Handbook on Unani Medicines with Formulae, Processes, Uses and Analysis Academic Press

This comprehensive and well-written book presents the fundamental concepts of Pharmacotherapeutics, aiming at the safe and effective use of drugs in the treatment of disease. It is interdisciplinary in its approach and provides a basis for understanding the actions and uses of drugs in man. It is written in a simple and easy-to-understand language. The text is divided into sixteen chapters

Rasayana European Alliance for Innovation

New Look to Phytomedicine: Advancements in Herbal Products as Novel Drug Leads is a compilation of in-depth information on the phytopharmaceuticals used in modern medicine for the cure and management of difficult-to-treat and challenging diseases.

Readers will find cutting-edge knowledge on the use of plant products with scientific validation, along with updates on advanced herbal medicine in pharmacokinetics and drug delivery. This authoritative book is a comprehensive collection of research based, scientific validations of bioactivities of plant products, such as anti-infective, anti-diabetic, anti-cancer, immune-modulatory and metabolic disorders presented by experts from across the globe. Step-by-step information is presented on chemistry, bioactivity and the functional aspects of biologically active compounds. In addition, the pharmacognosy of plant products with mechanistic descriptions of their actions, including pathogenicity is updated with information on the use of nanotechnology and molecular tools in relation to herbal drug research. Compiles up-to-date information on the chemotherapeutics used in the treatment of infective and metabolic disorders Presents advancements in the discovery of new drugs from plants using molecular and nanotechnology tools Examines detailed information on the use of herbals agents in cancer, HIV and other ailments, including diabetes, malaria and neurological disorders

The All Pakistan Legal Decisions Taylor & Francis

Containing cases decided by the Privy Council, federal, provincial, shariat courts, and high courts of various Pakistani jurisdictions. *OECD Guidelines for the Testing of Chemicals, Section 4 Test No. 408: Repeated Dose 90-Day Oral Toxicity Study in Rodents* V&S Publishers

Pharmacognosy: Fundamentals, Applications and Strategies explores a basic understanding of the anatomy and physiology of plants and animals, their constituents and metabolites. This book also provides an in-depth look at natural sources from which medicines are derived, their pharmacological and chemical

properties, safety aspects, and how they interact with humans. The book is vital for future research planning, helping readers understand the makeup, function, and metabolites of plants in a way where the history of their usage can be linked to current drug development research, including in vitro, in vivo, and clinical research data. By focusing on basic principles, current research, and global trends, this book provides a critical resource for students and researchers in the areas of pharmacognosy, pharmacy, botany, medicine, biotechnology, biochemistry, and chemistry. Covers the differences between animal and plant cells to facilitate an easier transition to how the body interacts with these entities Contains practice questions and laboratory exercises at the end of every chapter to test learning and retention Provides a single source that covers fundamental topics and future strategies, with the goal of enabling further research that will contribute to the overall health and well-being of mankind

Scientific Basis for Ayurvedic Therapies The Unani Pharmacopoeia of India Handbook on Unani Medicines with Formulae, Processes, Uses and Analysis

The Spectrum Of This Volume Encompasses The Substantive Dimensions Of Vedic Medicine; Ayurveda, Unani And Siddha Systems; A Comparative Overview Of Them; Yoga; Folk-Medicine; Indian Medicine In The Colonial Period; An Appraisal Of Indian Pharmaceuticals; Traditional Knowledge Of Plants And Animals, Besides On Introductory Perspective On Traditional Medicine. In Its Twenty-Two Chapters Contributed By Experts In Their Fields, This Volume Endeavours To Present Authentic And Critical Insights Into The Nature And Structure As Well As The Expanse Of Medicine In India. It Has An Extensive Bibliography Of Over Eight Hundred Titles, Both Primary And Secondary, For Further Studies By Those Who Are Interested In Indian Medicine. This Volume Is Perhaps The First Of Its Type In Providing Under One Cover Practically A Complete Picture Of Medicine As Developed In India Right From The Vedic Times. *Plural Medicine, Tradition and Modernity, 1800-2000* Academic Press

Until relatively recently, much of the information on India's research into their medicinal plants has remained within India, mainly published within Indian journals. However, today the field of Ayurveda is expanding, with the integration of herbs and

minerals discovered in other countries and the strengthening of academic knowledge networks worldw

