. She is an active nationally recognized researcher who has published numerous papers in her field.

Microsoft has introduced a large number of changes to the way that the .NET Framework operates. Familiar technologies have being altered, best practices replaced, and developer methodologies adjusted. Many developers find it hard to keep up with the pace of change across .NET's ever-widening array of technologies. You may know what's happening in C#, but how about the Azure cloud? How is that going to affect your work? What are the limitations of the pLINQ syntax? What you need

is a roadmap. A guide to help you see the innovations that matter and to give you a head start on the opportunities available in the new framework. Introducing .NET 4.0: with Visual Studio 2010 is designed to provide you with just that roadmap. It serves as a no-nonsense primer that will help experienced .NET developers understand the impact of the new framework and its associated technologies. This book will keep you updated on the changes and help you to seize new opportunities confidently and quickly.

ICT Systems and Sustainability Springer Science & Business Media

This new book, by the original developer of

the BACnet standards, explains how BACnet's protocols manage all basic building functions in a seamless, integrated way. BACnet is a data communication protocol for building automation and control systems, developed within ASHRAE in cooperation with ANSI and the ISO. This book explains how BACnet works with all major control systems--including those made by Honeywell, Siemens, and Johnson Controls--to manage everything from heating to ventilation to lighting to fire control and alarm systems. BACnet is used today throughout the world for commercial and institutional buildings with complex mechanical and

electrical systems. Contractors, architects, building systems engineers, and facilities managers must all be cognizant of BACnet and its applications. With a real 'seat at the table,' you'll find it easier to understand the intent and use of each of the data sharing techniques, controller requirements, and opportunities for interoperability between different manufacturers' controllers and systems. Highlights include: * A review of the history of BACnet and its essential features, including the object model, data links, network technologies, and BACnet system configurations; * Comprehensive coverage of services

including object access, file access, remote device management, and BACnet-2012's new alarm and event capabilities; * Insight into future directions for BACnet, including wireless networking, network security, the use of IPv6, extensions for lifts and escalators, and a new set of BACnet Web Services; * Extensive reference appendices for all objects and services; and * Acronyms and abbreviations

Ten Steps to a Results-based Monitoring and Evaluation System
Springer Nature

This book covers a variety of topics that span from industry to academics: hybrid AI model for IDS in IoT, intelligent authentication framework for IoMT

mobile devices for extracting bioelectrical signals, security audit in terms of vulnerability analysis to protect the electronic medical records in healthcare system using AI, classification using CNN a multi-face recognition attendance system with anti-spoofing capability, challenges in face morphing attack detection, a dimensionality reduction and feature-level fusion technique for morphing attack detection (MAD) systems, findings and discussion on AI-assisted forensics, challenges and open issues in the application of AI in forensics, a terrorist computational model that uses Baum-Welch optimization to

improve the intelligence and predictive accuracy of the activities of criminal elements, a novel method for detecting security violations in IDSs, graphical-based city block distance algorithm method for E-payment systems, image encryption, and AI methods in ransomware mitigation and detection. It assists the reader in exploring new research areas, wherein AI can be applied to offer solutions through the contribution from researchers and academia.

Control System Migrations Springer Nature

This book answers the questions "What is Microsoft .NET and how do I profit from it?" The author breaks these

questions down into "What problems does Microsoft .NET solve?"; "What architectural approaches does it take to solve them?"; and "How do I get started using it?" Each chapter is written in a logical, pyramidal format, with simpler, high-level concepts introduced first.

Resources in Education

Microsoft Press

This book contains all the essential information required for Java Servlet programming at various levels, from simple Web applications to enterprise-wide solutions. Topics include the basics of servlets & servlet programming; HTML and servlets; servlets and databases; JSP basics; the Model View Controller (MVC)

Architecture; security, and tips and tricks for the servlet programmer.

Introducing .NET 4.0

World Bank

Publications

This book gathers high-quality, peer-reviewed research papers presented at the Second International Conference on Computer Science, Engineering and Education Applications (ICCSEEA2019), held in Kiev, Ukraine on 26–27 January 2019, and jointly organized by the National Technical University of Ukraine “Igor Sikorsky Kyiv Polytechnic Institute” and the International Research Association of Modern Education and Computer Science. The papers discuss state-of-the-art topics and advances in computer science;

neural networks; pattern recognition; engineering techniques; genetic coding systems; deep learning and its medical applications; and knowledge representation and its applications in education. Given its scope, the book offers an excellent resource for researchers, engineers, management practitioners, and graduate and undergraduate students interested in computer science and its applications in engineering and education.

