TIANA ANNABEL

The Nation Emerald Group Publishing
 Andrew Cooper presents the first systematic study of Kant's account of natural history. Cooper contends that Kant made a decisive contribution to one of the most explosive and understudied revolutions in the history of science: the addition of time to the frame in which explanations are required, sought, and justified in natural science. Through addressing a wide range of Kant's works, Cooper challenges the claim that Kant's theory of science denies a developmental conception of nature and argues instead that it establishes a method by which natural historians can genuinely dispute historical claims and potentially come to consensus. This method, Cooper argues, can be used to expose serious flaws in Kant's own historical reasoning, including the formation and defence of his racist views. The book will be valuable to philosophers seeking to discern both the power and limitations of Kant's theory of science, and to historians of science working on the fractured landscape of eighteenth-century Newtonianism.

Geographers Palacký University Olomouc
 This is the first scholarly collection of articles focused on the cultural astronomy of the African continent. It weaves together astronomy, anthropology, and Africa and it includes African myths and legends about the sky, alignments to celestial bodies found at archaeological sites and at places of worship, rock art with celestial imagery, and scientific thinking revealed in local astronomy traditions including ethnomathematics and the creation of calendars.

World Regional Geography Springer Science & Business Media
 Kant's Observations of 1764 and Remarks of 1764-5 (a set of fragments written in the margins of his copy of the Observations) document a crucial turning point in his life and thought. Both reveal the growing importance for him of ethics, anthropology and politics, but with an important difference. The Observations attempts to observe human nature directly. The Remarks, by contrast, reveals a revolution in Kant's thinking, largely inspired by Rousseau, who 'turned him around' by disclosing to Kant the idea of a 'state of freedom' (modelled on the state of nature) as a touchstone for his thinking. This and related thoughts anticipate such famous later doctrines as the categorical imperative. This collection of essays by leading Kant scholars illuminates the many and varied topics within these two rich works, including the emerging relations between theory and practice, ethics and anthropology, men and women, philosophy, history and the 'rights of man'.

Studies (2024) John Wiley & Sons

This important collection of more than twenty original essays by prominent Kant scholars covers the multiple aspects of Kant's teaching in relation to his published works. With the Academy edition's continuing publication of Kant's lectures, the role of his lecturing activity has been drawing more and more deserved attention. Several of Kant's lectures on metaphysics, logic, ethics, anthropology, theology, and pedagogy have been translated into English, and important studies have appeared in many languages. But why study the lectures? When they are read in light of Kant's published writings, the lectures offer a new perspective of Kant's philosophical development, clarify points in the published texts, consider topics there unexamined, and depict the intellectual background in richer detail. And the lectures are often more accessible to readers than the published works. This book discusses all areas of Kant's lecturing activity. Some essays even analyze in detail the content of Kant's courses and the role of textbooks written by key authors such as Baumgarten, helping us understand Kant's thought in its intellectual and historical contexts. Contributors: Huaping Lu-Adler; Henny Blomme ; Robert Clewis; Alix Cohen; Corey Dyck; Faustino Fabbianelli; Norbert Fischer; Courtney Fugate; Paul Guyer; Robert Loudon; Antonio Moretto; Steve Naragon; Christian Onof; Stephen Palmquist; Riccardo Pozzo; Frederick Rauscher; Dennis Schulting; Oliver Sensen; Susan Shell; Werner Stark; John Zammito; Günter Zöllner

 "Making Knowledge Together - Addressing Climate Change through Innovative Place Based Education and Blended Learning" is the official name of the Erasmus+ Strategic Partnership project, shortly EduChange. The project aimed to innovate our way of teaching about Climate Change in both local and global perspectives via the field course methodology. It brought together students and teachers from four European universities - University of Malta, Utrecht University (the Netherlands), Norwegian University of Science and Technology, Trondheim (Norway), and Palacký University Olomouc (Czechia) with an idea, that teaching and learning in the field is often rather traditional and teacher-led. Through EduChange, we wanted to transform field courses into innovative, creative learning environments in which teachers, students and pupils can create knowledge together. We believe that supporting innovation and creativity can be achieved via international partnerships and inter- and trans-disciplinary approaches. This book presents the overall methodology used during the EduChange project.

The Germania and Agricola ... With Notes for Colleges. By W. S. Tyler ... New Edition Philip Allan
 Mapping Human and Natural Systems covers our increasingly digital world - internet communications, cloud computing, etc.,

and how our ability to quickly and visually communicate is becoming increasingly important. The book provides the reader with a ready reference to learn about map creation and interpretation and to help them better interact with, and construct, maps. There are several software systems available that focus on maps and mapping, but no single resource that covers the fundamentals of mapping. This book fills that need. Presents unique reflections, diversions, inspections and translations to encourage critical thinking skills Includes a companion site to enhance the reflections, diversions, inspections and translations with additional resources Provides examples and discussions from seasoned natural resource professionals with over 80 years of combined professional experience
World Geography Today Lecture Notes Cambridge University Press

Although they were not written by Kant himself, the transcripts of his lectures constitute an important source for philosophical research today. Some of the contributions presented in this volume discuss the authenticity and significance of these transcripts, for example the status of Kant's lectures on logic and anthropology, while others shed light on the historical formation of specific writings, for instance the texts on the philosophy of religion. The contributions provide new insights into Kant's philosophy, that, if looking at Kant's published writings alone, we would not be able to gain. In a number of cases, a critical analysis of Kant's lectures gives us a better understanding of his published works. Thus his lectures on metaphysics shed new light on his Critique of Pure Reason, while the lecture on natural law is a valuable source for the understanding of his published legal writings.