National Formulary of Unani Medicine Springer Science & Business Media

As an alternative form of medicine, Unani has found favour in India. These Unani practitioners can practice as qualified doctors in India, as the government approve their practice. Unani medicine is very close to Ayurveda. Both are based on theory of the presence of the elements (in Unani, they are considered to be fire, water, earth and air) in the human body. According to followers of Unani medicine, these elements are present in different fluids and their balance leads to health and their imbalance leads to illness. Government have exclusive department of Indian system of medicine inclusive of Unani under Health ministry and several states have department and institutions to ensure the proper regulation and development of Unani medicine in India. Herb gardens, nursery of medicinal plants, experimental and field scale cultivation are the major initiatives taken for the improvement of medicine. Skin disease, liver disorder, sexual disturbances, pulmonary, sinus and communicable diseases are the major effective treatment achieved areas for Unani. Tremendous progress has been registered in the development of modern medicine. Yet, medicinal plants continue to be an important source of drugs throughout the world. Unani medicine is one of them, plant as a source of drugs of much more important for the developing countries. This book majorly deals with the, habitat, description, procedure and time of collection, chemical constituents, method of processing, therapeutic uses of medicinal plants. This book also constitutes the list of institutes of Unani medicines, list of college of Unani medicines in India, world importers of natural medicine. This publication is one of its kinds which clearly indicate the usefulness of Unani medicine, shows how the plant secrets, preserve the natural secrets/ hormones/ juices which ultimately uses in Unani system of medicine. This book is most informative and useful for students, Research scholars and scientist. We hope this book will achieve the long standing demand of herbal chemists. Japanese Kampo Medicines for the Treatment of Common Diseases - Focus on Inflammation provides researchers and clinicians with a current look at how Kampo medicines can be used to effectively treat inflammatory disorders. Japanese Kampo medicines are a mixture of natural and herbal medicines that are available in Japan for the treatment of various diseases. Given their therapeutic potential, they are often prescribed instead of, or alongside, allopathic medicines. Kampo medicines are becoming more widespread and have proven effective for the treatment of a variety of inflammatory diseases, such as colitis, dermatitis, myocarditis, hepatitis, cardiomyopathy, and nephritis. This book offers background on Japanese Kampo medicines, along with a compilation of the published scientific data for several different types of Kampo medicines. It is an evidence-based guide for all those involved in, or interested in, the research and practice of Kampo medicine. Includes both preclinical and clinical data published from a variety of sources and compiled into one book Provides insight for researchers and clinicians on which Kampo medicines will provide the least side effects and offer the most effective therapy for a particular illness Offers important data that will help to inform future research and widen practice in this area

Indian Medicinal Plants Academic Press

Nature has blessed India with a vast variety of herbal and medicinal plants and shrubs that grows in different climatic regions from the frozen Himalayas in the north to the tropical forests in the south. From times this immemorial rich beauty has been used in preparing herbal medicine to cure various disease and to promote a great repository of this knowledge, organized in the form of unani and ayurvedic herbal systems of medicine. The system has a mass following and word wide acceptability. UNANI was derived from the word IONIAN which indicates its origin to Greece TIBB means medicine. Unani system of medicine is a synthesis of Greek and Arabs system. Unani physicians were the first to classify the disease on the basis of different anatomical and physiological symptoms of the body. Hippocrate (460-377BC) who firstly postulated the concept of disease is due to the imbalance of humors and hence emphasized on natural knowledge and hence freed Medicine from the realm of superstition and magic, and gave it the status of science. Arab physicians introduced unani pathy in India which took firm root in the soil soon. Unani pathy had its days in India during 13th and 17th century's .soon it spread all over the country and remained popular among the masses, even after the downfall of Mughal Empire. It got a set back during British rule but still remained in practice as it enjoyed the faith of masses. The unani pathy survived during British rule due to the efforts of the sharifi family in delhi. the Azizi family of Lucknow and the Nizams of Hyderabad. Hakim ajmal khan (1868-1927) from sharifi family was an outstanding physician and scholar of unani medicine kept the tempo high. Unani medicine, as is well known, based on the Hippocratic humoral theory. This theory supposes the presence of four humors in the body viz: blood, phlegm, yellow bile and black bile. The mizaj of individuals are expressed by word damawi (sanguine), balghami (phlegmatic), safrawi (choleric) and saudawi (melancholic) according to the dominancy of the humour. Every person is supposed to have a unique humoral constitution which represents his healthy state and any change in this state causes illness of the said person. The severity of the disease depends directly upon the change in equilibrium from mizaj. There are three major quwa (faculties) which regulate human body viz. Quwwate nafsania (psychic faculties), Quwwate haivania (vital faculties) and Quwwate tabiyya (physical faculties). These quwa (faculties) are specific for a particular tissue or organ on which the specific functions of that organ depend. Quwwate tabiyya is concerned with taghzia (nutrition), namu (growth) and tawleed (reproduction) and jigar is considered uzwe raees (epicenter) of this quwwat. Quwwate haivaniya is concerned with tadbeer of rooh, which brings life to the part it supplies. Qalb is uzwe raees of this faculty. Quwwat nafsania is concerned with intellect, sensory and motor functions and dimagh (brain) is supposed to be seat of this faculty.

