The Chinese characters for "danger" and "opportunity" form the word "crisis".

Ancient Chinese wisdom sees an opportunity in danger. While cultural diversity brings challenges to the workplace, how do we turn these challenges into opportunities? Drawing

on their extensive experience working with multicultural and multinational organizations, Lionel Laroche and Caroline Yang provide an in-depth analysis of cross-cultural dynamics in the workplace and offer practical suggestions at both the individual and organizational levels. The book analyzes cross-cultural challenges in six areas: the relative importance of technical and soft skills; cross-cultural communication; cross-cultural feedback; hierarchy; individualism; and risk tolerance. It then provides a solutions framework that encompasses people, systems and

environment to bridge the issues that arise from cultural differences. The analysis and solutions are applied in four business contexts: managing a multicultural workforce; competing in the global talent market; collaborating with joint venture partners; and working with offshore resources. If you work with colleagues, managers, employees and customers from diverse cultures, if you are with an organization that has a multicultural workforce and/or global operations, or if your organization collaborates with joint venture partners or offshore resources from different cultures, then *Danger and Opportunity: Bridging Cultural Diversity for Competitive Advantage* is the book for you.

Bridging Cultures: Teacher Education

Module is a professional development resource for teacher educators and staff developers to help preservice and in-service teachers become knowledgeable about cultural differences and understand ways of bridging the expectations of school settings with those of the home. In a nonthreatening,

cognitively meaningful way, the Module is based on teacher-constructed and tested strategies to improve home-school communication and parent involvement. These innovations were developed as part of the Bridging Cultures Project, which explores the cultural value differences between the individualistic orientation of mainstream U.S. schools and the collectivistic orientation of many immigrant families. The goal of the Bridging Cultures Project is to support and help teachers in their work with students and families from immigrant cultures. The centerpiece of the Module is training resources, including an outline, an agenda, and a well-tested three-hour script designed as a lecture-discussion with structured opportunities for guided dialogue and

small-group discussion. Throughout the script, "Facilitators Notes" annotate presentation suggestions and oversized margins encourage integration of the facilitator's personal experiences in presenting and adapting the Module. Ideas for using the Readings for Bridging Cultures are provided. A section of overhead transparencies and handout masters is included. The Module also provides a discussion of the role of culture in education and the constructs of individualism and collectivism, an overview of the effects of the Bridging Cultures Project, and evaluation results of the author's use of the Module in two sections of a preservice teacher education course. Bridging Cultures: Teacher Education Module brings the successful processes and practices of

the Bridging Cultures Project to a larger audience in college courses and in professional development arenas. Designed for use in one or two class sessions, the Module can be incorporated in courses on educational psychology, child development, counseling psychology, and any others that deal with culture in education.

**Gaps** Emerald Group Publishing  
Cultural and social boundaries often separate those who participate in public health activities, and it is a major challenge to translate public health knowledge and technical capacity into public health action across these boundaries. This book provides an overview of anthropology and illustrates

in 15 case studies how anthropological concepts and methods can help us understand and resolve diverse public health problems around the world. For example, one chapter shows how differences in concepts and terminology among patients, clinicians, and epidemiologists in a southwestern U.S. county hinder the control of epidemics. Another chapter examines reasons that Mexican farmers don't use protective equipment when spraying pesticides and suggests ways to increase use. Another examines the culture of international health agencies, demonstrates institutional values and practices that impede effective public health practice, and suggests issues that must be addressed to enhance institutional organization and process.; Each chapter

characterizes a public health problem, describes methods used to analyse it, reviews results, and discusses implications; several chapters also describe and evaluate programs designed to address the problem on the basis of anthropological knowledge. The book provides practical models and indicates anthropological tools to translate public health knowledge and technical capacity into public health action.

*Bridging Cultures* InterVarsity Press Seminar paper from the year 2004 in the subject English Language and Literature Studies - Linguistics, grade: 1.7 (A-), University of Tübingen (New Philology), language: English, abstract: [...] Usually when we encounter such a book we try to solve those problems with the help of

literary strategies and approaches like literary theory, reading about the author and the epoch, studying of interpretations of the work , deconstructing the text and looking at the effects of the text with regard to us readers. Besides these literary strategies, which lead to an interpretation of the text, a linguistic analysis of literary texts helps us either to get a full understanding of the text or to comprehend why we have problems understanding the text. However, the linguistic analysis of literature is not an interpretation; it is more an explanation of how it means and why it means what it does. Linguistics demonstrates why a text is interpreted in this or that way and makes clearer what the underlying problems in the interpretation are. The

main aim of this essay is to show and explain the linguistic strategies and mechanisms that enable us to bridge the cultural differences, to demonstrate how cultural knowledge is triggered off and to show how it is possible to learn something about the culture. The goal of this essay is to show that readers can understand the text although they have no knowledge of the culture at all. In the first part of this work I will settle the question why it is difficult for us to understand the culture behind the text and give a brief account of the problems with which we are confronted in the process of learning about the culture in the book. In the second and third passage I will introduce and settle the theoretical basis of linguistic strategies that help us to understand the text and

to reconcile the cultural contrasts. The following part will show the practical application of the linguistic strategies with examples of Achebe's Things Fall Apart.

"In our global society, challenging conflicts abound in personal, business, government, and international settings. Many of these conflicts are complicated by layers of miscommunication, cultural misunderstandings, and completely different ways of looking at the world. These conflicts cannot be solved by goodwill or sincere intentions alone. In our multicultural world, we need new tools to address gaps in communication and understanding and the conflicts that flow from them. This book answers this need in groundbreaking ways that cut through complexity, replacing confusion with clarity." - book jacket.

In *Bridging the Divide*, Jack Metzgar attempts to determine the differences

between working-class and middle-class cultures in the United States. Drawing on a wide range of multidisciplinary sources, Metzgar writes as a now middle-class professional with a working-class upbringing, explaining the various ways the two cultures conflict and complement each other, illustrated by his own lived experiences. Set in a historical framework that reflects on how both class cultures developed, adapted, and survived through decades of historical circumstances, Metzgar challenges professional middle-class views of both the working-class and themselves. In the end, he argues for the creation of a cross-class coalition of what he calls "standard-issue professionals" with both hard-living and settled-living working people and

outlines some policies that could help promote such a unification if the two groups had a better understanding of their differences and how to use those differences to their advantage. *Bridging the Divide* mixes personal stories and theoretical concepts to give us a compelling look inside the current complex position of the working-class in American culture and a view of what it could be in the future.

*Bridging the Divide* John Wiley & Sons  
*Bridging the Cross-Culture Gap* was written to improve global listening skills and overall fluency in spoken English while helping students to see the pragmatic elements of what they hear and say. The book's multitude of tasks are designed to increase cultural awareness as well as develop the

language skills. This book assumes that learners have already had explicit instruction in the mechanics of listening and speaking in English. Each task is identified as having been designed for individual, pair work, small group, large group, or speech. However, tasks are easily adapted or modified based on class dynamics, class size, or session length. A large percentage of the tasks involve film clips representing a diverse group of countries and cultures. Two short lectures are available on the website (see Look Inside) and may be downloaded for free. This book was written to help focus discussions in the classroom on some of the more interesting and exciting topics for students from different linguistic and cultural backgrounds. The tasks were

designed to encourage students to take steps toward a deeper and more fulfilling understanding of what it means to be part of an intercultural world.
