The first comprehensive survey of the important corpus of Indic literature on Sanskrit grammar, extant in Tibetan translation in the Buddhist canon.

Core of the study is the description of the forty-seven Sanskrit grammatical treatises covering some two thousand folios in the canon. The contents of these texts and the historical information regarding their Tibetan translators are examined in detail. Further chapters are devoted to the grammatical analysis in an eighth-century Tibetan handbook for translators, and to data from Tibetan historiography. The book offers the first systematic study of the extent and the historical development of the Tibetan expertise in Sanskrit grammar, a central scholastic discipline in Buddhism. It opens up a section of Tibetan literature essential to the understanding of the Indo-Tibetan indigenous grammatical traditions.

Ancient Supercontinents and the Paleogeography of Earth offers a systematic examination of Precambrian cratons and supercontinents. Through

detailed maps of drift histories and paleogeography of each continent, this book examines topics related to Earth's tectonic evolution prior to Pangea, including plate kinematics, orogenic development, and paleoenvironments. Additionally, this book discusses the methodologies used, principally paleomagnetism and tectonostratigraphy, and addresses geophysical topics of mantle dynamics and geodynamo evolution over billions of years.

Structured clearly with consistent coverage for Precambrian cratons, this book combines state-of-the-art paleomagnetic and geochronologic data to reconstruct the paleogeography of the Earth in the context of major climatic events such as global glaciations. It is an ideal, up-to-date reference for geoscientists and geographers looking for answers to questions surrounding the tectonic evolution of Earth. - Provides robust paleogeographies of Precambrian cratons based on high-quality paleomagnetic and geochronologic data and critically tested by global geological datasets - Includes links to updated databases for the Precambrian such as PALEOMAGIA and the Global Paleomagnetic Database (GPMDB) - Presents full-color maps of the drift histories of each continent as well as their paleogeographies - Discusses key questions regarding continental drift, the supercontinent cycle, and the geomagnetic dipole hypothesis and analyzes palaeogeography in the context of Earth's holistic evolution

This Atlas provides the main outlines of Islamic history from the immediate pre-Islamic period until the end of 1920, that is, before most parts of the Muslim world became sovereign nation states. Each map is accompanied by a text that contextualises, explains, and expands upon the map, and are

fully cross-referenced. All of the maps are in full colour: 18 of them are double-page spreads, and 25 are single page layouts. This is an atlas of Islamic, not simply Arab or Middle Eastern history; hence it covers the entire Muslim world, including Spain, North, West and East Africa, the Indian sub-continent, Central Asia and South-East Asia. The maps are not static, in that they show transitions within the historical period to which they refer: for instance, the stages of the three contemporaneous Umayyad, Fatimid and 'Abbasid caliphates on Map 10, or the progress of the Mongol invasions and the formation of the various separate Mongol khanates between 1200 and 1300 on Map 21. Using the most up to date cartographic and innovative design techniques, the maps break new ground in illuminating the history of Islam. Brought right up to date with the addition of a Postscript detailing The Islamic World since c.1900, a Chronology from 500 BCE to 2014, and additional endpaper maps illustrating The Spread of Islam through the Ages and The Islamic World in the 21st Century, the Atlas of Islamic History is an essential reference work and an invaluable textbook for undergraduates studying Islamic history, as well as those with an interest in Asian History, Middle East History and World History more broadly.

This handbook explores the ways in which histories of colonialism and postcolonial thought and theory cast light on our understanding of the ancient Mediterranean world and the discipline of Classics, utilizing a wide body of case studies and providing avenues for future research and discussion. It brings together chapters by a wide, international, and intersectional range of scholars coming from a variety of backgrounds and sub-disciplinary perspectives, and from across the chronological and geographical scope of Classics. Chapters cover the state of current research into ancient Mediterranean and South, Central, and West Asian histories. They provide case studies to illustrate both how postcolonial thought has already illuminated our understanding of the ancient Mediterranean world and beyond, as well as its potential for the future. Chapters also provide opportunities for reflection on the current state of the discipline. An introduction by the volume editors offers a survey of the development of postcolonial theory, its relationship to other bodies of theory, and its connections to Classics. Toward the end of the book, three scholars with different career and disciplinary perspectives provide short reflections on the themes of the volume and the directions of future research. The Routledge Handbook of Classics, Colonialism, and Postcolonial Theory offers an impressive collection of current research and thought on the subject for students and scholars in classical studies understood in its larger sense as well as in related disciplines such as Archaeology, Ancient History, Imperial History and the History of Colonialism, Reception Studies, and Museum Studies. For anyone interested in classical antiquity, it provides an engaging introduction to a potentially bewildering, but ultimately vital and enriching, body of thought and theory.

*Canada Through Time, Book Two* Routledge

For much of its 130-year history, the Bar U Ranch can claim to have been one of the most famous ranches in Canada. Its reputation is firmly based on the historical role that the ranch has played, its size and longevity, and its association with some of the remarkable people who have helped develop the cattle business and build the Canadian West. The long history of the ranch allows the evolution of the cattle business to be traced and can be seen in three distinct historical periods based on the eras of the individuals who owned and managed the ranch. These colourful figures, beginning with Fred Stimson, then George Lane, and finally Pat Burns, have left an indelible mark on the Bar U as well as Canadian ranching history. The Bar U and Canadian Ranching History is a fascinating story that integrates the history of ranching in Alberta with larger issues of ranch historiography in the American and Canadian West and contributes greatly to the overall understanding of ranching history.