Summary of Flat-Plate Solar Array Project Documentation

Cambridge University Press

Networks of today are going through a rapid evolution and there are

many emerging areas of information networking and their applications. Heterogeneous networking supported by recent technological advances in low power wireless communications along with silicon integration of various functionalities such as sensing, communications, intelligence and actuations are emerging as a critically important disruptive computer class based on a new platform, networking structure and interface that enable novel, low cost and high volume applications. Several of such applications have been difficult to realize because of many interconnections problems. To fulfill their large range of

applications different kinds of networks need to collaborate and wired and next generation wireless systems should be integrated in order to develop high performance computing solutions to problems arising from the complexities of these networks. This volume covers the theory, design and applications of computer networks, distributed computing and information systems. The aim of the volume "Advanced Information Networking and Applications" is to provide latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to the

emerging areas of information networking and applications.

ProjectX India

Springer Nature

An effective state is essential to achieving socio-economic and sustainable development. With the advent of globalization, there are growing pressures on governments and organizations around the world to be more responsive to the demands of internal and external stakeholders for good governance, accountability and transparency, greater development effectiveness, and delivery of tangible results. Governments, parliaments, citizens, the private sector, NGOs, civil society, international organizations and

donors are among the stakeholders interested in better performance. As demands for greater accountability and real results have increased, there is an attendant need for enhanced results-based monitoring and evaluation of policies, programs, and projects. This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system. These steps begin with a OC Readiness AssessmentOCO and take the practitioner through the design, management, and importantly, the sustainability of such

systems. The Handbook describes each step in detail, the tasks needed to complete each one, and the tools available to help along the way."

Cleland Project

Management Literature

Award 2010 It's no

wonder that project

managers spend so

much time focusing

their attention on risk identification.

Important projects tend

to be time constrained,

pose huge technical

challenges, and suffer

from a lack of adequate resources. Identifying and Managing Project Risk, now updated and consistent with the very latest Project Management Body of Knowledge (PMBOK)® Guide, takes readers through every phase of a project, showing them how to consider the possible risks involved at every point in the process. Drawing on real-world situations and hundreds of examples, the book outlines proven methods, demonstrating key ideas for project risk planning and showing how to use high-level risk assessment tools. Analyzing aspects such as available resources, project scope, and scheduling, this new edition also explores the growing area of

Enterprise Risk Management. Comprehensive and completely up-to-date, this book helps readers determine risk factors thoroughly and decisively...before a project gets derailed.

Machine Learning for Predictive Analysis Momentum Press

This book proposes new technologies and discusses future solutions for ICT design infrastructures, as reflected in high-quality papers presented at the 6th International Conference on ICT for Sustainable Development (ICT4SD 2021), held in Goa, India, on 5–6 August 2021. The book covers the topics such as big data and data mining, data fusion, IoT programming toolkits

and frameworks, green communication systems and network, use of ICT in smart cities, sensor networks and embedded system, network and information security, wireless and optical networks, security, trust, and privacy, routing and control protocols, cognitive radio and networks, and natural language processing. Bringing together experts from different countries, the book explores a range of central issues from an international perspective.

Research in Education John Wiley & Sons
SMART GRIDS for SMART CITIES Written and edited by a team of experts in the field, this second volume in a two-volume set focuses on an

interdisciplinary perspective on the financial, environmental, and other benefits of smart grid technologies and solutions for smart cities. This second volume in this groundbreaking two-volume set continues the authors' and editors' mission to present the concepts and best practices of smart grids and how they can be utilized within the framework of a technological tapestry to create smart cities.

Continuing to go through the challenges and their practical solutions, this second volume includes chapters on waste management, e-waste, automotive and transportation engineering, and how internet-of-things can

be utilized within these "smart" technologies, and many others. Like its predecessor, this exciting new volume covers all of these technologies, including the basic concepts and the problems and solutions involved with practical applications in the real world.

Whether for the veteran engineer or scientist, the student, or a manager or other technician working in the field, this volume is a must-have for any library.

Springer Nature

The compiled volume originates from the notable contributions presented at the 1st International Conference on Advancement of Intelligent

Computational Methods and Technologies (AICMT2023), which took place in a hybrid format on June 27, 2023, at Delhi Technical Campus, Greater Noida, Uttar Pradesh, India. This comprehensive collection serves as an exploration into the dynamic domain of intelligent computational methods and technologies, offering insights into the latest and upcoming trends in computation methods. AICMT2023's scope encompasses the evolutionary trajectory of computational methods, addressing pertinent issues in real

time implementation, delving into the emergence of new intelligent technologies, exploring next-generation problem-solving methodologies, and other interconnected areas. The conference is strategically designed to spotlight current research trends within the field, fostering a vibrant research culture and contributing to the collective knowledge base.

Journal of the Senate of the United States of America AMACOM Index is composed of 3 sections: Basic classifications subject, Current VA directives, and Rescinded VA directives.