Geography MIT Press

Study, practice, rest. Repeat. Human Geography for the AP® Course by Hildebrand et al, is perfectly aligned to College Board's APHG® course. It includes all course concepts with plentiful skills support and practice. A complete AP® Practice Exam rounds out the tools in this engaging book program.

Teaching Geography, Third Edition Leckie Course Notes
 This edition features the exact same content as the traditional book in a convenient, three-hole-punched, loose-leaf version. Books a la Carte also offer a great value for your students--this format costs 35% less than a new textbook. Described as "fresh, innovative, and intelligent," Human Geography: Places and Regions in Global Context is acclaimed for its modern global approach, conceptual rigor, engaging real-world applications, and stunning visual program. Knox and Marston foster awareness of current issues and developing trends from a geographic perspective, and provide a solid foundation in the fundamentals of human geography. The authors give meaning to people and

places by integrating compelling local, regional, and global viewpoints. By providing access to the latest ideas, concepts, and theories, the book not only builds students' knowledge about places and regions, but deepens their understanding of the interdependence of places and regions in a globalizing world. The Sixth Edition extends Knox/Marston's modern approach, while making the book more accessible to a wider audience. This package contains: Books a la Carte for Human Geography: Places and Regions in Global Context, Sixth Edition

The Principles of Geotourism Academic Press

An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world, and include famous names as well as those less well known: explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas. Each study includes a select bibliography and brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date.

EduChange Methodology Walter de Gruyter GmbH & Co KG

Change Detection and Image Time Series Analysis 1 presents a wide range of unsupervised methods for temporal evolution analysis through the use of image time series associated with optical and/or synthetic aperture radar acquisition modalities. Chapter 1 introduces two unsupervised approaches to multiple-change detection in bi-temporal multivariate images, with Chapters 2 and 3 addressing change detection in image time series in the context of the statistical analysis of covariance matrices. Chapter 4 focuses on wavelets and convolutional-neural filters for feature extraction and entropy-based anomaly detection, and Chapter 5 deals with a number of metrics such as cross correlation ratios and the Hausdorff distance for variational analysis of the state of snow. Chapter 6 presents a fractional dynamic stochastic field model for spatio temporal forecasting and for monitoring fast-moving meteorological events such as cyclones. Chapter 7 proposes an analysis based on characteristic points for texture modeling, in the context of graph theory, and Chapter 8 focuses on detecting new land cover types by classification-based change detection or feature/pixel based change detection. Chapter 9 focuses on the modeling of classes in the difference image and derives a multiclass model for this difference image in the context of change vector analysis.

Kant's Observations and Remarks Springer

Krugman examines the course of economic geography and

development theory to shed light on the nature of economic inquiry.

Educational Times and Journal of the College of Preceptors Prentice Hall

Thinking Like a Geographer focuses on high-interest, career-related topics in the elementary curriculum related to geography. Students will explore interdisciplinary content, foster creativity, and develop higher order thinking skills with activities aligned to relevant content area standards. Students will develop and practice geography skills, such as reading and creating maps, graphs, and charts; examining primary and secondary sources; and thinking spatially on a variety of scales. Thinking Like a Geographer reflects key emphases of curricula from the Center for Gifted Education at William & Mary, including the development of process skills in various content areas and the enhancement of discipline-specific thinking and habits of mind through hands-on activities. Grade 2

Human Geography for the AP® Course Routledge

The book introduces tourism earth-science as a new scientific discipline by applying the principles of earth-science in the study of natural and human tourism resources. It involves studying the geo-scientific characteristics of these tourism resources through surveys, evaluation and aesthetic value assessment. It also discusses about the principles behind geopark establishment and management. It is an important publication providing direction for geopark and tourism developments in China. The book is a tool for geological heritage survey, assessment and research. It can also be used to assist planning of geopark, national parks, heritage protection and scientific interpretation. It is a valuable teaching material for teachers and students of geoscience and tourism as well as providing useful guidance for geopark managers and tour guides in their operation. In addition, the book also offers scientific knowledge of the surrounding natural and cultural landscapes to the public and the general visitors.

"Keywords: assessments, CCSS, CD-ROM, Common Core standards, Common Core State Standards, children, classrooms, content areas, curriculum, education, elementary, geography, instruction, learning, methods, middle, pedagogy, schools, science, secondary, social studies, spatial-thinking skills, standards, students, teachers, teaching This widely adopted teacher resource and course text explains basic geographic principles and demonstrates how to bring them to life in engaging, challenging instruction for grades K/n-/12. Accessibly written, the book is packed with instructional materials, teaching

tips, and more than 100 maps and other graphics. Together with the companion CD-ROM, it presents effective ways to promote students' spatial-thinking skills while teaching them about the land, climate, economy, and cultures of places around the world. The Companion CD-ROM The CD-ROM features more than 225 reproducible student activities; a Model Curriculum; PowerPoint slides of the book's figures and discussion guides that focus on important concepts in each chapter; specially designed K-2 resources; teaching notes with links to Common Core State Standards and Geography Standards; and more. New to This Edition *Chapter on geography in the curriculum. *Chapter appendix on the neuroscience of spatial reasoning. *CD-ROM features additional graphics, many new activities, and a Model Curriculum. *Discusses ways to align instruction with the Common Core State Standards. "--
