In steeds meer bedrijven en organisaties vormen projecten een wezenlijk onderdeel van de bedrijfsvoering. Projectmanagement is geëvolueerd tot een vitaal onderdeel van de besturing van de organisatie. Een van de eerste stappen naar professionalisering

van projectmanagement binnen een bedrijf of organisatie is vaak het kiezen van een projectmanagementmethode. Hierdoor wordt een gemeenschappelijke taal geïntroduceerd waardoor communicatie effectiever verloopt en worden de rollen en taken duidelijker verdeeld. De keuze voor een projectmanagementmethode is echter niet eenvoudig. Voor bedrijven die zich aan het beraden zijn op de keuze voor een bepaalde methode geeft dit boek op compacte wijze een overzicht van de openbaar beschikbare methoden in Nederland. Dit boek beoogt niet om een waardeoordeel te geven over de besproken methodes. Het maakt wel duidelijk dat de keuze voor een methode situationeel is bepaald. Het boek geeft inzicht op welke aspecten de verschillende methoden ondersteuning bieden en biedt daarbij overwegingen voor de keuze van een projectmanagementmethode. Aan de hand van een generiek Vergelijkingsmodel (ontwikkeld op basis van de competenties van de NCB versie 3) worden de tien methoden objectief met elkaar vergeleken. Deze kwantitatieve benadering wordt gecombineerd met een kwalitatieve benadering. Daarmee sluit dit boek aan op de vragen die kunnen leven bij de (project)manager die een methode moet kiezen. Een methode is niet meer dan een hulpmiddel voor de projectmanager. De waarde van het gebruik van één standaardmethode wordt gerelativeerd. De mogelijkheid om alleen die delen van een methode te gebruiken die in een specifiek project zinvol zijn wordt voorgelegd en er wordt aangegeven welke combinaties van methoden gebruikt worden. Het formuleren van enkele hoogtepunten uit de methoden, de krenten in de pap, zoals dat in dit boek genoemd wordt, geven dit boek nog een extra dimensie. Dit boek is tot stand gekomen op initiatief van Berenschot en IPMA-NL, de grootste vakorganisatie voor projectmanagement in Nederland. IPMA-NL is de grootste vakvereniging in Nederland voor project-, programma- en portfoliomanagers. Het doel van IPMA-NL is het professionaliseren van het vakgebied projectmanagement. De vereniging heeft circa 2300 leden en is aangesloten bij de International Project Management Association (IPMA). Berenschot is een onafhankelijk organisatieadviesbureau met 450 medewerkers in de Benelux. Al ruim 70 jaar lang verrassen wij onze opdrachtgevers in de publieke en private sector met slimme en nieuwe inzichten. We verwerven ze en maken ze toepasbaar. Dit door innovatie te koppelen

aan creativiteit. Steeds opnieuw. Klanten kiezen voor Berenschot omdat onze adviezen hen op een voorsprong zetten. Secrets of Success- Ultimate Edition Van Haren

In Sacred Plunder, David Perry argues that plundered relics, and narratives about them, played a central role in shaping the memorial legacy of the Fourth Crusade and the development of Venice's civic identity in the thirteenth century. After the Fourth Crusade ended in 1204, the disputes over the memory and meaning of the conquest began. Many crusaders faced accusations of impiety, sacrilege, violence, and theft. In their own defense, they produced hagiographical narratives about the movement of relics—a medieval genre called *translatio*—that restated their own versions of events and shaped the memory of the crusade. The recipients of relics commissioned these unique texts in order to exempt both the objects and the

people involved with their theft from broader scrutiny or criticism. Perry further demonstrates how these narratives became a focal point for cultural transformation and an argument for the creation of the new Venetian empire as the city moved from an era of mercantile expansion to one of imperial conquest in the thirteenth century.

In the preparation of this book, my aim has been to present the text in a sequential and lucid manner, containing all essentials of practical surveying. The book proves to be a valuable source of study to those who are preparing for GATE and other competitive examinations. This book contains Nine chapters. The most outstanding feature of the book is the condensation of the exhaustive theory into a systematic, point wise pattern and insertions of explanatory notes particularly with reference to the more common surveying operations for easy learning of the students. A large portion of the material presented in this book has been derived from the work of others . Their contribution is greatly acknowledged. An attempt has been made to also include all the recent developments in the field of surveying.
