MUHAMMAD AMARIS

The History and Antiquities of Glamorganshire and Its Families London : Longmans, Green, Reader
 A masterful work of personal reportage, this volume is also a vibrant portrait of a mysterious people and an essential document of a disappearing culture. Fabled, feared, romanticized, and reviled, the Gypsies—or Roma—are among the least understood people on earth. Their culture remains largely obscure, but in Isabel Fonseca they have found an eloquent witness. In *Bury Me Standing*, alongside unforgettable portraits of individuals—the poet, the politician, the child prostitute—Fonseca offers sharp insights into the humor, language, wisdom, and taboos of the Roma. She traces their exodus out of India 1,000 years ago and their astonishing history of persecution: enslaved by the princes of medieval Romania; massacred by the Nazis; forcibly assimilated by the communist regimes; evicted from their settlements in Eastern Europe, and most recently, in Western Europe as well. Whether as handy scapegoats or figments of the romantic imagination, the Gypsies have always been with us—but never before have they been brought so vividly to life. Includes fifty black and white photos.

Conan wasn't the only Robert E. Howard sword and sorcery icon to be adapted to Marvel Comics! Following Conan's breakout success, Roy Thomas set his sights on Howard's legendary barbarian king of Valusia: Kull! Marie and John Severin contributed what many consider the creative highlight of their careers, in tales that showed how uneasy hung the crown on the head of Kull -- especially when confronting wicked sorcerer Thulsa Doom! The art of Mike Ploog also features heavily, along with contributions from some of the era's top talents...including Kull's first appearance, drawn by comics legend Bernie Wrightson! COLLECTING: Kull the Conqueror (1971) 1-10, Kull the Destroyer (1973) 11-29, Creatures on the Loose (1970) 10, Monsters on the Prowl (1971) 16; material from Kull and the Barbarians (1975) 1-3, Savage Sword of Conan (1974) 9, Conan the Barbarian (1970) 10, Conan the Barbarian Annual (1973) 3, FOOM (1973) 14

Excerpt from *The Century Atlas of the World* All the maps have been made especially for this Atlas, and have been based upon the latest and best official information, with a comparison of the results of recent explorations. Those of the United States are founded upon maps issued by the United States government, and also upon many others published by State and local authorities; those of England, on the map of the Ordnance Survey; and those of all other countries upon similar authoritative materials. The railroads, which are printed in red to increase the legibility and attractiveness of the maps, are shown in accordance with the most recent official information; the figures for depth of water in seas, bays, and harbors have been taken from the British Admiralty charts and those of the United States Hydrographic Office; the heights of mountains and the elevations of lakes are those given by the latest surveys; and the various political divisions are exhibited in accordance with the most recent adjustments. In portraying the mountain systems of

the United States a feature has been introduced which is a novelty in general atlases, namely, lines of equal elevation above the sea (contour-lines), which have been printed in olive or brown. These have been taken from the published results of the Government Surveys, and are given for elevations of 100, 500, feet, etc. This method has been extended to the maps of Mexico also, by means of determinations furnished by Mr. H. M. Wilson of the Geological Survey. About the Publisher

The 2015 Global Hunger Index suggests that despite progress in reducing hunger worldwide, hunger levels in 52 of 117 countries in the 2015 Global Hunger Index remain “serious” or “alarming.” Since achieving and maintaining food and nutrition security (FNS) remains a goal for all countries, it is important to understand the individual, national, and global factors that affect FNS. This paper proposes an analytical framework to identify and analyze the respective roles of key long-term drivers of FNS. We start by identifying what the key variables affecting FNS are at the household and country level, and then we continue by defining what the main exogenous or endogenous drivers affecting these variables are. We discuss the key drivers of both aggregated food supply and demand and therefore their impact on prices. Specifically, for aggregated food demand, we discuss demographic factors, income growth, changes in dietary preferences, aggregated domestic distortions, and overall quality of the food system. With respect to the drivers of aggregated food supply, we discuss land available for food products and the drivers behind land availability, the share of waste/losses generated by the food system, and the normalized average yield. We define yield as the amount of nutrients produced by unit of land. It depends both on the physical yield of the crop or the livestock and on the quality of the food produced. It also can be affected by the changes in production patterns linked to the different dietary patterns of the consumers and by climate change. We emphasize the fact that in many cases, key drivers may have ambiguous effects on the FNS situation of different agents. For instance, more liberal trade policies will affect real income, terms of trade, demand and supply, returns of factors, foreign direct investments, and food prices and thus may lead to the improvement of the global-level FNS, that is, the FNS of the majority of the population. At the same time, more liberal trade policies may bring food insecurity to some households. Therefore, careful quantitative assessment is needed for each policy option. Finally, we propose a typology of variables that will help modelers adapt their models to study the different drivers through both direct and indirect effects.

Hot off the success of *Hellboy: Into the Silent Sea*, Gianni's original masterpiece returns in paperback! Includes an introduction by Pulitzer Prize-winning novelist Michael Chabon! Gary Gianni created one of the strangest occult detective teams in comics history: millionaire filmmaker Lawrence St. George and his associate, Benedict, of the venerable guild of Corpus Monstrum. They navigate a peculiar and deadly world plagued by squid pirates, zombie cowboys, abominable snowmen, mustachioed skulls, and fat, flying demons. Gianni's meticulous and evocative art combined with his haunting but often hilarious writing create a horror comic unlike anything else on

the stands. This book also includes classic prose stories by Robert E. Howard, Clark Ashton Smith, and more, illustrated by Gianni. "These are (along with a few issues of Stan and Jack's Fantastic Four) my all time favorite comic book stories."—Mike Mignola "Gianni is a master—The MonsterMen leaves no doubt: the dude knows how to rock a comic book page."—Michael Chabon

Nocturnals: Black Planet Shannon : Irish University Press

This title was first published in 2000. Founded in 1914 by Wyndham Lewis and christened by Ezra Pound, the Vorticism movement was a sustained act of aggression against the moribund Victorianism seen as stifling to artistic energies. Inspired by the example of F.T. Marinetti and the Futurists, the Vorticists were nevertheless harshly critical of the Futurists' naive enthusiasm for modernity. They created their own style of geometric abstraction to celebrate the new consciousness of humanity in a mechanized urban environment. But their splintered and discordant style also measured the cost of the psychic disruption that modernity caused. This illustrated guide to the movement covers topics including sculpture, painting, literary Vorticism, women in Vorticism and Vorticist aesthetics.
