 Classroom Connections brings math, language arts, and science together around a common skill. This book for second graders covers nouns, verbs, adjectives, vowel sounds, context clues, commas, place value, addition, subtraction, skip counting, money, and measurement. --The Classroom Connections series provides math, language arts, and science practice for children in kindergarten to grade 3. Each page ties three subject areas together around a common skill, giving children a fresh way to look at important concepts. Children are also provided with extension activities, tips, and hints related to each skill to encourage additional learning and real-world application.

 Principles of Soil and Plant Water Relations, 2e describes the principles of water relations within soils, followed by the uptake of water and its subsequent movement throughout and from the plant body. This is presented as a progressive series of physical and biological interrelations, even though each topic is treated in detail on its own. The book also describes equipment used to measure water in the soil-plant-atmosphere system. At the end of each chapter is a biography of a scientist whose principles are discussed in the chapter. In addition to new information on the concept of celestial time, this new edition also includes new chapters on methods to determine sap flow in plants dual-probe heat-pulse technique to monitor water in the root zone. Provides the necessary understanding to address advancing

problems in water availability for meeting ecological requirements at local, regional and global scales Covers plant anatomy: an essential component to understanding soil and plant water relations

 The series Engage with Science: Experiment, Experience, Express has been designed keeping in mind the experimental learning model. Its modular design and clearly defined pedagogy help learners focus on first experimenting with a concept (by doing), then experience it (by assimilating) and finally express it in simpler terms (by articulating).
Brush Up: Each chapter begins with an activity to kick start the road to effective learning
Checkpoint: A set of objective questions to assess the understanding of the learner just after completing a topic
Activity: In the lab or hands-on activities to inculcate scientific temper and appreciate the importance of scientific method
Out of the Box: A set of questions to make learners hone their critical thinking and problem-solving skills
Subject Integration: Concepts or ideas posed to learners to bridge the boundaries of all the subjects they learn each day
Do You Know: Extra or additional bits of information to make the subject interesting and relatable
Building Together: Concepts or ideas for possible projects to enable learners learn from not just doing but reflecting on what they have learnt
Weblinks: Suggestive links from the internet of engaging videos or documentaries on certain topics to enable learners research and understand concepts on their own
Video clips: Handy clips to see things on the go and to make learning interactive
i-book: Digital support in the form of animations, videos, interactive activities, test generators and widgets
My Journal: A space for the learner to think and write about their experience on the learning and exhibit their creative skills
Life Skills: Bits of information or suggestive activities to make learners empathetic about environment and their surroundings
Case Study: A paragraph on important people or places or organisations or practices related to a

topic for the learners to understand and explore more
Worksheets: A set of additional rubrics apart from the ones given in Exercises that stand out and allow the learners to express and assess their understanding
My Health and Food Guide: A booklet published in collaboration with FSSAI, Government of India that aim to inculcate better understanding of the practices to a healthy and hygienic India.

Interactive Notebooks: Science for grade 2 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about plant and animal needs, life cycles, matter, sound, the moon, the water cycle, and more! This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.
