Journal of Public-Private Partnerships Since the mid-1970s, pressure from international competition has forced business in the United States to look for better ways to achieve and maintain a competitive position. One popular tool is the self-managed work-team (SMWT). This book provides a thorough examination of SMWT both at the level of theory and at the practical level of when to use work teams to find solutions and how to develop successful teams. By examining the most widely accepted theories of work-team performance, illustrated by 10 case studies from the areas of manufacturing, public service and health care, the authors define: how high-performing self-managed work teams differ from work groups and short-term teams; the

problems which compel an organization to create such teams; the factors which explain successful self-managed work teams; and how to develop high performing cost-effective teams.

This fifth edition of *International Law: A South African Perspective* is now titled *Dugard's International Law: A South African Perspective*, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. *Dugard's International Law: A South African Perspective* presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial

decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.