The International Conference on ICT for Digital, Smart, and Sustainable Development (ICIDSSD'20) aims to provide an annual platform for the researchers, academicians, and professionals from across the world. ICIDSSD'20, held at Jamia Hamdard, New Delhi, India, is the second international conference of this series of conferences to be held annually. The conference majorly focuses on the recent developments in the areas relating to Information and Communication Technologies and contributing to Sustainable Development. ICIDSSD'20 has attracted research papers pertaining to an array of exciting research areas. The selected papers cover a wide range of topics including but not limited to Sustainable Development, Green Computing, Smart City, Artificial Intelligence, Big Data, Machine Learning, Cloud Computing, IoT, ANN, Cyber Security, and Data Science. Papers have primarily been judged on originality, presentation, relevance, and quality of work. Papers that clearly demonstrate results have been preferred. We thank our esteemed authors for having shown confidence in us and entrusting us with the publication of their research papers. The success of the conference would not have been possible without the submission of their quality research works. We thank the members of the International Scientific Advisory Committee, Technical Program Committee and members of all the other committees for their advice, guidance, and efforts. Also, we are grateful to our technical partners and sponsors, viz. HNF, EAI, ISTE, AICTE, IIC, CSI, IETE, Department of Higher Education, MHRD and DST for sponsorship and assistance.

ICIDSSD 2020 Academic Press

Drawing on indigenous and scientific knowledge of medicinal plants, *Traditional Herbal Therapy for the Human Immune System* presents the protective and therapeutic potential of plant-based drinks, supplements, nutraceuticals, synergy food, superfoods, and other products. Medicinal plants and their products can affect the immune system and act as immunomodulators. Medicinal plants are popularly used in folk medicine to accelerate the human immune defence and improve body reactions against infectious or exogenous injuries, as well as to suppress the abnormal immune response occurring in immune disorders. This book explains how medicinal plants can act as a source of vitamins and improve body functions such as enhanced oxygen circulation, maintained blood pressure and improved mood. It also outlines how specific properties of certain plants can help boost the immune system of humans with cancer, HIV, and COVID-19. Key features: Provides specific information on how to accelerate and/or fortify the human immune system by using medicinal plants. Presents scientific understanding of herbs, shrubs, climbers and trees and their potential uses in conventional and herbal medicine systems. Discusses the specific role of herbal plants that act as antiviral and antibacterial agents and offer boosted immunity for cancer, H1N1 virus, relieving swine flu, HIV and COVID-19 patients. Part of the Exploring Medicinal Plants series, this book is useful for researchers and students, as well as policy makers and people working in industry, who have an interest in plant-derived medications.

[Pakistan Journal of Botany](#) CRC Press

This book looks at madrasas and educational institutions run by Muslim communities in India focusing on the history, social relevance and importance of these institutions. It provides a sensitive and in-depth analysis of the push and pull of tradition, religiosity and modernity within these establishments. The book studies several institutions in Kozhikode, Surat, Mumbai, Hyderabad, Barak Valley in Assam, Ladakh, Delhi and several cities in Uttar Pradesh and examines new initiatives, curricula, models of education and professional training being offered. It contextualises educational reforms in madrasas in response to changing policies and larger socio-economic realities in contemporary India. It also interrogates stereotypes associated with Islam and madrasa education, paying particular attention to their syllabi and desired outcomes. This book also looks at the roles and positions of women in these institutions. Emphasising the long and complex history of Muslim communities and madrasas, the book showcases the remarkable diversity of approaches and pedagogical practices which combine deeni and duniyati education across India today. This book will be of interest to students and researchers of the history of education, religious education, comparative education and sociology. It will also be useful to people working with NGOs and policymakers in the field of educational reform and planning.

Dr L.M. Singhvi (1931–2007) was an eminent Indian jurist, a distinguished parliamentarian, a celebrated statesman, an able administrator, a brilliant scholar, a prolific writer, and a diplomat par excellence. He was India's second longest-serving high commissioner to the United Kingdom, from 1991 to 1997, and was conferred the Padma Bhushan in 1998. Dr Singhvi was deeply wedded to human service, and wrote on a variety of issues which are relevant in contemporary sociopolitical discourse. This work, alluding to the multifaceted personality of Dr L.M. Singhvi, highlights his scholarly contribution in varied fields of human activities such as law, diplomacy, democracy, and literature. It brings together his unpublished papers and lectures which address topics ranging from human rights, foreign policy issues, Kashmir, centre-state relations, public administration, legal issues, to education, healthcare, civil services, and Indology. The comprehensive introduction knits together the themes discussed in the volume, and emphasizes their relevance in today's times. *Traditional Herbal Therapy for the Human Immune System* Frontiers Media SA

The WHO CVD-Risk Management package contains a variety of components to guide healthcare providers and health systems even those with very minimal resources to more effective CVD risk management through easy-to-follow risk-assessment and risk-management algorithms; lifestyle counselling protocols; drug treatment protocols; referral pathways and follow-up schedules.
